FOREWORD

All technology has been around everywhere at all times. The secret to successful application is *discovery*. Discovery here is merely **rediscovery** of technological truths, which have been known to civilizations in this and other galaxies eons ago.

Such fundamental knowledge is attainable by any society, provided its spiritual growth leads its members to the heightened awareness of being in harmony with the Universe. Where this harmony is *not* the hallmark of that particular society, we can have a situation of imbalance between their level of technological advancement versus spiritual growth. At this juncture the bestowal of critical "know-how" can become dangerous, if such technologies are controlled by the "dark forces."

During this late hour of eventide many are being "awakened" to the Light of the Universe. So it is to no surprise to us, that our Lighted Brethren from "the other side" begin to share with us some of their immense array of scientific knowledge.

If much of the presented information goes beyond the scope of comprehension of ordinary mankind, then please keep in mind that the target audience is our scientific community. The scientists will be able to interpret much, if not all, of the herewith presented information.

INTRODUCTION

This book is written specifically for the benefit of all those, who have so endeavoured to relate to the netherworld for the sake of all mankind, whom they have not neglected in their sparing attitudes. We Ones have so promised in this particular writing to keep all linguistic possibilities to a more simplified methodology. Herewith do we introduce ourselves to those of you, who are not acquainted with our Congressional Troop from the Star Sector of Appalachian Conquest, well within the belt and interplanetary loop of the greatest scientific feat ever subjected through the astrological attributes of man: the finding of the Andromeda Sector on Starsheets.

We are Korthrox of the planet Jupiter, Second in Command in the Starfleet Texidron, who will be working side by side with the Commander of the Galactic Federation of Union Disputes, Jambian. Jambian also monitors the Base Station for Andromedas Four as well as those surrounding nuances of despicable rubble, which you may find floating at an altitude of over 1500 miles within your atmospheric sphere. We will be pleased to begin.

THE UNIFIED FEDERATION OF SCHOLASTIC CONTROL

Good Evening. This is Korthrox, manufacturing a segment of the reclamation of the planet Earth. Greetings to all present, who within these highly acclaimed pages do heretoforth present to themselves the most up-to-date material never before presented to mankind. This is indeed the entire link-up to the progression of all concurrent and reliable information to date, and nevertheless, it is of equal quality to all other writings produced by the World Federation of Planets. There are indeed more of my kind surfacing to exalt your planet's entry into the fifth dimensional existence from whence you did leave. Now is the time for the fulfilling of the awakening spirit and no doubt, there are those of you who will, at given times, pull back into yourselves the remembrance of those times which sequed that of what is to come. Let us begin.

Little starseed! We have approved your request for yet another book and are honoured to have relied upon your sincerest wishes to the contributing of words shared on a level of mere understanding. In the past we realize that those writings, which had been given from those others in our Lightened Brethrenhood, had somewhat subjected you and yours into a grand state of despair, when it came to the interpretation features. However, we are pleased to see you continue with those writings, as well as from our dear Sananda, Lord Germain, as well as Hatonn himself.

With your continued support we will be enthused to proceed with this writing at the point of discovery itself for all who undoubtedly care to strive to heighten their awareness to the neglecting of the manufacturing of certain diplomatic schemes. Our first topic of discovery will subject itself to more prominent schemes of the interlude between the Photon Belt relay and the dexter accounts, of which we hope most are familiar with. This strictly signifies the overlapping of the structural epitaph, of which this Earth is presently in the process of manufacturing, within the depths of the very soul structure of Earth's inhabitants below the surface.

CHAPTER ONE

RELAY TELEPATHY TO THOSE DOWN UNDER

The gravitational pull of those misdemeanours far under the Earth's crust have indeed gravitated the pull of the circumference of all Earth's atrocities to the nuclear pull downward toward the sub-surface of decomposition. This includes those buildings, which are being held up through atmospheric pressure on the northern as well as the southern polar regions. This is really not so hard to understand, dear ones, for it is not only practical in the very real sense of the word, but also its practicality is regimented in a variety of ways. For instance: applying gravitational pull from the moon's surface structure will only (as it has in the past) serve to the influxing of determined structures, or grids, if you like to put it, for the producing electrodes of an ethereal source and back again. Henceforth we have the only production of ethereal negativity working in conjuncture with the neutron devices, which mankind has had within its grip for such a long season.

The source then of all good news is by form of blatant air wave telepathy. Some who have channelled for us have alluded to the force within, which indeed does give those certain privileged ones the mere right to contact as well as be contacted by those poor souls, who by their own merit have needed by the right-of-necessity to reign beneath the Earth's own atmospheric cosmic reaction to sub-surface living. We do understand, and would like to relay to all those readers that it is most assuredly their God-given right as well to perform their duties in the working off of their karma in any way they see fit, but only in conjuncture with the Evolutionary Laws of the Universe as a whole, for we are not only One within the Godhead, as some of you like to put it, but are in fact the one consciousness within God.

Undermining nutritional values of the less fortunate would be less than complimentary when dealing with those souls who, on their own journey, strive to complete those set tasks which

need done on and for their own accord, but with compliance met by those of you from the more prominent sector or status merit. But again, here we have left our topic of discussion and drifted back to those most complimentary type words of a more difficult nature. This I promised not to do. So back we go.

Many centuries have passed since the time man needed to equip himself with the dichotomies of the past, present and future. But now the time has come for all hunchbacks to come out of the closet and proclaim their right to living within a Universal Paradise, so to speak. Those of whom I speak, are at this present time living within quarters so slim of nature, that only to interfere with their present situation would be a grim reprisal. Of these things you know nothing about at this time, and that is why we Ones are here to inform you. These do not inhabit beneath the layer of the Earth's crust, but whopping palaces restrict their entry into the coming out of jungles of the Himalayas. Know naught of those of whom I speak? They are the Nottingham Esquires. Those of rickety speech patterns and clumsy attire. The offspring of the galactic creatures who roam your frozen wilderness, and who are of the type to scrutinize all that mankind does. But this does not mean that further commentary is either necessary nor available, but in its own context herewith replies that *"We are indeed here within your midst as you would have us believe that you indeed are the only ones available for conquest of the starlights so high in the sky."*

These are the ones with all due process of thought, who equate themselves and their rudimentary offshoots, given the opportunity to upgrade their species - those opportunities henceforth, which contrive their own beingness into intrical fancy as to dupe even the best well known archaeologists. That is indeed the diplomatic source which your Government uses for their experimental process when one alive is all that one needs, save the folklore, produced to the enchantment of the nationary dispute. Entree! Good night, starseed, until we meet again. Bonjour! KORTHROX.

A SEQUEL TO THE FIRST - UFO'S SIGHTED

Hello, starseed! This is Korthrox performing within all sequential ties in atmospheric control above planet Earth. Today was a fine morning for we ones, as the shooting star syndrome was appeased as having the final touchdown in all our history, to date. That means in simple terms that we ones have found (to our displeasure) man scientists who neglect to surface our beam ships when and where they happen to come across them, which, I might add, is none too often. Herewith procreation is a null factor, which might be displayed to the best of man's uncanny

ability to structure what might seem to them to be somewhat of a duplication of our sensitized equipment aboard the new wave length of augatography so found aboard our strategized nuance ships.

Well, dear ones, we have merely reported our findings to you, which may well, in fact, be reported shortly abroad your news networking as to the controversy of secret UFO ships, which have not, since the time of mankind, ever landed unhindered amidst the turmoil of uncondemned special forces of the military. This is somewhat of a fallacy as you may well imagine, but, nonetheless, it is a start, for there are those of ye, who instead do imagine we ones to form a start/stop landing in the order of relinquishing all doubts as to our eternal existence. **Misfits, we call them, those few, who so strive to sacrifice their headlines to the manufacturing of tell-truths of the Elite, those mighty ones, who so in the day of our appearance, doth serve nothing to the mark of our end - instead it would appear that nothing will squelch their own predicament of powerless attributes. Henceforth, it is with firm resolve that we state to you, the people, that not one day hence will pass that it will not remain known of the deceitfulness of their inclining planetary surveillance.** It is well known among our people, here located beneath the earthen barrier, that all cliches of the future will be undulated with the term *"We must. We tried. But naught to our displeasure did the extraterrestrial bring us to a forlorn pleasure by our own merits."*

You see, dear ones, we are not here to extradite any of you against your will, but hindsight will tell you, that there shall not pass these gate forlorn those of a negative displeasure with the atmospheric climate of the netherworlds. Love, KORTHROX.

THE DARK AGES OF TOMORROW

Starseed, this is Jambian, once again at your unswerving service. It is nice to keep in touch with you, and once we have completed our very prolonged survey schematics here, we will once more be rather forced back beyond the highways of tomorrow and all it has to offer, which meaning, of course, is by way of ourselves to your rescue, if you please. It has been a grand morning! But on with the documentary.

Here in the twilight of the succeeding generation we find that many elude the rightful placing of their own functions by way of that forum, which seems to elude their functioning through gross misrepresentation as well as gross misconduct of their lives in general and as a whole. There are those however, who through great strife and perception, do dwell within our consciousness and who, even at this time, do represent a token platitude to our success theory of removal from the caricaturing of the messed-up theorem of planet Earth itself.

It is of the utmost necessity that we find within your realms those willing and rejuvenating personnel, who have already entered our spectrum of unrelinquishing desire to be of the utmost usefulness to all members of the retiring planet Earth. The joy of all this is, that the Earth is about to enter into her final epilogue, and this within the proximity of neutron bypass features. Indeed, a darkened time is awaiting for ye ones of the earthen plateau, but hence it is almost on your own doorsteps, so to speak. You see, members and congressional ones of that set landscape, we need not speak for your souls alone, for that in itself would prove detrimental to your health benefits, of which you surely have little left. No, on the contrary, it befits you only in a way, where we leave you equipped with the necessary implementation in order for your survival process to be influenced. For the time of darkened consciousness is about to disappear for good, but unfortunately there are still some of you who queerly insist on holding on to the past for the sake of thinking, you may actually have a hand in rejuvenating the sequence of survival intact, thereby improving your lot to the benefitting of your *own* soul's status and money currency! Not so, ye ill informed, for it is only because of the gravity of the situation, that ye will find ourselves to come upon you for the providing of provisionary articles, in hopes that those of you still left behind to the survival status-quo, would find your way into the Photon Belt withdrawals, and henceforth comfort yourself with the elevation of the truth *not* manufactured by idiots!

LEAVE YOUR DEAD CONCEPTS OF CHRISTIAN ALIGNMENT, FOR CHRISTIANITY SURVIVES ONLY WITHIN THE HEARTS AND MINDS OF THE ENLIGHTENED ONES!! Within the full conscious endeavours of the like-minded Genghis Khan style you would survive only a minute of the time actually left to you! Better to be like-minded with those ones, who have foreseen this action in the taking of place of monetary means, and who indeed feel the need to indwell in the places of the Most High in all - that place of the consciousness, that of the Higher Self - and strictly speaking, that, of the GOD/GODDESS IN EACH ONE OF US!

"BLASPHEMY!!" you shriek? Not so. Again, that is the sole result of your religious text getting in the way. This is so much more. This we offer is the pure remembrance of the sequel of life itself: the *who* of you of who you really are! The "who" who indeed fits into the whole scheme of things. Do you really think that only your confederation of churches, no matter what denomination or sect or antiquated concepts you belong to, really has it in the bag? We sincerely hope not. If these writings do rattle you in your theory bags of scholastic teachings, let us remind you that this is to the good and progression of your soul. How many times have the prophets come to make good their word to your ears? Then why have you continued to shy away as good samaritans? Does this make those of your troops good samaritans? Nay, never a parallel exists, for betwixt the words of the anathema (for indeed you treat them as such) do the contexts of disturbing phrases fall from your ears much as the humdrum noise of a wrecking crew services to enchant ye naught. In those days years ago you continuously state that the

onslaught of God's people would never have happened had ye been at the reins!

YOU WERE THERE!! Do ye not remember with those foggy calibrated mind forms ye so oft strive to work with? It was your same spirit, which ye calibrate today that got them precious ones put to death in all manner of horrible atrocities! You *already* did it - over and over and over!

Leave your hostile libraries and teachers of iniquity! And what is iniquity? Those little feet who flash by in dexterous fashion only to serve their own fallacies of what is what and what is the right and the wrong of it...! And what indeed is attributing to the cause of the crusading-like factions of the New World Church? Pentecostals, Baptists, New Age Movements, and a seemingly endless congressional deployment of many more. The figure, we are not totally exact on at this time, but the roaring moving force of light barriers upon the Earth at this time is naught helping that which you so graciously seek: the ELIXIR OF LIFE ITSELF, the stabilizing factor. ***NO MORE VICTIMIZATION!!***

Well, the new world in itself doth hold those truths, but to get there you must first recognize truth in its essence or you're likely to miss the boat. Keep your cloud rising for the time of space flight, for the only contraptions coming through the clouds are - as you love to put it - your Redemption Day! You actually do think Jesus, the Christ, is going to float down from on what you like to term as "high?" Well, I'm not surprised, because you also believe that he spent forty days of his life talking to the Devil in the desert! ***WE EMCOMPASS OURSELVES WITHIN LIGHT, NOT DARKNESS! WE ARE OF THE LIGHT, NOT DARKNESS!!*** In truth he was with his space brothers, who were in reality equipping him and teaching him the new concepts of the day in order to prolong his retirement. But of these words and concepts you have no knowledge, we're sure, though books are completed and distributed among the knowledgeable who stand in the light of a darkened and troubled era. Hold onto your hats, for ***WE ARE COMING!*** Highten your frequency, for your redemption is near. We are from the solar plex area of your staunch reception, near the chakra or crown area. We stretch through your very being from head to toe. We are in you and you in us! Listen, watch, and learn!

HEED OUR WORDS!! They are not typified within any structured system! Tomorrow the darkened world will meet its final evolvment, and those who merit the conscious endeavour will surface to instruct those who wane and weep upon the Earth's surface! Keep watch and wait! Uplift one another and tell of love. ***TELL OF LOVE OF THE SPACE BROTHERS, WHOM YOU HAVE SO LONG AGO FORGOTTEN!!*** It is the epitome of despair, that, which you lock yourselves into, if you do naught to heed our everlasting words. ***AND TO STARDOM ITSELF DO WE RISE!***

Thank you, starseed, and we will speak with you again tomorrow, lovingly to all who

manifest the light over darkness. JAMBIAN.

MANKIND AND THE NETHERWORLD

Good Evening, little one. It is good to be back to work with you. We have selected an auditorium, so to speak, full of selection for you ones today. This is Korthrox speaking.

Jambian to begin this particular session, starseed. Egypt has the preliminary functions of a half-baked caricature of servitude as well as an application toward the benefit of all manlike creatures. Let me please explain further. **It has always been the sole responsibility of all of God's creatures to formulate and provide for the non-extinction of the species, no matter what or who they are!** In this he has sadly neglected the provisionary packages due to each of them, insomuch as he, mankind, has sought to elevate himself above such standards as to equate himself above the gods of tomorrow. True, he provides the said ones with food and shelter, of a sort, but how sadly has he striven to the fundamental of neglecting of their souls, of which, I'm sure, he is unaware of them having. This is only a token device of unassuredly compromising with the elements, of which faction he has less than equipped himself with the playing out of their nuances. It is disturbing as well as detrimental to each one's health, and on the contrary, it could be well stated that to equip each species, whether galactic or otherwise, would be considered by him to be less than foolhardy. And why this statement? Simply because to mankind by the technology of mankind his rudiment of success must stem from his overly selfish desire to equate himself with the god's. The forum of his demise, as well as the demise of all other species, stems also from the undermining of the nutritional value placed high and above the consensus of the repertoire of cantankerous nuances. This, my little ones, is simply a repetition of more detrimental equational values perceived by the "mighty ones" of your plateau, to bring about the complete and everlasting ruin of Sodom and Gomorrah-type effigies. This is a sad waste of humanity.

Enough, for the time of release to the everlasting time-travel of the Earth through the equatorial time-warp belt, so known as the belt of tomorrow or the Photon Belt, will be a great relief to all involved. Beware that you are indeed among the many, whom we so sacrifice ourselves toward the homecoming participation. We await ye ones and indeed count ourselves among the fortunate of the elated to be one with ye in this crucial time of evacuation. On the north and in the southern plains, no matter where you may travel, we have stretched our planes from one twixt the other, and the east and west have been so restructured as to accompany those who are at best, having seen the raid upon the Earth so many eons ago, there to handle all mid-factions of destructionary apparatus. The great ego of man has merited him thus far only as secondary to the overall disease of today. This being, of course, that far-off country so out of touch with all true reality as to prove to be a complete failure.

This is JAMBIAN signing off for today on our usual telepathic frequency. St. Germain bids you well, and will be speaking to you again shortly. Adieu. Out.

THE ELUSIVE DREAM

Hello, little star. We hope to conclude this episode with a few relaying topics. The first being a rather continuation of the many that we have on hand at this certain time. Let us please begin.

The entire content of this menagerie solely lies on the shoulders of those certain contents of manipulative authoritative conducive components. I do love your english at times, though it is somewhat of a restrictive quality to our own terminology. However, through continued use we believe we are finally getting the hang of it. JAMBIAN.

The dictatorial component of all surface type literature holds in its favour those seldom-heard truths, which for decades have been renowned in their superiority. These have been compliantly held subject to more rounded-off neutral concepts in order to alleviate the pain of the more factual compounds. This simply means, that in relation to all personified truth facts, so well known and practiced throughout the universal structure of time, there seem to be those so ill equipped within conceptual values, that relegating personifications do naught to strive within their means those certain nuances to the furthestmost contributing factor of essence alone. These concepts must be put into the more conducive language arts of the future for ye ones to understand, for we have proven within our industrious work charges, which simply means, we have striven our best to conduct certain changes to your linguistic word forms to the very best of our ability for the purpose of unduly menonating those phases or concepts into your graphic linguistic system purposely for the understanding of all ye ones' mind melds.

Korthrox signing in here at this time. And indeed will I alone be now taking over the dialogue. Let us please proceed hurriedly.

The populace, of which you are a current part at this time, lies within the belt stream of intertwineable change. It is solely for the benefit of all of mankind that we try our undoubtable best to solidify those set truths into what you would term as some sort of "quest for knowledge."

The positive encumbrances, which are surfacing around your planet at this given time within your historical equational gifts, are nonetheless driven in time within the metitorical belt of shifting desires. In conclusion, we strain our minds at times in the quest of conquering those manipulative injunctures, which do serve at the present to facilitate the progression of many of our "down troops" to the point of almost non-hearing methodology. These sacred truths, passed down generation to generation, must remain within the minds and hearts of those who have so

well equipped themselves with the necessary frequency conductors in the multiplying of their particular DNA charges. Total hookup will pronounce itself of the superior quality in the here and now, and it is time to get on the bandwagon, so to speak, and not let the "boats" roll past you! To miss the "boat" with conscious ability would be to miss your fruition speech theorem on inequitable forum in front of a congressional troop of Dukabor types.

Now for a puzzling little secret, so well kept from within the public eyes, it just does not make any sense to further equate it to the majority of non-control: **The military has within its ranks one of the most powerful and increasingly popular methodologies of which the world has never dreamt: *The stratosphere holds within itself those components of such a nullifying degree, that to set upon the ether's nebulous waves could undermine an entire race of people!***

And how exactly does this feature of destruction work? Well, it is akin to the polarized regions which continuously house all kinds of memoriums, of which you are also quite unaware. The stratosphere induction of nebulous waves is a feature second to none at this time of your historical evolution. It works much as a little sub-light which cannot be detected and is unaccountable to the frequencies to the stationary artifacts such as the rudiment of what is left of **the Hubble "telescope."**

This was indeed to be injected within the realms of the time warp theory, which in fact serves to play an important part in the electrifying of neutron-based particle beams into solar destruction magnifus through the time warp evolution. This tiny, thin, coloured beam was to be responsible for the destruction of the majority of mankind, as it would serve to shift the time element into the past, or future, or even another dimension, leaving a great majority of people alienated from their spouses, infants, and severing all ties with mankind as they know it. They simply accellerate the strength of the particle beam and lo and behold: the frequency of the non-reasoning participant is instantaneously subjected to the neutron effect within its circuitry, releasing immediate tidal shifts within all boundaries of time and space development. This is also to be hoped to be used as a means of escape by those working ones, whom the majority of the Earth's population know very little about. For they ones have already taken for themselves the blueprint of the remission of minds (here we speak of those textured components of nucleus desire) who are so ill equipped to ever deal within this realm on a conducive theoretical level. "Fast world travel" they term to call it, but nonetheless, it serves only as an instrument of global disaster, as lays with its boundaries the secret of never-never land, of which we all do strive to keep rather alleviated at this point.

For those who are indeed of the readiness to know the truth in its entirety, to those who are akin to our spiritual conquest of desire for the helping and deliverance of all mankind, then these words will surely come to light. But for those who are of a singlemindedness, to you we say: watch out, for your laughter drowns out the very content of your reasoning power! To this we

conclude that we are at times known to be rather long-winded, but hold tight, for we have to bear with ye ones in a sort of everlasting epitome of your worth.

We are Korthrox of the stars. **Count our numbers and watch for the difference in colour fluctuation, whilst our pulsating ships flash a joyous welcome to the each one of you!** KORTHROX out. Adieu.

CHAPTER TWO

Hello, Starseed. It is a good day again today. Let us proceed with the benefitting of all of the textures of mankind. This, simply stated, means that **all of mankind, who inhabit earthly features, are surrounded by those accomplishments of those beings belonging to the Brethrenhood, who so acquired through their fruitfulness implements of the workings of the netherworld.** Let us now begin, if you are ready. Jambian on "The Workings of Architecture Today."

THE WORKINGS OF ARCHITECTURE TODAY

The secret here, my fellow friends, is simply attributed to the mere fact that pollutionary artifact or rather, buildings, are attuned in to the accomplishmentary procedures of those solid blueprint features, which in their effort to accompany those who, at the helm of nuclear disaster, show their faces above and beyond comparison as to the dismantling of, both, the Earth's atmospheric condition as well the rudimentary fixing or undoing of the Earth's stratospheric composition.

It is a mess, in other words. Seemingly, we of the equatorial disposition here far above the Saturn stratosphere, are awed by the surveillance teams far beyond the Earth's surface. Our Brethren, to be of a sure figure, who, whenever they surface, or rather, land, "enclode" themselves in a figure of speech. You see, dear ones of ours, this mission into the Earth's solidifying atmosphere, and here we simply mean those composite formation of gaseous composition floating up into the atmospheric realms, do naught to construct a healthy antidote for the necessity of all breathing faculties of, both, mankind as well as ourselves. If breathing becomes necessary without the due kind of equipment, which so indicated by our stratospheric instrumentation panel here aboard the Starship "Euphratis," then the mere noticeability of

contriteness among the brethren of planet Earth doth much to feature the impossibility of placing within the placebo those much sought-after features of indicative resurfacing of the Earth's face. It is a popular belief among your kind, that to clean up the Earth's condition by recycling and drifting the air currents off to the northern regions, as well as benefitting all of mankind in its newly thought-of dumping grounds, is as neutral a thought as you could get at this specific time in your Earth's historical background. You see, this has already been played out in a manner of speaking, and we ones are indeed left with the mess to clean up, for you are not so equipped to handle and deal with what you have done. It is much like taking a broom and stripping it down to it's final brush fibre and expecting to sweep a dirt hut with it. It is too late, and if you are not aware that it is, then let us inform you, **IT IS TOO LATE!!**

Both, the hydrogen buildings as well as the stupendous tankerts which emboss your systematic injunctures at their platform bases, are indicative to your own claims of the process of neutralizing the gaseous formations which engulf the surface point of stratospheric compliances. We are managing to keep these linguistics as simple as possible, but from time to time is of a difficult nature for us. Our brains or rather, minds, hold information of such a complex nature, that we must rather shift into download formation on our own prolix. Now on to the other matter of topical reform solely based upon the proximity of nuclear material, to date.

Did you know, that at the bulging point of architectural structure your primary basis so set upon the point of neutron gases only serve to formate into themselves the very neutron products of Essimus? Essimus is the making of non-toxic equivalents to the neon nuclear production of sub-surface beam-like structures, which are so embedded within Earth's gravitational pull. The relation here is simply taking those gaseous contents and mixing them with the relation between composite and affilius will serve to neutralize all those contents between radium faction and sub-efficient neutron effigies, those conferences of dutch equal versus sub-terrianian encumbrances.

This I know is not easy to understand, though there are those of you reading this material, who definitely know where we're coming from. In simplistic terms again, I reply, that the gaseous content emitting from within your atmospheric glaucoma is made up of the same content, which that of the neutron-based chemical supply is holding back upon the basis of neutralizing the detonator factor of equivalence with a ratio of one to four. They do have the means at their fingertips to comply with our ratio development, but refuse to use it. We just thought you should be made aware of this.

JAMBIAN thanks you, the channel, for today. Out on frequency belt 4.07. Thank you. Good day. Home to base station among the stars. Watch for us, please. We are aware that this dictation is somewhat of an extraordinary but pleasing content for them whose interest is somewhat piqued by all worldly accomplishments. Over and out. Adieu.

CHAPTER THREE

SPACEFLIGHT AERODYNAMICS

Greetings on this fine day, starseed. We will be handling a topic on the aerodynamics of controversy, of which your scientists have long sought to accomplish within our regulatory status line of equivalent planning. If you would find this easier to channel in a theta state of non-compliance with the alpha, please let us know and we will break until such time as you have prepared yourself. It is the entire wish that this material be provided as the link to satisfactory control to only those with the understanding for further developmental techniques, which they have within their possession at this time, leaving out data of imperative diagnosis to those ones who have equalized at this time enough of formulated data in retrospect to the conquerances of their god-given ability.

With this documentary on aerospace dynamics, as we would call it for their sake of understanding, we would now feel free to intercept on your wavelength in order to emit through you those waves of non-perceptual understanding toward those only, who indeed have specified, that the equivalent of delayed structure could indeed occur within their realm of reality. With this then we bid you adieu, and we will now proceed with the necessary data.

Contrary to popular scientific belief on the plane of unreal equivalences to all universal structure, we have laid out a brief planning department in which all necessary data will henceforth be accomplished at the level of our own power. Blessed be those, who will see this through, for this could well be the factor of doubt erased into the membranes of all negative concerns in relation to the fact features so embraced by those in these given fields. Monitor carefully our procedures, and take entirely to heart those certain epitaphs of destructive qualities unto your own merits of interlude. This is entirely written at this time for those, whose hearts and minds are open to further possibilities of upward movement in a society, which is honed in to concave features of nuclear destruction. Any questions regarding this epitome is to be discovered in neutral fashion and indeed is encouraged in order to help alone those of a factious nature in the scientific and astrological communities, which are of a fact so closely knit together as to be one in purpose and segment of constructionary findings. If you are ready, little one of our domain, we would like to proceed.

SEILA: I will prepare myself to your wishes, for this information you choose to give sounds rather complicated. I will be ready at 2:00 pm.

PROCEEDINGS OF TRANCE SESSION

COMMANDER KORTHROX: *We do thank you and are grateful at this time for your utmost cooperation. This material is of a rather, shall we call it, a succulent nature. We do have to be careful that it does not fall into the wrong hands, therefore, for this purpose, we do leave undone many of the more serious equivalent data reforms as to the prejudging of material items that are necessary in their use. Here today we do begin as we have so stated on **aerodynamics**.*

*The filamenting in particular, we can begin with. In the filamenting structure of all aerodynamic components, whether they be of a large or the small in diameter, and here we simply mean whatever parts or components that have been worked with previously, these are the same which do seem to control the necessary fragments. The structure of which we use in many of our craft, as we could term them, which a few of the not so highly technical are your scientists involved in, at least at this point we might add, those, of course, of the less technical types, do not contain certain parameters of structural blueprint. It is of the **Deoscyde** Design, that would be **DEOSCYD**, and whether you put the **E** or the **I** on the end is really irrelevant at this time. But those we wish to follow more intact, because it is restrictive upon any society whether it be the astrophysics or scientific department of cosmology, it really makes little difference, because the basis for all artistructure does contain the same principles. It's just whether you have all the pieces together or not, much like that of a puzzle.*

*The infrastructure, for instance, which is settled on the outlay of the parameters of all dogma, which must be tied in with extracurricular pipes or thoroughfare. We do use the lineage of many filaments in this case which are made up of **Radium Neutryste**. Again, we would sincerely hope your spelling can at least be interpreted on this level as to be somewhat phonetically correct. So that last word, which is imperative, is **NUTRICE**. (Spelling based on interpretation of phonetics - Editor).*

We were proposing that the semistructure with the filaments, which do run 95 degree perpendicular to the axis of the basis of foundation which you find at the base and go upward, naturally. These are strung along as many tiny threads, and they radiate with the pulsation of many frequencies. These many frequencies do not in the least provide themselves to be of the contributing factor of the NEXSTRUS product. Of this, your scientists are very well aware. No need to explain further.

Next to subjecting the lineage with the proper perpendicular curriculum, we minus a faction

of 24 plus 64.7, which is the equivalent of all radius. This simply manufactures the basic component with that of the realignment of others, which go not so much vertical, not so much horizontal, but rather we would describe them more in 47 degree radius across stripping through the beams, which is almost in your terms, more like weaving.

For any sentient to have sanctifying threading, the bottom components of the loops, which are down under the base metals, which all around the very base, around the circular portion are holes, which would resemble in a cut-out fashion, of bows. Here we have nine of those strung around. Many do believe we use the crystalline power, and so it was for many centuries, even stretching into millennia. But now, even though the smaller and less technical - or we could put it - less evolved in technology those set crafts, there are few ever used in any situation, which are powered by back-up crystalline authority. We have found this to be of a much greater technique and our ability to hamstring them from one source to another, and do remember, these too are equivalent, though not exactly precisely of the same element as you would consider electrical factor. They give off a cooling heat which maintains our engines, as you would term them. We don't quite think of them in those terms, but for a coolant aspect it certainly is more proficient.

A SCIENTIST FROM ABOVE

Now the information of which your scientists (prefer) rather at this time, information which has eluded them:

CHIEF ENGINEER MELIX: Greetings, I have been sent in to intercept at this part. The BENZENE THEORY of all nuclear reactors is striven to at this point, and, of course, by your scientists. These are the basis, nonetheless, of all potential artifacts within your nuclear devices at this time. However, when you do take the Benzene and you strip it down to its bare resources which contains of the uranium context and you implement it, and it is a reddish green blue, all together there are many colours which are re-coordinated. These are all placed along the stripping, or, in your terminology, it could be the strapping of the filaments. All around about is the resource of arti... (we do have trouble in the process of some of your word structure...) artificial, I believe, the artificial, the artificial filaments maybe somewhat easier to give the thesis for it.

Formula data number one under the Menzime: Cross structure 2.47 G-koss in between the filament irate, of which there is a minus radius, please, 1002.

The normalicy of other figure structures you have been so searching for: .0083 by a divisible

factor of minus 4 equivalent. Zero infrastructure categorized - no, no, don't put down the minus, take away of 7.8 with filament. Switch that to 9. Leave intact - that is where your fault has been! Do remember, of course, to keep these figures unto yourselves. These are of, we would term, as "tight security."

Based now on the red blue green infrastructure of the round continuum, you will be faced with a type of vortex, which the component with the proportionate entity of flow, which is a rapid in and out pulsation of the vortex. Indeed, as we see it, round circular object such as metal ball, except not metal to be seen but infused with pulsation act of a minus negative plus positive pulsation at a rapid 1.7773240.3 to the 3rd power of 74. To begin increasing rapid rate, put pulsation fixed onto circular diatram components. Power to 2000 neutron waves. Turn back slightly 56 degrees. Cool off slightly. Be careful not to weigh down in dramatic move i.e. freeze too quickly. If freeze, you will neutralize all heating factions, which in subservient factor will turn it into gloss coil heat, which will indeed, in your terminology, "blow" your device.

COMMANDER KORTHROX: The weaving around the bottom of the base is 24 degrees up... this is circular, which attaches to the base. Here we have a steady flow. This is not so much of an interweave pattern glossary conduct nuias. Reread, please, the theory, justified all appearances, turn your intersect throttle and downpoint the order, subject to increased frequency. Sever at 1.7. Neutralize down to factor method of 1.4. Upswing, turn, 0.0. Do not go to the 0.01 on your Trythascope, because should you do that, you will have a power-up, and a power blow beneath the surface right in the middle of the Texidrom-compon-shakaeyes.

This is imperative: **You must learn to decipher as carefully as you can all our instructional patterns, for without them you can succeed no further!** We will pre-position each documented data that you have in your banks so far. They will be aligned. Scrub them out, that no one can chop into your system!

The glowing pattern you have on the ceiling in the citadome provides very relevant sequence. The glowing effect of redness, we see, you have subjected to intercom justification modules. You have it rather evenly dispersed. For this we commend you. You have succeeded on point 3. This is not an easy task. For what you are doing is taking the frequencies of certain metal components. You're using them in a relative infrastructure pattern with dynouements of electricity formations, which in other words, means the "sparks," in order to neutralize the current so it gives a cooling effect. You will follow all formulated data of downloading at this time. And then we will be ready to close this portion. Are we ready?

DIRECTOR: Yes.

KORTHROX: Thank you. On a fixed ratio of 68, mixture the subcurrent of all artificial remnants

of artifact, which you have been using. Remove the dilithium into the concave portion of which you have. Strip down the inner portion of the third ray. You must align it now. The influx of the circular pattern surrounding each filament will touch briefly onto the colour structure of the next. This must be aligned in coordinate rays. And here we do work on a large perimeter of 7 and 4's because we are in the process of all neutralizing alignments. Listen carefully. The sub-service structure.. on this you write 2.01 infrastructure sub-surface component lutherge. Main beam. It's quite easy when you get the hang of it.

Secondly, Synap - semi-structure: Fourth beam 2.1 equivalent. Cut down to bare minimum 1/3. Portion off 1.7 to the 4th power. Neutralize all lower energy formations.

Syntax - second beam. Cut at perpendicular. Use medium laser ray. Suffuge in with itom. Self structuring neutron miniscule beam formation 3.01 autoplex.

Core - 1 equivalent ratio 2000. Move to 10,000 for larger craft. You, however, will work on the radius 1/1000. This you do not neutralize. Concurrent to semi-soft structure of appearance around with all neutron waves in alignment of at the 4th 42nd degree. Make sure you are precision-bound!

Glowing? Intertwine. And finally, sever at the bomeray near the top. KORTHROX reporting Out.

DIRECTOR: *Thank you, Korthrox. Is there any more to come from other entities?*

KORTHROX: *Negative. Hydrogen power was once employed by our people many eons ago. And it was from this said source of power that we did begin to understand the separation of the power through the water. And here we drove the semi-currents, which are of a rectangular spark nature, but miniscule, we learned to separate. There are many, we could use the term "Secrets of the Universe," but in all logical fact, they're not secrets. They are available and known to all, who so desire. They're at the very fingertips of societal structure and ingrained within each of the DNA components.*

DIRECTOR: *Are you saying providing people go "within"?*

KORTHROX: *Providing people go "without." And here we mean "without" the limit of physical bodies. So in effect you would need to go "within" to go "without." The reality is of the most simple structure imaginable. And we offer our services as much as we can. But here again, we can only do just so much.*

DIRECTOR: *I really appreciate what you have given us, although it's far above my head. Can*

you exactly tell me who this information is specifically directed to?

KORTHROX: *This information is for those "chosen ones" in the scientific fields throughout your nations. It is not designed to a specific nation or to a specific country within a country. It is for those enlightened ones alone, who do have the pieces to the rest of the jigsaw and need a few more theograms to piece together. This should complete a majority of the work for them. Those who have pieced nothing together, of course, will understand nothing.*

DIRECTOR: *Can you tell me who the other entity was that came in a while ago?*

KORTHROX: *Affirmative. Melix.*

DIRECTOR: *Thank you.*

KORTHROX: *He is one of our furthestmost engineers in his field. He is of a very high quality and brilliant nature. His energy flow, however, is extremely strong and vibrant.*

DIRECTOR: *Are you foreseeing any more of these trance sessions for the purpose of this type of downloading?*

KORTHROX: *We have left that entirely up to her. We do realize that some of this does seem a bit frightening or overwhelming. And it is commendable that she prefers not one iota to be displaced, but as with downloading as with anything, words sometimes elude us, which causes much repetition. We only hope that the scientists in these different departments, which all work as one together in unison, will be wise enough to understand and piece together what we have given them, for the information is vital.*

CHAPTER FOUR

A very Good Morning unto you all, starseed. This is indeed Jambian coming in on your own set frequency. We will now, if you are ready, proceed within a new chapter heading of "A Great

Quantum Leap Into The Future." Please ready yourself and we will kindly proceed with all necessary information. Adieu.

A GREAT QUANTUM LEAP INTO THE FUTURE

The Bynjoimaph, of which we so gratefully were able to show you, is only one of the many instruments aboard our mother ships, of which is used to equally measure the strips between the stars in circumference in equal relationship to those of other spheres. If at any given set time in our delay sequence pattern it will be allayed within the beam of neutroise design, the eloquent positioning of all those in star sequence formation. This is to ensure the gravitational pull from the solar plex of the idom to the outward sense of pull in relation to the repositioning of the circumferential design of nuclear push/pull pattern.

This purpose for repositioning the equilibrium of star mesh, as we like to call it, is strictly for the purpose of neutralizing the ongoing causing factors such as (a) nubleous debree (b) nova explosions, as well as (c) to benefit the structural frequency of all nearby curtailing atmospheric wind modules (factors) to keep in a more or less continuum of unartificial structural pattern formation. It is for this cause that we must deploy our semi-artificial structural formations in the form or symphony of rounded-like sized disks into the stratosphere surrounding the nebulous of your gravitational Earth's atmosphere for relayance factors to be given in the proving of the fundamental truth, that **all surface matter has but one compound when detonating those compounded ingredients, or, in other words, materials, into the atmosphere, flooding it with neutron gasses.**

You must understand that, as ye ones keep charts, diagrams and artifacts at hand, so do we employ those same regulations in adherence with the strewn-up curriculum, of which we have also gathered to a great degree upon our walls. These "maps", as you like to call them, are not only proliferent within our mother craft structure, but on the whole are allowed throughout the extreme decks of our smaller craft, of which we have a plenty.

Now for further exploration into the depths of Earth's intricate structure of methodology itself, and here we wish to begin with the semi-artificial structures of those fluid-running craft of ours, which are able to deploy themselves between stratospheric changes such as sky, wind, water, and within the gravitational pull of Mother Earth itself.

TWIXT THE NATIONS OF THE ETHEREAL WORLD

Down in the depths of your sub-terrainian waters you might some day see a transformation near the surface, which you just might equate as an "undersea monster", as they so often do in the Great British Isles. We would be rather flattered, providing that was in fact what we were. Sorry to burst your bubble, but many of those tidal escapades, of which ye Ones deem to be of another nature of espouse, are naught but cantankerous in nature. On the contrary, **they are none other than your brothers who love this great Earth of yours, and your people, and who have come to help, and hope through means as yet unknown to your scientists to push the polar regions through their developmental contours.**

We do in fact, as you might have well gathered at this point, control rather sub-terrainian vessels with instrumental panels to match yours, except that they are indeed more of the advanced technology. **These pilot craft are down in your sea's depths strictly in an order to monitor the shift, which is at present taking place within the crevices of time, for it is through the uphurling of these foundational structures of nature herself, that we are able to so accurately monitor the equatorial shift within the Photon Belt from a negative position.**

As these ships enter the Earth's stratosphere and down into the atmosphere, there is a period of adjustment before small wings are sprouted for the correct decent into the raging currents of the deep. For, you see, we must enter from an altitude of no less than 1000 gravitational feet before we employ our belt shoes and curtail our small wing-like structure, in order to gain the "record speed" to which we are so well known for. This is not to say that all and any means of travel are at the least of a record speed tie in, but rather indeed to infer, that there are indeed times laid aside for the slowing down of structures in order to implement, much the same as you do with your research stations beyond the sea floor, those necessary tendencies for the deploying of green gaseous attire into the formation of the crevices, **in order to perfect a rather clearer and secure reading for our bobfloats. This is, to a marked degree, a form of measuring the gaseous content, of which is so stored within the crevices of your Earth's floor bottom.**

You see, in order to succeed in our measuring of tactical reform, and exactly how long it will take before the crust begins to crumble completely, leaving the Earth's inhabitants without water, so to speak, **for the water which is with you at the present in the form of oceans, lakes, rivers and streams, will be contoured into a rather high capping manoeuvre when leaving the Earth's gravitational pull, and will succeed in breaking formation with itself as it sweeps over the majority of Earth's crust, numbing the ones left into a dim shock. This is when the water table will turn, leaving the majority in a deep freeze sort of swimming pool, and islands will then be forced of their own accord to creep up and take their places once again among the islands and continents of yesteryear.**

It is for this particular reason alone, that we must "fight," for lack of a better word, to do all

within our power to preserve the contents of all stratospheric conditions, which might well arise and knock out the "lights" before the light of darkness has had its full run of the land. For when this happens in the name of catastrophe, the citizens will be forced to look about themselves in horror as they witness the horrific extent of which mankind has relayed upon himself, as well as the consensus of all his neighbouring star systems. For what affects ye ones doth in turn affect us as well, as all our brothers and sisters of the neighbouring planets, both, in this star system, as well as those around us. **We neither want destruction for the Earth planet and its inhabitants, nor do we wish to inert the destructive qualities, which it is sure to bring upon other sources.**

This is the end of this particular dialogue, starseed. Please reposition yourself in another ten minutes accordingly. Thank you. JAMBIAN out. Korthrox will be with you shortly to "Reposition the Placement of the 'Stars'." Next document heading.

REPOSITION THE PLACEMENT OF THE "STARS"

Greetings! Korthrox here on this bright morning of your future. Jambian has promised you a break, so after this introduction, proceed with your required nutrients.

By repositioning the placement of a goodly majority of the "stars", we simply attune in here to the majestic ships of ours, which so casually lie in the stratosphere of your plane. By this we mean not so much the repositioning of our small fleets, the "dingers," some of we Ones call them, but in effect our so-called saucer types of the larger calibre as well as all mother ships save for a gentle few. This repositioning is due to occur simply because the terrain upon your Earth's surface is replying to a structured differential quality of usurping the differences in quality throughout the Earth's core circumference center. And this again is where we subject ourselves to the overlaying influence of those star like sequences, which have rapidly at their disposal the technical qualities or means by which to aberrate all certain frequencies so felt throughout the Earth's crust. By this we mean the noiseless attunement to the Photon Belt, which lies beyond and within all deximeters of circumferential patterns.

We have thus far succeeded in keeping ye ones up-to-date with our tactical ploys on your behalf, though few are so well aware of our interference, which is caused simply because of not only our unending love for this graceful planet of yours, but indeed (as we have so often stated before to the health and welfare of as many of the planet's native inhabitants as we can in the short period of time we all have left unto ourselves), simply because we, as a member of the Great Universal Sector, have a grave responsibility toward all of Creation itself. This, you must keep in mind, is not of the kind of interference so spoken about as to break any one of the universal laws of non-interference, but on the contrary, it does prove to all, that when we strive

to work together, actions would, of course, serve to lessen the cause of major influential properties, thus enhancing man's chances for survival to a greater degree.

This is KORTHROX out for this portion. Please resume now with our Electrical Engineer, Suflus. We give this station to him simply because of your grave need to meet with one, who is not subject to change, such as many of ye ones are, but in fact has laid unto him a name of sorts for the allowing of a recognizable factor, when dealing with you ones on your level of understanding. Understand, loved ones, names are not of the equalled nature of importance here as they seem to be to you. Only because we, as a whole, are never separated, but indeed work in a consensus with one another within the One, the Whole of Creation. So this name habit, of which ye attribute and tie so much importance to, is simply for the benefit of pleasing those, who would not do otherwise by way of introduction. If it is fitting in your society, then be it far from our gain to change such a little compliance. Thank you, starseed, for your genuine efforts on our behalf to impart this most vital information into the hands of the public. Many thanks also to your editor and to all publishing houses, which align themselves unto this great worth.

Suflus kicking in here, starseed. It is customary on the planet, of which I come, to receive all blessings and statutes, and to pass them on to those of other natured spheres or planets, if you wish, for a closer understanding. We would like you to break for a short half hour at this time, for the information being fed to you from here on will take an enormous amount of energy on our behalf in order to come to meet your frequency half way. *Mind power* we speak of here, and you have been at the keyboard for over an hour at best, and we do realize the language is of a seldom spoken nature. Rest your head and we will resume in our orderly fashion within the half hour. SUFLUS out.

CHAPTER FIVE

POSTERITY KICKS IN

Posterity kicks in on behalf of mankind, starseed, and to this we will fill in the approximates as due to them in relation to the equivalents found upon the planetary regiments of time.

I am an electrical engineer, but not in the sense that you would derive from the term. You see, I supposition those natural current factors into live waves, which, through the breaking down of their molecular structure and repeating them into formations of a seclusive type instead of elusive, I am able to generate a flotsam fore, into which is catapulted a nucleus base of pure energy light, attuned with all its melodic colours intact. This is employed not so much in the spiritual sense, though all things contain a spiritual quality, and without them nothing would exist, but rather in this case we will be working within a diagram of non-sensical reform to the applauding of the creation of technology of a much higher essence than of which you, at present, are accustomed to.

To begin with then, the essence in the simplest term are those eight particles of greater essence than you are at present used to working with, but of the same basic methodology that the famous scientist, who by the way did, of course, listen to us, Nikola Tesla, when he formatted for your approval the Quantum Barrier, of which contained, of course, the essence of neutralization in the swift current of the age. You must understand that those of a greater mind-likeness are often attuned into our diagram of speech patterns, and once having succeeded in the reforming of their tired-out methodology, have in effect served the truth of essence to such a much greater degree, that they even eluded the tactics of their peers, of which, in any case, there were none. Let us now proceed on with a little talk from one of *your* greats and then we will find use for a little printback, as you like to call it, from our station above the Earth.

FROM THE CHIEF DIRECTOR OF THE GENEALOGY SCIENTIFIC COMMUNITY WORKING OUT OF WASHINGTON, D.C.

Two pi times 34 times minus zero component rectory with statistical abeyance being of a delude in auspice statutory requirements, being of the nature equivalent to the hormonal restructuring of equivalent restructuring process through elimination of stationary goods. The RX-12 equivalent would prove, we feel, to be satisfactory in its structural icon factor. Albeit, the necessary changes have met with rather an unstable factor in lack of resource supplies. Please, Henry, feel free to contact the depot post as soon as possible for retrograde supplies, not neglecting the pi/R management factor either.

Spendthrifts at this particular time in their evolution place us in a rather precarious methodology, and is not necessarily what formulates the required tenents at Blinkensop. Not all authority withstanding those few, who have proved themselves among the few, who have successfully achieved regulatory status, do have the cognizance to formulate the principle of

revolving anphetemites to the conclusion of all other minions at this time.

Gentlemen, let me introduce to you a solid sublayer texture, which has the capacity of illuminating even the furthestmost element of restructuring gamma rays. This is produced through a series of anphetemites, who, when have achieved sufficient critical decomposition, equational supplement factor one determines the outlay of further installation of form electrical currents. It is rather like life attributing to the restructuring of gamma radius equivalents. Do you understand the implications of these facts, gentlemen? The prime natural source, which they use to feed gamma rays to the obstrosensity of architectural design, couped within the possibility of restructuring or redesigning the source of the elemental factor, would then determine an effective solution to the apparition exploited by various other forms of technologies.

This, gentlemen, is where we come into play. Within the massive arch layer of the modulum comes the need for our expertise. We will take a short break and reconvene in 10 minutes. Thank you.

Contrary to the laws of nature and the entire world of physics, we will be asked to submit within the proximity of an 8 to 12 months period the hypogenics for the neutralization of brain wave sequential repertoire. This simply means that the IBM of plutonium study expects a resolution to be of a perfected equivalent of dot matrix type of joining within the elemental requirements of the vast natural supply of Texistar-Holland, which would, of course, negate circumferal study categorized by inlaid diadems of progression Kluxstan productivity.

So there you have it, gentlemen! The prime opportunity to have stabilized sufficiently the new gamma rays of the 20th Century! This opportunity is not walked on by those who would so continue to dwarf our institution and its practices by incomprehensible demands, and that only goes to show that not all areas of highly generated auspices prove detrimental to our health.

Adjournment of this portion will take place at exactly 20 hrs eastern time. Thank you for joining us.

This man has indeed achieved more than the ordinarily thought-of scientist of his field. Indeed, it has been brought forth at this time by way of our little 12 ft laser disk, that all substances compliant within the nature of universal control, hath indeed contributed to the esquience of desire of this man. Portion control on behalf of all reading this, and in fact to layer one upon the other as he has done in recording his findings, and alluding to their reproduction inasfar as the correct use of the gamma rays, whether it be for biochemical component use, or arbitrary design within engine type modules, nevertheless, mankind will continue to find itself flourishing within typlificationary production of craft of a similar stature to ours, if and when he

will listen and accept all those set theories so proficiently used upon other worlds and negate his wisdom unto himself. This portion is indeed, as you may well suspect, duty bound for further scientific study on neutron based wave lengths.

Please break for a nice lunch, little starseed, and we will recap on this a little further down the road. SUFLUS cordially speaking. Out.

The prognosis on each of these patterns are simply stated and allayed to the foreground, when each respective nuance is used proportionately to its own level of ground frequency. Now to proprot to the final episode, of which you are indubiously awaiting for. New sub-heading please, little star. "Neptune Enjoys Currency."

NEPTUNE ENJOYS CURRENCY

Biographical currency is not in the least to be spoken of in a negative fashion or connotation. It is simply the fastest way to travel in an artful fashion. Contrary to your popular belief system, Neptune, as well as many other planetary worlds, have been using the source of all equivalent radio frequencies, of which they do pick up on their little two-toned disks up in your sky, homing them back to be filed upon the mother ships, not only of their own, but those of other planets as well, in order to accurately record the particular essence of all comprising, as well as contradictory processes of your scientific nature. This is the preceding topic of discovery on the realm of your so called "radar waves", employed telescopically toward the Moon surface. For a fraction of the cost, ye ones could, with a little more coordinated help from our sectors, save yourselves by the billions of your dollars the effort to succeed in obtaining the same fluid texture of minute particles for the producing of stage flight, as we of other worlds and solar systems employ.

It is for this purpose alone, that we come to you in hopes that you will open your minds and hearts, in hopes that you will gravitate to yourselves and elevate that sectarian source so available to all who wish to better the status of mankind in general.

CHAPTER SIX

THE INTERPLANETARY FLIGHT SYSTEM

The connecting factors employed within statutory perimeters only secedes in the parliamentary rudiments of stationary deployment. We have many ships not only in your sector, but, of course, within the atmospheric compounds of what you would call your nebulous debree. So often of a fact we see you all have neglected our oftime contribution to mankind's welfare as a whole, and have thus succeeded in the continuation of strife upon your planet's surface. But to naught put us in the category of non-compliance, we will now perform our duty to the escalating of theorgramical appliance, insofar as relating to ye ones the scale of which you wish to understand the rudiments of collective consciousness in the witting of space flight. We do, however, still await those of like mindedness into our platform of redeeming grace, and would with all great tendencies adhere unto your reform all and any status, which you would, we're sure, agree unto your fullest to relate into your working theories. Now let us graciously proceed, dear ones of elated stature.

THE CONTINUATION OF DEPLOYMENT OF CONCURRENT FACTORS

This now is myself, whom ye ones term as Melix, and I will be working for your profit of understanding with the engineer of before, by whose help, we are sure, you have just profited by. This will no doubt be the conclusionary message of the day.

The technical resources of your craft, earthmen, are needing solid repair, which is naught in the least thought of in terms of good or bad, but rather of a graceful nature of perhaps reconstruction. If you will but now put your heads together in a reasoning fashion, we will be glad to reveal to you the hydronics of employing the currents and adjusting them to your tubular wave frequency modules. In other words, it is just that. How on Earth (to quote a term) do you get the essence into throttle for space escapades? Well, here is how...!

First, the parliamentary articles of proportionate studies presumes, that the first compliance would be to **separate those sub-beam particles into neutron sources**, right? To differ off that theory, first **look to gather the stratums into a rather vertical pattern, which moves horizontally equipped into vortex accumulation**. To do this you need to **set your calibre of shift speed into neutral motion and pull into itself, or rather the aberration, the necessary contoured lift, and then curtail its rather stratified equivalent barrier to a 95 degree source structure**. You will, by use of the radar gun, be able to practice this to a small degree until you realize, that, to double and triple its manifold production, you need only to play down that frequency into triplicate formation, and you will indeed have a somewhat clearer understanding of the source of informational data to begin with.

We are willing to go to greater lengths and to a far greater degree of scientific knowledge for

you, who are willing to listen and to keep an open mind into our frequency. For there are many words and terms of which both, ye and I, are extremely acquainted with, which would undoubtedly make both our work schedules much easier on a one to one basis, if you make it possible. This is only a drop in the bucket, so to speak, and it will only take one of your great minds to understand the empathy of which we speak. So do us the congenial favour to heighten your telepathic frequency to ours, so that we may enable you to, by our own knowledge, enter into the world of interplanetary travel at a much lesser cost, both, to you as well as to those whom you so deem to represent.

Thank you for your attention. We await your reply with caution as well as glorious expectation. SUFLUS out!

SYMPHONY AMONG THE "STARS"

On this day among other days we will search our topic study to that of many other references made by others of our collective minds. This is simply to say that we would in the short term allude to and refer back to those equational studies as being one of the highest in essence and form throughout the nucleus of universal and global situary processes. This is indeed written by our own hand, and is again to speak of the tie-in of all manufactured claims as well as consensus of nucleus barium as to exactly which of the light beams, which mankind upon your earthen plane has so successfully accomplished within the well known realm of diffuse aquarium, the term so devoted to the study of antiquity among the star regions of far-out space, have so amplified themselves as to portray the very epitome of success within themselves. These studies are naught of the extraordinary sort, by which of fact do conclude the all of essence into the joy extraordinaire within its accomplishing factor.

Now with this brief introduction we will set the record straight insofar as your hard-working scientists are concerned, and hopefully guide them in a design to which they will be somewhat accustomed to working with.

Andromeda Rex of the far reaching solar system stratosphere, at which time I am now debating leaving for my homeland in the Andromedas Sector, Mark 5.78.

Light waves are indeed the tie-down of all surface inclusions to date within your mediocre diatram workings or proceedings, if you may. You see all of the universal structure is so made up of what we call "beam particles" and take on the effect of solar light in a way unknown to your people as yet. Oh, you do believe solar power has hit the wavelengths! Not so! It is only the caricature of what is yet to come, and though there are those of ye whom like to believe that you have accomplished all the answers, it is solely to you and for the benefit of all mankind that

cries out for a less expensive method to retire their efforts by. You must understand that by this same form of currency, shall we call it for your sake, that most universal structures such as locomotives, cars and other such contrivances, are so nimbly run throughout the rest of the universe, of which, you ones are indubiously a part and parcel of. Though we do not use such common-place names as adjustments of caricatures for our processes of design, it would just as surely prove to be of equal importance to us, that the nuclei (neucleau?) wave frequency be harnessed and manufactured into contemporary use.

Break for five (minutes), starseed, and warm up. Resume shortly. KORTHROX out.

As with all things of contemporary design, it is naught but in a vanity effort to suppose that you have harnessed all facets of solar power into its extremities. Did you not find out thus far, that De Williker in France did surface a component into the windframe of his vortex, in an effort to prove unto himself, as well as his colleagues, that in order to employ more congenial neutrons into a rough standing sphere would only serve in fact to circumcise the deployment of all little-known categories of non-efficient standards among those molecules so contained within the field of injuction placebos? Know this one sort of strategy, **it is up to you ones to break forth the cause of solar heat and find the proper containment pressurized unit by which it may be trapped within the spheres of its intergravitational push/pull syndrome.** This will be in fact curtailed shortly, as you learn to finally succeed in the whiplashing of numerous rock foundations, turning them into all the symphonic gaseous contents that you may choose to employ to your capitulated desire.

That is enough for this segment at the present time. Please resume with your studies of ye great minds of Earth, for it is of the needful contribution toward all of mankind, that you eventually succeed in the curtailing of your power banks, focusing upon the immediate source of your strategic wealth (of) harmonial formulations and set them to a certain degree as to surely find accomplishment somewhere with your ranks. Thank you for your courtesy. On behalf of all the Star Federation Fleets within this pronounced sector. Adieu.

SUCCUMB TO YOUR WEALTH

It is through the efforts of accumulated wealth that has so brought you ones into the secure predicament of deploying your nuclear jets, as you so fondly deem them into the great wealth of

knowledge which comes from within our realms of the "stars". Surely you have sought to enjoy the source of all naturale goodness, which in effect is to be seen as the only and one good source of accomplishment for the sole benefit of all of mankind itself. It is by our constant pleadings, scientists of the earthen plateau, that we hound you in a way to categorize your successes thus far in your secular reasoning, and bring to light the effortless congenial pattern of neutron devices so well known and employed upon those nuclei (neucleau?) of other planetary reforms.

We could in fact proceed to write to you literature of such a nature, that your comprehension would be bypassed within a very short period of time, so salu for now and keep in the limelight of your efforts and **maybe one day with our help you will finally succeed in the retaining of gammified ray beams into your circular contours of prohibited space attire. Perform the derivatives with masterful acceptance of our own thoughts, ideas and actions, and you will find, that with accord will you succeed in the acquiring of all those necessary reforms of which ye so seek to attain.**

We have successfully been in the process of neutralizing all claims to the radical full beaming in on your consensus study, of which you so keenly attribute yourselves worth unto. We do this within proximity of our nuance double disk particle beam, which functions at an approximate speed of about a billion point 2 megahertz power, and have thus far eluded naught one of our sequential flight patterns within a given approximate radius of the neutron belt frequency. **Be elated, little ones, for your brothers are at hand within your conglomerated concord of time, distance and space attributes, and realize that you in effect know very little of our strategies when it comes to the placing of plutonium bombs into the radioactive attire of space itself.**

Given the total deductions of which you have thus far managed to acquire unto your regime, we herewith attribute to your kind the holy success of non-malfunctioning deployment of all articles in the great hopes, **that one day you will fly side by side with us into the outer limits of influxual space continuum travel.**

IT IS SOLELY UNDERSTOOD BY EVERY HIGH COUNCIL WITHIN THE ANDROMEDAS AND QUIMTREX SYSTEMS, THAT YOU ARE NEARLY ON YOUR WAY TO PERFORMING A MULTITUDE OF GREAT SINS, IF YOU DO NOT HEED OUR WORDS AND TURN FROM INIQUITY INTO THE WAY OF FORTHRIGHT GOODNESS!

Adieu for now (from) those at Mission Control headed up by Jambian himself. SOPHLEX out.

Greetings, starseed. Today we are apt to be in the mood of modifying the artful consensus of tomorrow's classroom for the benefit of our prodigious young scientists. Subtitle heading

should be classified as: "The Classroom of Tomorrow." Thank you, little One. Please now proceed.

THE CLASSROOM OF TOMORROW

The design of tomorrow's structures will appear to be a little bit less socialized in its structure element, and personifies itself into a more upgrading epitome of its common benefactor, the Suflus Design. It will undoubtedly be equipped within its surface structure with the capacity of one milligram of working consensus versus an aptitude of formulating the diagraphs of textured design into a quadrum of suffixes of authority. It is for this purpose that we will realign ourselves within the equipping radius of providing all necessary instrumentation with a par on course with all necessary but preliminary injunctures of no-nonsense classroom attire.

We have provided for ye ones a diagram of copy to be herewith displayed at your convenience for all to see. This is merely a projection of the more up-to-date or rather, evolved structure design with content equipped within its source for the procedure of modifying that gateway into the more complex regions of the mind, for, dear ones, you will finally come to understand, and hopefully by our own consensus come to grips with all those nuances, which dictate unto you ones the needful research into the underrated world of transparent occurrences within the mind module - which to be of a surety is your *headpiece!* You will not only learn to adapt to our given ways of communicationary processes, but herewith you will learn to carefully gravitate yourselves into more serious modes of teleportation. Many exciting events await ye ones of the third to fourth dimensionary tribunes, and we glorious ones do gleefully await your arrival into our realms of headwinds by your short but forthcoming access into the mind of communicational non-error consensus.

Adieu for now, and we do hereby heartily await your arrival. **THEN WE WILL WORK TOGETHER AS A WHOLE, AND YOU WILL BY FAR GET A LOT MORE ACCOMPLISHED! As far as those of you who would realize your fondest dreams to come true - IT WILL HAPPEN! Doubt not your objective, for THE MAJORITY OF THE IDEAS, OF WHICH YOU CONTRIBUTE UNTO YOURSELVES, COME DIRECTLY FROM US IN THE FORM OF INTERTWINED THOUGHT PROJECTION!**

Good day, gentlemen. ANTHROX speaking for the majority of the High Consensus of the Astronautical Department. Salu.

CHAPTER SEVEN

TURBO ENGINES REQUIRE A POWER BOOST

On with another request to be in the fulfillment on nuclear dynamics. This is Jambian on the forefront, today, little one. Let us begin.

Turbo accomplishments are strictly of the manufacturing mode of transportational frequency and are bound by negative wave frequencies to date under the strong arm of military regime, of course. To dictate apprehensible theoregrams would be laid in a specific categorical compound of nucleon wave barriers, of which is so strewn about and depicted within its normal fashion in Figure Two of Diagram Composites.

(DIAGRAM)

To begin with then, we have supplanted to the fullest texture of A-bomb devices the nuclear reactor frequency, which, if applied at the surface font frequency to the 4th degree compound would, in fact, comprehend in its significance the full array of Windom Architecture in design. It has been rather a significant effort in the pullbarring of string waves into riding along the current frequencies of the composite within that shielded effort so imbued within the A-bomb theory. If you would only suppose in taking out the graphite and see to placing it within the juncture rod of hypothesis, you would find to articulate a medium of subjective wave lengths into a moderum diaphragm source, which in turn would enable you to force the kind of structure outlet that is necessary in order to carry the caricature of perimeter waves to their outmost array of solar-wave despondents. This is simply manufactured by aligning those stringed currents with the nubleous perimeter of contextual performance in order to deploy that sort of strategic barrier, which is kilned within its own modular centre.

Straightenth Bathe is the strategic looking element of whose sort is conjecturalized within the base components of core de plume. Understand ye? Well, this is as close of which we ones can come into your understanding limits. For any and all further conjuncture on our part herewith personifies those brieftakers of board meetings within our spectrum of developmental theory. It is thereby up to the each of ye ones, who do in fact study our written material, to come forth with your own decipherings unto a satisfactory conclusion basis. Understand?

FOLLY LIES AT THE WIT'S END OF NON-COMPLIANT MATERIAL

Indeed, folly concerning ye ones' typlificationary nuances dothe indeed lie within the base

features of modified concurrences in a just effort to redeem they ones from the folly of their misgivings toward that science, of which is to be found to be of the perfected nature, when written concisely within historical texts. Is this not a subjecture climax of ye one's touting? Well, let us then make ourselves of the plain nature when discussing this feature of plume-bomb core features on a planet inhabited by beings, who in their own minds do conjure up the most magnificent climaxes with a real flair for a complete and finished product.

Today the answer lies within each one of ye who so do to broadcaste the wavering news, that indeed there be an effort made on behalf of NASA itself to deploy more nitrogen bombs into an area of terrorist attack. Even if this hasn't happened as of yet, it is nonetheless in the making product. That, to hide away from the public eye that real source of neutron effigy, is to inhibit those sources, which are to, in the long run, prove to be not less than qualified and detrimental to their forebearers than the concluding efforts of those of yesteryear.

It behooves us then, to quarantine ye all off the border section of artificial space time in a real swerving effort to alleviate those set standards, which arise around the very nucleus of perimeter bases here in the sky, of which, of course, are manned by we ones of the third colony, apart from the stars of the Pluton-Plebian base. **It is to our own concord of the lighted daytime stars, that fixings in your atmosphere will naught be of a given texture, which (are) in full compliance with the structural arts of the gods themselves!** Now on with world news.

A bit of the piece of the puzzle finally fits in, lauding those supreme minds with brain wave features, much akin to the dwarfed talks of brainless manufacturers of the equilibrium contextual design itself. Beware then, all ye ones of the perimeter base, for we are indeed so stationed out within the complexity of star diadrams, that just in an effort to find us according to our depictographes would put us short in the running with those of other races, if you feel to define them as such.

Modification is the key here to all given names and sources of content. Be it ligrified indeed, if we were to find that you took our tools for the purpose to gain an entry into our time-space arrival techniques. In fact good progress if you do succeed, for we will indeed duly welcome ye all. Progression takes its place however within each base structure of compliant affairs, which like so many other contextures are aberrated to the within diaphragm success of all unequivocal theory based geograms. After all, dear scientist of the earthen plateau, is it not in the very least a little significant in nature to find yourself abhorring those rites and rituals, which have really gotten you very little praise and success thus far, when in full light of the modification of perimeter beams, of which we ones have for so many years alluded to? Enough of this prattling then. Let us continue on with the show!

We intend now on showing you some rather strategic viewpoints pertaining to those poorly

fashioned abhorrences, of which you term the name "flying saucers" without workable motors. Ghastly concept, don't you think? However, it is implicated to your detriment, that there are indeed those ones of your team, who have so cruelly adjusted the faxforum to read: *"To him meriteth much if he is wise enough to prove unto himself the satisfactory implementation of all working conjectures."* I believe it goes something like that anyway.

People, this is not a rotten thing to have happened, for the likelihood of you ever regaining a particle or fragment of the piece of the puzzle lies strictly within your own realm of developmental instruction, which, of course, you unwittingly receive from us. Rally around the complex, boys, for you are about to begin an instructional debut, which we hope will at last finally finish off the last lap of your efforts ere they be forsaken. Buy for yourselves stools of wire mesh, for then you will indeed feel the solar effect of which you will forever attribute to be of a most worthwhile cause. It is befitting those of you to understand that there are indeed certain types of sparks, which are resonating all around ye, and in an effort to attach these unto the core structure, you will have to learn to manufacture them from the surface of the radium beams in order to detach those current high string frequency beams, which parley vous around the net wave theory of diatrem. Understand ye?

We will conclude thusly on the morrow. Study hard, for we do not in any fashion be of the wasting of ye ones' precious time, but rather of we to be in the helpmeeting of our earthly brethren, in the leading of thus into the very limelight of true Nuclear Based Technology, of which has for no cause any resemblance to that, of which ye ones term "nuclear waste." Salu. DETOINE, within locked-in perimeters within the scientific departmental feature of Skylock. Jambian now back at the helm. Thank you and good night. Frequency lockout.

A LITTLE BIT MORE IN BRASH TALK

Saturday, 17th December 1994

1:47 pm

The dividing line between the pulmonary features confine themselves within the subjective authorities betwixt the accruelements of nuclear bypass injuncture. The contour devices so shown within the nucleus development of design structure provide the relaxation for the equilibrium of all rotorized mechanics of authorized synchronization. This pulmonary effect on the core product as shown in the sketch is the provocation of suitable currents, which are drawn from the necessary high beam currents into the exposed area surrounding the nuclei base of the corature. This inhibited the drive features into complete coordination within a proper consensus reactionary reasoning in a complete achievement to neutralize the subservient compass plate at the radius department control panel.

Thanks on this little piece of information, for it is only to your ranks at this time that it is so given. If you feel to practice procedures in co-operation within our guidelines, you will soon find, that the further equilibrium contour, of which you look for, do rapidly repair the circular molecular light rays, and henceforth change them into the necessary accruements to the formation, of which ye are now working within all of your desired limitations.

At this point we feel ye ones have little choice left unto you, for the space of time within the continuum tanks are rapidly decreasing in size with each process that fails your computations or equational benefactors.

Try it our way, for our methods are indeed of the failsafe methods, and likewise ye will learn to harness even greater methods of imploding electrodes into the complete equational surface structure of the core of your desiring work-a-day routines!

Regimentation is a gift as it is non-continuously ill practiced within a forum of debatable nonsense. This will help to abate those sources of nuclear barrages unto a more or less formulated and regulated consensus. **Happy hunting, as you say, fellows of the art of science, for we are of the willing hand to be helpmeets to ye, all working together within compliant factors.** It is hereby the group consensus of the tribune of article dimensions, that we conjure up for your abrasionary pulsating nuances, that to arbitrarily pre-lead all those resource studies of yours, we must subject to a prepared deployment plan, which will enable the least of ye to accomplish that, which ye so gladly and heartily began.

Adieu for now, my comrades, and "Happy fishing!" so to speak. Jambian's descriptive study on the consensus of artificial light bariums on behalf of the regimented theorograms of Korthrox's hierarchy of team mates. Flourish well within your work diagrams, and may the perimeters be bountiful in their pleasure in working arm in arm with the light sources of the universal intact. Adieu. KORTHROX out.

CHAPTER EIGHT

Greetings to you and yours on this fine snowy day that ye ones are secluded in. Well, this is to be a memorandum of a story of which ye ones could indeed dwell on yourselves. Today is the epic storytelling of the etheric compliance with the effects within the major tropical regions, which will be hitting, or rather, feeling the effects of the Photon Belt first. Let us please begin. Subtitle to date will be under chapter heading: "Etheric, Please Comply!"

ETHERIC, PLEASE COMPLY!

Just a little foreword here we feel is applicable at this time: That is precisely to (be) stricken from the previous record, that **all compliance neutrons of the physical body will have to accompany itself within the photons of disturbance**. Let us proceed with subtitle heading. "It is Indeed the Time Allotted for Reacquaintance with our Mother Craft."

IT IS INDEED THE TIME ALLOTTED FOR REACQUAINTANCE WITH OUR MOTHER CRAFT

The polar regions will be stricken, to put it within your formulated wording, to acquire that first impact, which indeed will be first and foremost noticed to be the shifting of equinoxal tide upon the influx barriers of the etheric body. What do we mean by this then, in your terms? It is just that the effects upon the neural system, which lies within the containment field of the narcissist system, (which is the underlying ego), will accompany within itself those factors of change, which will indeed bring about a sublayer of "toxic waste" to be dealt with, disposed and **interchanged with that of the complete rejuvenation of all major eight senses**, instead of your perceived regulatory five. This simply means that an exchange will be made for any of those, who are still within directional change in the rudiments of self-acquiring data, to be processed at an exchange rate of 2 millimeter per second, on acquiring that same formulated data **to register as a fourth dimensional being. IT IS THAT SIMPLE!**

The reason that the effect of the Photon Belt will register foremost on the highplex of seclusion is simply because the hole, which is set at a regulatory system structure into the core of the Earth, effects a reading of the seismic waves at an even greater proximity than that of the hybrid situational status.

The South Pole indeed "gets it first," so to speak, as it is the first to be in the

pronounced position nearest the equator, facing the rays of the Equinox Delta Strain. From then on you will notice a switching of currents within your earthen plateau in the form of earthquakes, in sections where there previously were none and those swooping currents of air, which serve to dry out acquanous regions of swampy attire. This will all take place within a period of 5 to 7 years hence. From then on the regions will take on a hard look of desert waste, which will indeed prove to be quite a switch. Oceanic tides will flow as high as some of your city structures before increasing into mile high tides. This is the beginning of woes. The surface structures of your cities will fall like wrapping paper under the repositioning of grave exchanges of seismic waves, which will proceed to run under the Earth like escalators, one at a time to begin with, until the whole undercurrent falls not only buildings of design, but also unstable those underground bases and structures, of which those of you who wish to hide will find yourselves without refuge of any kind. They may have worked for the cause of bomb shelters but in the days of the fortitude of accomplishing their purpose, no longer will it be so.

No matter, think of all those upon the face of the Earth, who it will no longer matter as to whether they have secured a "job" or not. Survival of the etheric body within the physical will have its predominant way within occasion of desire. In other words, **those who are in the midst of these catastrophes will no longer care for the material items of their existence, but instead will be fed under the auspices of attaining their own right to life. Their very existence will be personified and no other thing will matter so much as their completeness at this time to survival techniques. They will seek out the enlightened ones of the Brotherhood, but naught will be found in those days, for many will have acquired the right of ascension and will indeed be nowhere to be found.**

Those who are of heady countenance will find themselves to be mere survivalists of the beginning of these woes and will find within themselves the limitless desire to attain that, which was taken away. It is at this time, that the Seeds or Righteous Ones will be faced with a one way trip of evacuationary process by we ones, who have loved you so.

Now, but indeed, what of those "heady" ones, who anger about the rejuvenation of Terra, our mother Earth, as you term it? Will they too, be brought into the surface requirements of evacuation features? Nay, for naught it is to them to succumb unto themselves those thoughts for mere existence within a righteous colony. For the "seeds," who indeed are of the *volunteering* essence, will in fact allow their names, so to speak, to stand in the rejuvenation of times for the replanting of the earthen nature, when all cleansing completes its manufacturing. It will be so, as it is written in the time immortal data banks: **THE AKASHIC ACCOMPLIANCE.**

That is enough for one day. Thank you for your prompt attention to this our matter of information in a packet service to all people of planet Earth. Adieu.

Signing off at injunction road. BEARATRIX, the subterranean monitor of all seismic fields within the core structure of earthen subterranean duty council. Signing off on frequency, radio equivalent 12.01 neutron-based wave frequency. Out. Thank you.

CHAPTER NINE

ELECTRONICS ACTUALLY NEUTRALIZE

The brine of the electronics field is infused with a solid barrier type infusion seam or systematic functioning quality. Perfunctionary data is lead into the decomposement chambers and from there passes into a rod type infusion centre from which are stored the efficiencies of neutralite components.

A goodly morning unto ye all, Uthrania Seila. I have many such injunctures to produce an equivalent of in the just whoremongering style of the underlings of the netherworld. It is solely unto our benefit, that at this time we have placed our retinue into the foremost tract of inefficient services, if any were to be indeed found among the troops of the yesteryear project of major scientist Tesla. Ahem.. now it is rather a documentary of sorts to produce a just effect in order to relay that particular informational packet unto the hands of those equivalent mighty ones of Duxton's regime. This is indeed an unprofitable time for you, we equate, so as we bid you a permanent daily adieu, we keep in remembrance all those occasions, which you did so unduly sacrifice yourself into producing transcripts on our behalf. Thank you, KORTHROX out on line frequency neutron based F7.

CANADA: A HIDDEN CHAPTER

INTRODUCTION

Good morning, Uthrania Seila. This is Jambian at the helm on this rather blustery morning. This next topic of discovery should include the sources of neutralizing power escapades behind the veil of forgetfulness, so to speak, putting it a little slanted in texture. Proceed please. This is to be highlighted and we will instruct you exactly where we would want this done. Thank you. Please proceed. JAMBIAN out. Korthrox signing back in.

Politics is not the norm for us and that is why precisely we have chosen to seclude a chapter on Canada at large in particular. This writing will precede a later formation, which, in another book, could do well to elaborate upon the essence of character of those who put in dire straits, those of its national regime. Conclude informational prelude. Let us begin, please.

CANADA

Canada's current standing precedes all those countries, wherein there are strategic diplomatic ties concerned. In other words, it is the consensus of those poor minion, who are your parliamentary figures, who, in just sense, are at their wit's end as to the what, why, and whereabouts of the country, which has so rudely fallen into espionage disparage.

It is therefore the conclusion of the Council of Hierarchical Beings, herein Galaxy Four of the stratus solar system, that to continue to allow Canada to fall within the graces of the minion minds will be a shallow but continuous process for the time being. This is simply because of the Law of Non-Interference, that we deem to allow these future events to surface.

Canada as a nation lies within the moral sanctification of rudiments of society. This means that we watch and observe, whether or not it is the spirit of the people, who surface against the blanket of darkness, which envelopes their country of national pride, or whether or not it will prove to be a repeat of Atlantis and Mu at large. Well, stratospheric conferences are a nuance of despicable desires inasfar as we are concerned, and Canada will in the least prove to be depicted by a force of non-contrivance subordinates. This last genuine ploy by the elitist factions, of which the majority of Canadians know little or nothing about, just may be their undoing. **Educate yourselves, dear ones, for it is *your* necks on the block!**

If Canada ever had a chance to rebel against those, who keep authority above them, then it would be a major recalling of spiritual wealth, for in order to recoup the camp, the consensus of the people must join together in conjugating the forces of the unknown (at least to most Canadians), and congregate in the joining of the acumen of the consciousness, in order to provide at least a limited joining of espionage endeavour to conquer those forces of detrimental pride. The rejoicing of this policy to be would indeed instruct those many, who with time would

learn to master the putting down of those injunctures, which resemble a hangman's rope over the entire stricken nation. Do you understand these formulated concepts, dear ones?

The barrage of stricken resources is just the first among many catastrophes soon to surface. You will find yourselves amidst a turmoil so great, if you continue to proceed on your same old downtrodden path, that, if possible, you would barricade yourselves within your own home domain and stay there. And this, my comrades, is exactly what *they* of the regime, are providing the way for *you to do*. **There will be no force outside of yourselves, which can stop them from that point on!** These beautiful highly technical resources sweeping over the country at this point of nightmarish designs will only serve to stratosphy your circumstantial progress even further. In other words, dear ones, those of the hierarchy of circumstances of yours, which are in fact to be forced upon your geographical plane, will conjure itself up an epidemic of responses from the enlightened ones of your day, in order to redeem through process of mental telepathy freed up space for your minds to evolve. This in particular is the calculated response of those daring to evolve throughout eternity, and *you* have those equally responsive to the maintaining of current development strategies, to stop all progress.

Do you follow yourselves your own god-given instinct, or do you lead like sheep into the pastures of green to desert plains? That is your decision, little ones of the Canadian north, YOURS AND YOURS ALONE!

We are merely bystanders - at your service!

Canada is closely linked with the United States, and has been for a considerable amount of time. It was sought for at one time to average the american continent to espouse many of the natural peoples into cloning facilities. This was decided upon before the strongarm of british authority broke in. By the Americans, then, we say? Nay, not so. By, indeed, the resources of which were let into the country by the way of the manufacturing of personal grievances against the establishing of the american peoples.

Now, we have cloning. And what then do we mean? Is it said by us then, that the american nationalists had concurred among themselves to make a duplicate copy of the aboriginal peoples of North America? Nay, not a fact. It is so, to say, that the regrouping of one upon the other was in fact made so in a manner of speaking, and here we had the outcome of pacifist reservations - block after block, like duplicates of their own peoples. What tragedy! Morons we speak of, to do this. And likewise, those who force upon another nation mysterious ways of the european control, do in fact bring upon their own heads at one time or another the removing of status for themselves.

Canada has estranged itself within a wall of dexterior motivations. This purely means, that those who have at large Canada within their control, are functioning within the segment of

crucibles. Understand? The primary function of this capability of the north country, as we depict it, is to run for documentation within the historical texts in aberrating the fundamental rudiments of society into a larger more historectimal resource station for the whereabouts of genetical games. **This, dear ones, is simply the acclamation of the standard played upon the national board of governors, which by fact, are indeed your so-called elected leaders, who by *no* majority dictate to you the farce of their game strategy so laid out by those, who are *truly* at the front. YOUR GOVERNMENT OFFICIALS ARE MERELY THEIR PAWNS!!** So conjugate together then, and protect what might be left of your inheritance, for you have not many years left! Why is this material coming just now into your hearing range, ye ask? It is for the sole purpose of strategy of ourselves. No forewarning - no opposition!

ACT NOW!! YOU DO INDEED HAVE BUT LITTLE TIME LEFT. PUT ASIDE YOUR GAMES AND STRATEGIES FOR SURVIVAL PURPOSES, AND DO WHAT THE MIGHTY ONES BEFORE YOU HAVE DONE BEFORE! YE ONES INCLUDED DO INDEED FIND YOURSELVES WITHIN THE CLONING SOCIETAL STRUCTURE OF ELITIST REFORM! AND THERE WON'T BE DEATH CAMPS, BUT TO YOUR OWN DOMAIN WILL YE REMAIN, FOR TO TRY AND EVEN LEAVE YOUR HOME WITHOUT THEIR KNOWLEDGE WILL BECOME AN IMPOSSIBILITY FOR YE. Adieu.

WATCH, DEAR ONES, FOR THE ICING ON TOP OF THE CAKE - NAMELY THE POLAR CAPS, AS THEY COME SLOSHING DOWN UPON THE DUCKS' BACK. THE POLAR REGIONS ARE PERHAPS TO BECOME YOUR MOST FORMIDABLE ENEMY IN TERMS OF MANIFESTING CANTANKEROUS SORES UPON THE CONTOUR OF THE LAND. IN NO RESPECT WILL THEY SERVE TO FORMAT INTO LINEAGE THE GREAT CRACKS OF REDNESS SURFACING FROM THE PROTOPLASMIC AFFAIR OF THE REGIONOUS PLAINS OF THE PRAIRIES. THESE WILL SURFACE THEMSELVES IN MOST PECULIAR WAYS NOT THOUGHT OF BY EITHER SCIENTIST NOR ECOLOGIST OF YOUR DAY. FOR THE FURTHESTMOST REGIONS OF ASPIRING GREATNESS WILL TAKE THE TOLL UPON THE REST OF THE WORLD AS REGION AFTER REGION SHIFTS AND GREAT MAJOR

VOLCANIC ERUPTIONS CAUSE TO DISTURB THE TEXTURE OF THE FORMATION OF THE LAND BY RUNNING ITS GORGEOUS STREAMS OF LIQUID RED BLOOD THROUGHOUT THE DISTRICT OF EDMONTON NORTHWARD.

EARTHQUAKES OF PROPORTIONATE SIZE WILL SERVE TO ESPIONAGE THE REGIONS DOWNWARD, WHILST ALL OF THE FORMATIONS OF BRITISH COLUMBIA WILL LIE FAR BENEATH THE SEA, AS FIVE MILE WAVES MAINTAIN THEIR POSITIONING. GRUESOME, YE STATE! YEA, IT IS THAT. HORRIFIC! PAY ATTENTION! THIS COULD BE YOUR LAKESHORE DOMAIN UNDERNEATH THE PLACID EARTH!

WELCOME TO THE REIGN OF ATLANTIS, FOR IT WILL AGAIN SHOW ITS FACE OVER THE CONTOUR OF THAT ONCE FORGOTTEN LAND CRUST. AHOY SAILORS! FULL STERN AHEAD - TOWARD THE PRAIRIES! THIS IS NO JOKE, MY SMALL ONES, FOR THE SHIFTING IS AT ITS PEAK IN THIS ONE, AND IS INDEED ABOUT TO BEGIN - *ONLY SEVERAL YEARS DOWN THE ROAD.*

PREPARE YOUR FACE BEFORE THE WIND, AND ONLY TRIBAL EXPRESSION OF THE GODS WILL ALLOW YOU TO MEET YOUR FULL WORTH OF YOURSELF IN CONSCIOUS EXPRESSION. DON'T DELAY, COMRADES, FOR THE END OF THIS CONTINENT AS YOU KNOW IT WILL SOON BE COMPLETED!!

CHAPTER TEN

AND THE STARS SHINE FOR ALL!

DO NOT THINK FOR A GLORIFIED MOMENT THAT IN ORDER TO SACRIFICE THE MAINSTREAM CONCEPTS WILL BRING YOU CLOSER TO OUR ARRIVAL. **NAY!** IN FACT MANY WILL MISS OUR ARRIVAL, FOR IN MANY WAYS YE ONES ARE IN A PAGAN SOCIETY WHO STILL BELIEVE IN TRAINS INSTEAD OF PLANES, AS THE ONLY DELIVERANCE OFFERED. WATCH FOR SIGNS IN THE SKIES. WATCH FOR OUR "PLANES," AS YOU WOULD CALL THEM. WE HOLD ENOUGH SPACE TO EVACUATE THE WHOLE OF THE REMAINING SOCIETIES OF THE WORLD.

DO NOT BE DECEIVED! FOR AS YE PARTAKE OF MY FLESH AND BLOOD SO WILL YOU MISS THE HEAVENLY SOURCES, FOR TO BELIEVE A FALSEHOOD CONCERNING ME WILL ONLY SERVE TO LEAD YOU ON DOWN TO ABJECT DELIVERANCE STATUS.

IN OTHER WORDS, BELOVED, IT IS YOU WHO ARE IN ERROR AND HAVE ALWAYS BEEN! IT IS YOU, AND YOU ALONE, WHO THREW THE WISDOM IN THE DUST AND TRAMPLED IT DOWN INTO WALKING SPACE. IT IS AND ALWAYS HAS BEEN THE SPIRIT OF YE WHO COME TO ME IN BLINDFOLDS, AND SUBJECT ALL OTHERS IN THEIR UNLIMITED CONCEPTS INTO A DELUGE OF FIRE. **IT IS YOU WHO CRUCIFIED ME AT MY OWN WILL, BUT NAUGHT IN THE LEAST ON BEHALF OF YOUR SINS!** NAY, HAVE YE NOT LEARNED YET, COMRADES, THE INTRICATE LAWS OF UNIVERSAL STATURE - LAWS FORMED FOR THE PROGRESS FOR ALL MEN ALIKE? OBVIOUSLY NOT!

I CAME TO GIVE YOU LIFE - NOT TO SACRIFICE MINE SO THAT YE MIGHT LIVE! WHOSE WORDS, COMRADES, ARE THOSE? LOOK WITHIN YOURSELVES! FOR MANY ARE OF THE STRUCTURE OF THOSE DAYS PERSONIFIED! I HAVE GIVEN TO THE WORLD WISDOM, AND IT HAS BEEN CRUSHED OR HIDDEN FROM YOUR VIEW. WHO TOLD YE THESE LIES, THEN? LOOK WITHIN YOUR OWN FACTIONS! ARE *THEY* THE TRUTHBEARERS OF THE AGES? I CAN TELL YE **THEY ARE NOT!** WITHIN YOUR OWN MINDS YE ONES HAVE DUPLICATED THE FORMAT OF ALL THOSE BEFORE YE, ONLY TO PRESENT TO ANOTHER THE STRYCHNINE APPLICATION OF DUPLICATE FORMS OF SELF-REPRISAL. SHAME! FOR YOU SHOULD BE WITH THE SICKNESS WITHIN FOR YOUR DUTIES TOWARD OTHERS! **NO WORDS BUT YOUR OWN!** DISGRACEFUL! SHAME!

YOU SERVE NOT ME, FOR I AM WITHOUT BLEMISH! YOU SERVE NOT ME - FOR I DIE FOR THE SINS OF NO MAN!

DO YOU EXPECT ME IN THE LEAST TO COUNTER THE VERY LAWS, OF WHICH I PERFORM? DO YOU EXPECT ME TO SURRENDER MY SOUL STATUS FOR THE LIKES OF THE DECEIVERS OF THE PLANET, WHO, EVEN TO THIS DAY, CAN NOT GET ONE LITTLE IOTA OF MY SPEAKING OF AGES PAST CORRECT? **YET YOU PROFESS TO WORSHIP AND ADORE ME, WHEN I TAUGHT YOU TO WORSHIP NO MAN!**

YET YOU RECOGNIZE **ME** AS GOD, AND I AM! BUT DO YOU NOT REMEMBER THAT I TAUGHT YOU, SO MANY AGES AGO, THAT EACH OF YE WOULD ONE DAY ATTAIN YOUR GODHOOD? AND STILL YOU SHOUT "BLASPHEMY IN THE NAME OF THE LORD JESUS!"

HOW DARE YE USE MY NAME LIKE IT WAS A MERE DUNG IN THE MIDST OF A PIG HEAP!?!?

I WOULD IN NO WISE SET MYSELF AGAINST THE PERFECT LAWS OF MY FATHER.

NEITHER WOULD I RIDICULE THOSE WHO FOLLOW MY PATH TO PERFECTION, FOR ONLY THOSE WHO GO FORTH AS I HAVE DONE WILL SUCCEED IN ATTAINING PERFECTION AS OUR FATHER HAS DONE. HE IS THE ONE WHO MADE THE HEAVENS AND THE EARTH! HE IS THE ONE WHO IS ALSO SUBJECT TO THE CREATION OF WHICH HE HAS PERFECTED.

THEREFORE, IF THE FATHER GOD OF ALL GODS IS PERFECTED IN HIS WAYS, THEN SHOULD WE NOT TOO PERFECT OURSELVES IN HIS IMAGE?

AFTER ALL, ARE WE NOT INDEED BUT MERE FRAGMENTS OF CREATION, BUILT IN HIS IMAGE? NATURALLY!

I HAVE IN NO WISE TAUGHT OF YOUR WISE MEN THE TRUTHS YE ONES HAVE BUILT AROUND YOURSELVES LIKE A STRONGHOLD!

I TOLD YOU TO WORSHIP IN SPIRIT AND IN TRUTH, ACCORDING TO THE TRUTH I TRIED TO TEACH YE. BUT LOOK AT YE, YE WHOREMONGERING SNAKES! HAVE YOU LEARNED? DOES THE TRUTH OF THE UNIVERSE FOLLOW YOU AND UNFOLD AT YOUR FEET? YOU WOULD PASS IT BY BEFORE RECOGNITION CAME! I COME BACK SOON! DO NOT DESPAIR! WATCH FOR ME, NOT ON THE PLAINS, NOR IN YOUR MOUNTAIN TOPS, NEITHER LOOK FOR ME IN THE SEAS, ***BUT IN THE SKIES!***

I HAVE TOLD YOU BEFORE, I COME WITH THE HOSTS OF HEAVEN, YOUR BROTHERS AND SISTERS FROM THE HIGH PLACES - FROM THE STARS! THE MULTITUDE WILL BE UNCOUNTABLE, FOR WE COME WITH ENOUGH SHIPS FOR TO PROVIDE ESCAPE FOR ALL THOSE WHO HEED MY WORDS. THESE WRITINGS, WHICH YE ONES SO STILL SHUN, WILL INDEED PROVE TO BE YOUR OWN UNDOING.

LOOK UP, FOR YOUR "REDEMPTION," AS YOU SO LIKE TO PUT IT, IS INDEED NEAR, AS CLOSE AS YOUR HAND IS TO YOUR FACE. SIT NOT IDLE ON YOUR PLOT, FOR MUCH IS TO BE ACCOMPLISHED FOR THE BENEFIT OF YOUR OWN STATUS AND GROWTH OF EVOLUTIONARY PROGRESS.

OH! DO THESE WORDS HURT YOUR SENSITIVE EARS? IT WOULD BE BETTER FOR YOU TO CUT OFF YOUR EAR THAN TO LISTEN TO FALSEHOOD AND MISS THE BOAT! COME TO ME OF WHOM YE HAVE HEARD FOR MANY CENTURIES, COME TO ME ALL YE WHO ARE WEARY AND HEAVY LADEN, AND SACRIFICE MY WORDS NOT FOR THE ESTABLISHMENT OF NETWORKING PROGRAMS DIPPED IN RELIGIOUS FERVOUR, AND I WILL GLADLY BRING YE ONTO MY SHIP FOR THE FREEING OF YOUR BODILY ATTIRE FROM THE HORRORS OF THAT, WHICH IS YET TO COME!!

CHAPTER ELEVEN

THE CRUCIAL POINT

Korthrox signing back in for a wind-up of canadian affairs, little one of Sananda's regime. It is for the sole purpose of resuming the program of Canada's demise, that we have stricken from the record at this time the climax or outcome of national affairs. Nonetheless, productivity this late in the game, so to speak, is a forthright national crime toward the personages inhabiting this plane.

Continental Canada is supplemented by a force so evil as to extract one by one as teeth from your once comfortable place of survival!

Let us complete this section then without further adieu. Placement of survival techniques are shown to be the non-placid content of the people in general. **And unless more stringent methods are devised to supplant those arrogant countenances into a more distant region, the fall of Canada will be completed into a wasteland affair within the next three years.**

Take heed of, both, our words and those of the most esteemed Master and beloved comrade of the White Lighted Brotherhood - Master Teacher of the earthen plane - Lord SANANDA JMMANUEL ESU.

CHAPTER TWELVE

A COMPLEX AFFAIR

Saturday, 18th March 1995

9:00 am

Good morning, Uthrania Seila. This is Jambian coming in at the helm this morning. It will be within a goodly attempt on the portion of we ones, to bring to order all those conspicuous drawing plans of future generations of which, of course, will not ever see the light of day inasfar as quality earthen third plateau time lots go. In order that we suffuse *that* great tendrum from the source of all inequity, many changes affecting the positron beams, which so detrimentally affect the personages of the patrons bearing arms upon your dying planet, will herewith be affixed with the barium sound waves, which will allude to the heightening of even *their* poor conscious delirium.

With this remark then as an afterthought of many of your Earth months, I will now gladly refrain from further exposure of their plight and hand you over to our dear Commander of the Stars, Korthrox. Adieu and good night. JAMBIAN out.

At promptly nine thirty we will begin. Please set yourself within that time structure, Starseed.

NINE THIRTY BEGUN

9:30 am

Well, since all formal introductions have thenceforth already been made, let me thank you again for your long awaited participation and begin as selected. Our first title of the day contains a parisian element, which exceeds even the finest element of today's rigorous diphtama. In other words, it will be proven to be among the most auspicious content ever voiced from the realms of the netherworld into your realms.

Here we begin then with the title structure of Chapter Thirteen. Please put in sequential order when restructuring begins, Seila. "The Downtrodden Element of Boris Klein." This you will find to contain a rather short expose of delirium turned rational within the equipal design of epoch theory. Sigmund Freud was indeed no exception to this rule, but on the final making it was he who did sculpt that most articulate ruling, which by fact did articulate that complimentary data pertaining to the accumulation of brain wave factors and their complimentary side effects, which by fact were seemingly "out to lunch" - and they were. New paragraph please.

CHAPTER THIRTEEN

THE DOWNTRODDEN ELEMENT OF BORIS KLEIN

To begin with then, we would simply like to mention that the gravity of that long lost situation would indeed imply, that not all astrocytes of composition would likewise merit the dutiful functioning in auspices around the world. Likewise, it would also be important to note that Sigmund Freud himself did not even believe half of his own dichotomized notes, and did attribute even to those of his writings to be based on a placid falsehood. Now let us recount to those of you, whose interest is piqued, the wonderful but sad account of the story of a Mr. Boris Klein. New paragraph please, Seila.

Master Boris C. J. Klein had forfeited an appendix of routine obituaries, which had just so often surfaced within his diptherium bank. What we mean to say here, in order to detach this portion from more fundamental attire of fifth dimensional vocabulary, is, that every so often Mr. Klein had participated in the accumulation of rather humdrum but nonetheless particular dogma in relation to those of more clandestine attributes or efforts on behalf of those morgue bound containers full of rather ineffective carcasses. That, of course, is all that remains of those, who so aptly pass into the dark to lightened realms of other dimensions.

With this in mind then let us attribute a status of implicable dementia toward this one of much smaller faith than the normal mediocre hunchback of the Notre Dame Express. Senior Boris then did fall prey and into the hands of an underling of Senior Freud, at which time *did* unto his utmost display a rather indestructible but cautious appliance to dutifully attach into the depths of Mr. Boris's brain wave effuse.

You must realize here, that unlike most of his kind, Mr. Siegmund Freud did occasionally display a sincere contempt for conventional science, particularly in the field of medical science, and did strive to order the medical universe into compliance within what *he* believed to be the contention of the day - the **"mode of relays performed through brain functions in order to generally alleviate the crime wave of passion."**

In order to exploit all these neurons within the brain waves system, Freud needed at the time to find a way to make subservient those fragmented particles, which so aptly reconstruct themselves within even more fragmented particles, which we know in their abstract fashion as being the hieroglyphics of all academics of neuro science, those stringent helix compounds and all their qualities would necessarily be meted into one complex within a complete working feature of programming versus networking: In other words, dear Mr. Freud coupled Mr. Boris's cranium with a dichotomy of cantankerous modes of electrode components in order to bring about a reversal of awareness, which, in his eyes, would serve to express to the general league of practitioners, that hooking one man's brain up to electronic currents would certainly serve in

altering the makeup of all participating neurons, and would then serve to facilitate those elements of doubt as to whether or not this more acute method would work, even insofar as the animal kingdom was concerned for further research, if found applicable and necessary.

Here was another form of Blinkensop introduced from the far reaches of one man's conceived apparitional study upon another human being. Ghastly, to be sure, **but in these last days, however, all that which has been recorded must be re-recorded in order that all records be kept straight.**

As for Mr. Boris Klein, he well survived the experimental feat upon his surfacing structure (cranium) and did live long enough to remain the "guinea pig of the century" insofar as his dementia goes. He continued to labour hard and long after his rather crude attempt at restructuring and reprogramming his brain wave faculties, and from that day forward attributed to the everyday reminder to Mr. Freud, that the scar which he bore on top of the head was never to remain or contain that element of what a man truly must be - to have soul, spirit and acumen. Mr. Freud did however, the brave soul, come gradually with our help into his senses, and did in fact retract much of what he had done and believed upon his very death bed!

Thank you for your contribution in the typing field, Uthrania. Sign off now and Adieu. Commander in Chief - KORTHROX.

CHAPTER FOURTEEN

Friday, 24th March 1995

10:15 pm

Good Evening, and thank you again for presuming your station with us. This is Korthrox signing in on frequency at this time on Ablarium Station 4.0 Premex. Let us promptly begin with our critique of the substation Urex, located specifically beyond the galaxy perimeters of the structure of Ethom Solar Plex facilities for the radiating factors due to the self-structure of the Photon Belt and all its capabilities. Attuned to the grading structure of plutonium-based metals, they have equipped themselves within the structured surface of neutralized equivalent of semi-steel, which in itself is accorded the sound projection of subterranean tetron, which, when applied accordingly, will precipitate the solid foundational equivalent of multi-plex beams, which sound off the formation of one of the most high frequency of dutonian resources ever alluded to man.

Now for a title of chapter for this one, Seila. We will simply call it "Excaliber and its Retroactive Compliant Sources." Please enter equivocally. Thank you. Jambian at the helm will now be pleased to reform his abject thinking qualities for further resource study on this fomented subject. KORTHROX, commanding the Fleet of Saterius on Kumount. Out.

EXCALIBER AND ITS RETROACTIVE COMPLIANT SOURCES

Seila, this is Jambian at your service. Thank the "stars" for the dictational process, which by way of reminder is directed within your cranium by way of our indirect position of our ships so stationed about your orbital interest. Let us please proceed on, for the hour is late.

The new counterpart of the astrophysics lab is mounted upon a rather stationary piece of equipment, which is held by the most part in a immoveable artrex. Well, nonetheless it is modified by most men's standards and is capable of handling the most intricate sub-appliance structures, which in themselves need the modification of the masses in order to resurface the artifact so rarely used by the small factions of the populace in order to direct their surrender. In loosely thought of terms we simply state here, that these rendering of useless activity have all but drained the wasteland of the intellectual and form thereby the basis and strategic deployment of caricature, simply by submitting into the general regions of cranium development the perfect synchronization of positive interruptions so very underdetected by the simple man on the street.

And just how does this merriment work then? Well, we can shield our forces in the far off sky of yours simply by refraining from any direct placebo of the undetected artifact, but on the other hand those poor inhabitants, who deem themselves free on the plane of never-never land, do once in a while force themselves within their mundane lives to contradict their own brain forces in an effort to make some segment of sense out of their ever curtailing predicament of forcing eye contact with the forces of the glaring sun.

You must understand, dear ones, it is not simply the force of the sun's heat rays which you must withgo, but rather the strictest form of espionage that mankind must now witness, without gathering the eggs from the nest. In other words, listen now to the rantings of governmental officials who state:

"Listen to us how we make such minor adjustments into the atmospheric plane of survival. These will take us into minions of galactic air space time in the future, for whose bomb will dare to blow these beauties out of the aerodrome of the future, when mankind's very future depends on it? Not Russia, certainly not Palestine, nor Egypt, nor Montreal in Quebec, no, not even the European, nor Asiatic countries. Why? Because in one way or another all Heads of States of

these archaic countries are somewhat involved. Whether they are all aware of that or not is insignificant, as well as providing for them the direct means of plugging themselves into the wall of time for a better look at their own future."

Intercepted perfectly at will, we would deem. Thank you and good night, Seila. JAMBIAN signing out after readjusting frequency 5.7. Got to keep them hopping then, have we not? Adieu. Please record time as been 10:43 pm.

CHAPTER FIFTEEN - A NEW CHAPTER ALTOGETHER

AN EXPLANATION

Tuesday, 28th March 1995

4:31 pm

Good afternoon on this most glorious day, dear ones. This is Korthrox performing duty by way of an eclipsal effort on behalf of all Brethrenhood "troops" on duty assignment beyond the regular call of duty. Now on with the informational packaging of the Seira Structure, which is now proven to be of paramount structure ability in coercion within the texidrome of aspiring monks, so to speak. In order that we of the Hierarchy of National Works do exponentiate upon the detriment of untidy equiptal nuances, we simply wish at this time to rather elaborate upon the semitics of orthodox equality. So now let us rather promptly begin this new series of ethadome and diplomatic works. Sela.

The marxist government has long had under its control the apex of *our* national dilemma. This being concurrent within the royal structure of abbreviated subjects yet to be refrained from by the Brethrenhood of the Most High, we have elected to state from time to time since time past immemorial, that **the pure and untarnished epitome of disrespect paid our most highly regarded comrades in arms is one of simple placid and rapid DISREGARD FOR TRUTH in general.** So be it.

Subject title heading will now state for further consignment to be thusly stated: "Juniper Heading Home for Relapse Time to Pass Photon Barriers." Please proceed, Seila.

JUNIPER HEADING HOME FOR RELAPSE TIME TO PASS PHOTON BARRIERS

Rather inequitable title, don't you think? Well, down to subject matter intensely structured within the equilibrium of the undaunted faction of Brotherhood members upon your planet.

Cajoling the public into believing, that the whole of the mainframe authority is to be deemed artificial in its concise attempt to portray unto you the personages of planet Earth makes one only conclude, that in order to function as with bread and meat upon those strovenly authenticated tables of warfare, one need only to be previously blessed with a portion of habit bearing epitomes such as the concise wavering of all ethical and moronic attributes ever known to mankind.

Now that we have you all thoroughly confused, we wish to turn the matter over to Jambian, who will at long last proceed to try to influence those of you, who still disbelieve our resources and tactics and are forever and continually subservient to the widespread system of injustices among your own people, and who therefore continue to harbour an even greater dislike for the workings of truth in all its godly essence. Jambian please proceed.

Good afternoon. Jambian taking the helm on this one, little ones. Today it would seem to be in proper order to self-equip ourselves, as well as some of you as well, with the cloak of conscious endeavour for fear any one of us should fall off the precipice. The **Jackson Tribunal** resorts to rather unequivocal attitudes, wherein only those of ye, who do in the rapid understanding processes of your minds would dwell on and allude to the complete answer circumspect to what exactly you have found out to be the complete truth. Here we will now jumble into strictly saner language for those of you, who are unable to actually read the facts, which, by the way, were for others of a more preambing nature.

The Concord of the Fleet within Jexton aptitudes is concisely more melodramatic in its releasing the tectonic pressure, which has been for some time accumulating in the northwest portion of the Appalachian Belt due south of Indianapolis. There is a belt of ridges built up in such a way, that over the last ten hundred and fifty years has received little acclamation save for the few procuring efforts by those dear beings, so far still "down under."

Evacuation has her merits, dear ones, and it would seem pure sense to embrace those techniques, which all embodiment of nature adheres to, such as the episode, which did occur on the platform of Atlantis, Mu and the sanctification of that far off remaining desert region, which surrounds the Euphrates River Creek Dam.

Well, we are subject to home refuelling too, you must understand, and to continue on with so few years left for public exposure of our craft here and there has left us rather usurped within the nature of refilling our energizing agents completely. After all, we are aboard what you would accordingly pronounce as the "mother ship" of them all, and at times that is indeed our dutiful

bounty, as we subjectedly supply the rest of our dingers with helium oxide, which does indeed coincide with adjusting our frequency barriers to match them, which would in effect be subjected to transmit their lower beam melodramatics within only the surface structure of all known galaxy craft maneuvering tectonics.

Abbreviated effort to be sure, but in the long run then it is only at this short space in your historical time element, that we have accordingly tried to feign the neurological intent to time travel alone with the current, thereby regaining our status completely by the time the 2000th year runs by. It is definitely our wish as well as pleasure to introduce ourselves into your community, when we regain control of our situation back within your atmosphere. This is the real reason we have alighted many times before upon your people's planet, and for this same reason alone will we be back.

YOU NEED ALL THE HELP YOU CAN GET! And we are at the ready and waiting with even more "ships" of that espionage effort, as your Government would love to term it, that would just barely stretch enough guidelines through to those, who would indeed welcome our departure after the fact (exposure of mankind to the Earth's crust) as it fires and cools its ammunition from the far undercurrents of the world and from above, where its massive tidal affairs condemn the finest creation this world has ever known. How mankind has failed this one!!

Sadly enough though, it has its strategic points of contact, and we say "sadly" simply because it is indeed not the majority of ruthless endeavours, which will in the final end board our majestic ships. **Only "those" of a quality, which in its factitious element do still believe in the Brotherhood of the Lambs, which be you, dear ones of ours. Though it will serve as a plus indeed to know that unto the greatest to the least there will manufacture those also of an element of peacekeeping ones, who are *not* "out to lunch," so to speak. They also will be given opportunity to express the rest of their lives in the living memorandum of time aboard the fifth dimensional earthen plateau of the 21st century AD.**

Centurion galactic craft out on frequency network galactic zero seven stret. Over and out. JAMBIAN. Please record time as specific 5:15 pm.

CHAPTER SIXTEEN

A PIECE OF THE ACTION WITHIN THE THINKTANK'S PERIMETERS!

Wednesday, 5th April 1995

12:23 pm

Good day to ye all, Seila Uthrania. This is to be one of the most pleasant of experiences to which I have been occasioned to dwell upon thus far. In its exposition I have named the qualities to which are relied the most intricate form and cause of mediocre acquaintances amongst your most renowned scientists to date.

Let us now begin with the subject matter at hand, which is peculiarly to retain the complete essence of Neutro-Astrophysics and the curricular of radius time/matter equivalent to that long sought-after recitume of non-essence of particular matter particle beams. For those of you who now know and understand the application of the forcefield of neutro-physics, you will be calmly intrigued to find out exactly how the nuclear facing actually lies outside of the firm self-imposed structure of astrophysics with the concurrent tie-down superimposed upon itself due to the forcing of neutralized waves, which, due to the planetary structure of unforeseen items, find themselves placed at a latitude of due south/north-east within the qualms of self-discovery at best. Now, through with the hieroglyphic sectionary opening statements.

We will proceed more or less within your own linguistic frequencies. Place this one, please, Seila, "At a More Accumulated Data Frequency." Subtitle complete. ANDROMEDA REX signing over and out.

AT A MORE ACCUMULATED DATA FREQUENCY

Within the design implementated subject material there arises a need for the restructuring of nonessence subject formations. In other words, dear ones of the scientific community, you have all but bigoted yourselves within the dexterior quality of never having enough input, and thus subjecting yourselves to rather diverse subject matter, which only has held and does continue to hold you reprobate amongst the greater authorities of the science. True, you have indeed come far among your species, but only as long as you were programmed to believe, that for as long as *you* kept to the physics quantum provided to you, that your hopes of achieving great doctrines of "new" evidence to the whereabouts of climatized change would serve you ones to rule yourselves into complete extinction. The surface graves of those, whom you face yourselves against, will again resurface to construct the epitome of behavioral apathy on your behalf.

So now listen carefully to these instructions, for they may just well be the final clue to the conquering of all mankind's victimization of the south-eastern troops, which, by the way, lend themselves to distraction on the plummeting of ye ones into the far away wash-waters of the Amazon desert flood areas. Strickenly confused then? Well, here we go on to well proceed with the "Clue as Given." KORTHROX Commanding Fleet 71 at this time. Salu!

CLUE AS GIVEN

It is a well known fact that there are those of you who simply deplore a routine of adjuncture formulas. Am I right? So far it has continually been brought to our attention, that those of you who reign beyond the pretenses of controlled and conscientious behavioral patterns are due for a real breakthrough. So as the nut goes back within its shell, so do the plumes fall, never-ending from the plumage of the master bird of prey. Conscientious behaviour, then, is all that is needed at this time in order to further the expansion of this material within the equilibrium of your cranium cell placebo.

In other words, **listen with open mind, for all that I am about to display in, both, pictorial form as well as conscientious endeavour, is well sought out by others of your race in the hopes that a further endeavour to francensence (franchise) the ability to retrieve *that* which ye all possess will serve to heighten the authenticity of renewal within the formulated doubtanks of your spectrum.**

THE ROUNDABOUT WAY OF *NOT* DOING THINGS! HAPPENSTANCE AT ITS BEST

Now, picture a diagram of a flagship, so to speak, with a hemogram planted within its enginitic structure. Now, here we must make perfectly clear those calculations of yours, of which the last time did in fact take precedence throughout the uniform structure of theorograms of the galaxy intertwined at best, don't you think? Arrive at the simplistic formula for the Deutschum episode of conquering forces, and you will have met the real source of your needs.

Now, of course, back to the regime we have so set up for ourselves, comrades. As I was saying, picture now that formula to which the satire of the Deutschum did in fact manufacture those perpendicular appitoare, of which were consistent in structural apparatus with those of Russian endeavours. See the connection, comrades? On the ball here, league! Let us then *begin* at the beginning.

SPACE PRODIGY TWELVE

The intricate design of the Matrix 12 holograph does indeed reflect the source of *that* of which we now speak to those of you who are listening. You must understand, though it would seem that we beat around the bush, so to speak, it is simply for the cause to lose those beings, who have not ingrained within themselves the dexterity to remain informed enough through all these proceedings. Injuncture at best is all that we have ever wanted or ever tried to pass along to you, for all the clues are indeed within your fingertips aura, but in order to justify those with prominent clauses of despair that, which formulas we pass onto you, are not of the most prominent display - would be surefire to only tell you that *you* have only bombarded the display board of all our finest and most worthy shrouds of implicating the Trecit Board on the dash to a more subservient displacement of the more congenial structures of navigatality.

Rest now, Seila. We will continue in the near future. Salu. This is entity GRIFFIN characterized on on/off wave telesupport system Boucher 12.4. Over and out. Display off 1:05 pm.

CHAPTER SEVENTEEN

Monday, 24th April 1995

3:02 pm

Greetings, Uthrania Seila. I, Adonai, will be depicting dialogue unto the book resource this morning. Let us promptly begin with new chapter heading "The Criteria of the Forces - The Down Troops."

THE CRITERIA OF THE FORCES: THE DOWN TROOPS

To begin with then, let us firstly surmise that all stationary equipment is sort of rallying around the northern side slope of the Jupiter continent. In actual fact, deployment of caricatures of grievances are not so much the norm here on Equidus Seven, which is faced with an actual amount of farsightedness on the part of the engraver of the tombstones, which surround the graven laboratory of the neophyted. The neophytes are solely a strain of conjuring magicians of a type, who art naught suffused with a non-surmountable part of strife within their ranks. In perfunct linguistics then, all we are saying is that the number of ill bodied forms in the context of oft assumed names do dwell within the source structure of the earthen plateau itself.

Now, let's clip on this story: Allegations have been made to the effect that not all limitations are of a magical nature, but rather are performed in sequence within a mode of transportational devices, which are nevertheless difficult to read for any soul. You must understand, dear friends, that **not all who call themselves of the High Magick are most certainly of the highest calibre of our essence, just as rarely though is the same meted out to those, who among your ranks of the auspicious of your "New Age" epic, have condemned themselves to trifling within the sanctions of New Age reality. In fact, there are those who will surely "miss the boat" for their grave neglect upon the shoulders of their own brethernhood, who stand right before them with hands outstretched and nigh a penny secured within the palm. THANKFULNESS IS INDEED A GRAVE ERROR IF SPOKEN ONLY FROM THE LIPS AND NEVER SEQUESTERED WITHIN THE TOMB OF THE HEART!**

Nay, it is naught now nor ever shall be, that the feathered flock of the conquistador section of Uranius would delve to match up to the grievances portrayed through the consciences of mankind alone. It is the liberty then, which will surely reign in all your dealings. And if this lesson hath not been learned as of yet, then surely the time will come to pass, in which the context of each of your journeyings will suffice to change. This is only a matter of wisdom on the part of the overlayers or overbearers, those dickson souls which have arrived with full knowledge of what, where, when, and how circumstantial favour occurs, **and to who**, and yet do nothing with their so-called information!

Dirty game to be played out - at least in part, don't you think? Lean this to your consciences and integrity as a sum token of worthiness, and do never allude to (claim) that ye ones of the echelon types with that far reaching movement of conquistadors of New Age momentum would never find yourselves in the disparaging mode of neglect toward one another! **Find your brother a coat if he so desires, and shackle him not to your waistline of conceptual thinking without ensuring firstly, that he has been supplemented with enough bread within his stomach features!**

If you can only *begin* to do this, then, beloved ones, then indeed ye will find yourselves on your way to the tomorrowness of understanding within all its simplistic rulings. Category one then explains the necessary requirement, of which eludes the many of ye for most time to unlimited time. Naught too good of a record, to be sure! After all, is this not contected as a misdemeanour, this most simple of charitable acts toward the brotherhood?

Conclusion: This is indeed child's play, and ye ones naught should have to be reminded of your duty in fairness toward even the least of your fellow creatures, **for ALL ARE MADE IN YOUR LIKENESS, ARE THEY NOT? Well then, disposition yourselves to grow, and applicate fuller understanding on their behalf! And just remember, the tide can as surely turn toward the befitting of your soul's ongoing journey at an even greater length, can it**

not, toward your own behalf?

Sacrifice naught that, which ye indeed bear toward another, for all should be given as a free token of expression of your heart intact. If ye cannot in all conscience do of these things, then perchance the mood may not arise to witness the end for this particular era coming in a big cloud of glory. You understand?

Well, time to indeed shelve this one final act of the play. Squander not your time and play areas, to be sure, but beholden the troubled aspect of bothe, that of your fellow man as well as that of your own soul's conscious endeavour! Remember, this is a one way trip for the each of ye - do naught take for yourselves one step up and ten steps hence toward the compound!

Not a one of you are that far away from "purgatory," as some deem to call it. So take time for close and careful examination of that, which ye ones so seem to hold as secret within the so-called secret compounds of your cryptic nature!

ADONAI over and out, Seila. Thank you for your attention. 3:34 pm.

CHAPTER EIGHTEEN

CAPTAIN GRAVES SPEAKS LOUD AND CLEAR!

Tuesday, 2nd May 1995

11:50 am

Good morning, Seila. This is indeed a bright and glorious day, don't you think? However, down to the topic at hand.

In justification of the concise instrumental devices implemented at the quadrant of Pacific Twelve, we have waylaid a neutral source of dialithium compound in order to rectify the problematic schematics of design for your naval explorational team, working this time in the primal dispositions of the Atlantic quadrant south of the Pacifica Rim.

Northwest of San Francisco there lies a dwelling of seventeen architects, who in fact of the matter alley themselves within the profound concise instrumentation of the southern plateau of the Andes. I will gladly explain in a more elemental manner as to what this is truly all about. New paragraph please, Seila. This is an introductory message by Lieutenant Commander

Jasmain of Arthus Four of the quadrant Nufus Seventeen.

Begin with this passage from the Waves Type Magazine employed by the nuclear scientists in Afghanistan, please:

"Surf typification contrary to the merits of the auspicious design craft, of which we allude in part thereof as being tied into, have forsaken the diplomontary forum of their most significant experimental station due to calamities, far by breadth out of their control. All banned frequencies are to be alleviated by consensus of the board by reducing the elimination of surf board type retinue through a specific dwelling process, of which only I myself, as well as the partakers of the Naval Experimental Base Foxlum, have contributed to the devices long sought after by another race far different in stature and conscience than ours.

"At the present time it is this misfit of societal structure, which places the most dire means of controversy within the collaborating board of the high ranking officials in Poland, Greece, as well as the Netherlands. This experiment will eventually prove to be its own benefactor, in essence that it carries with it the sole blueprint of a Naval warfare far beyond any that wish to participate for the ongoing regimentation as well as security of our planet. All contrivances to date tell of the epic story of Earth dwellers, who in stark naked truth we have found to be more of a threat to society at large than any conquering forces yet to be found upon our planet." (End quote).

This is Captain Graves of the Scientific Laboratory in consensus with the Artillery manned Nufus Quadrant at Helium. Out on frequency 4.7. Thank you for your display of data, Earth tower.

Well, as it is written so shall it always be known, that there are in fact those idioms of nonsensical data, which only preclude to their own demerits those of most sincere consequences. To conclude then, we mean to relay to our readers exactly what this meaningful talk is all about. Frankly speaking, and here we do not mean to be condescending in the least, but we must by matter of factual scope perform within the best of our tolerated ability to be as concise and eloquently comprehensible as possible.

New paragraph, please. Heading factioned off as "Neutros Combining Statutory Requirement Aboard All Naval Warfare Craft DELETED!"

NEUTROS COMBINING STATUTORY REQUIREMENT ABOARD ALL NAVAL WARFARE

CRAFT DELETED!

There is to be encountered a grave spectrus of absences from your Naval data headquarters for the simple reason, that most are to be integrated within the Desert Storm equivalent of nuclear disaster. So far it has been recorded that 120 have been eliminated for the purpose of designing an underground hover-type craft, which merits in itself the consequence of abruptly altering the Dyma Waves from beneath the Black Sea range, in order to carve out the auspicious design of bountiful booty for excavation process. This rigging has netted a growth expansion of 120 plies of hardboard tied to the tanks of more auspicious seafaring underwater craft, but has been bounded with osteophyte compound, or at least the equivalent of it, in order to neutralize the loose ends of the helium process project. It is a most complicated and roundabout way to exploration process we have ever seen, but nonetheless, it just may prove to be the most heinous subtraction equivalent of neurosis in subjecting the Tacteon Barrier to sub-tidal influence of the moon's radius within its composure.

Aligned within the sub-texture of noriety they have concluded to the effect, that if this experiment should well work, it would indeed employ those sailors and military men to warrant an arrest of all substances, in order that they might share with the rest of their Texaco supplies. In order that the meaningful display of upshond apparites are to occur within the given period of surmountable odds, the public view of the West Bank will be neatly kept from all public view. Substandard rations will be the equivalent of all the destroying preliminary consensus banks of the echelon, who, in their manufacturing up of new solutions for their greedy profit dearth to strike the banks at their disposal.

Regarding the nuclear devices so implanted within the Earth's crust at this time, well, that is indeed another interesting topic for discovery pultenary.

Griffith out for disclosure time, namely 12:31 pm eastern your time, thank you. This has been recorded concisely at a time clock apart from yours. Thank you, Seila. Find, if you can, correct spellings for these hieroglyphics of cantankerous natures within the spectrum of your perimeters. Remember in all adjustment not in the least to interfere within the meaningful scope of dictational process. Good afternoon. Signing out. JUXTON, on regular frequency structure. Signature Orpheus. (12:20 pm).

A LONG FORGOTTEN TRUTH

Saturday, 10th June 1995

5:14 pm

A goodly afternoon to ye ones all today, Seila. It is so good to be back to close up what we would surmise as the epic of constructive epitaph!

This is Lord Commander Juxton reporting from the helm of the most elaborate starship put out by the fleet of venatical design thus far. Please proceed with next verse title, which will summarily conclude this production of "Hidden Truths are Valuable to All," please.

"The Genuine Secret" will be portrayed as the least vernacular of the streamlined affairs ever hidden from mankind by the popular elitist manufacturing houses of publicationary works. Enter please promptly and I will be most grateful to turn you over to Commander Setuth for preliminary hearing on this. Juxton over and out on frequency 54.8. Transmission ended.

THE GENUINE SECRET

Greetings and commendations to all, Seila. May I now formally address myself unto your affairs. I am known well throughout the Fourth Quadrant as Suffeur Setuth, the Commander for the Range Plate of Planetary Exploration. Now let us please begin.

For our fourth and final epilogue, let me firstly explain to all those, who read between the text of our book, that nothing in effect will have proven to be of more liability than that of the Suffex Ranch Farms held about the northern portion of what I believe you would deem as the continent or fraction of England itself.

You see, here it would occur to few of the regiment of planetary reform, the condolences paid to the tribute of our, or rather, *your cows!* If you only would stop to think and/or ponder for a moment in time of just how on Earth cows are so drained of blood and seismic activity permeating among the rest of the herd, of which, of course, you have little knowledge, then you would see fit to really harbour no malicious inharmony toward the intent of the vascular system of your beast inasfar as others from other constellations have allowed. This is it, or our point exactly.

You must take into consideration, that **as an outfit of primates at the helm on the taking over of your planet Earth, it is indeed none other than yourselves, or rather the henchmen of the tyrants which overlord your planet, who so engage themselves betwixt the thighs of your beasts!** Look for a sign in the heavens, when these events do take place. Fix your portals upon them for a good close up snapshot **AND REDEEM THOSE OF OUR**

BRETHRENHOOD FROM SUCH DASTARDLY TASTE AS TO ACTUALLY SUGGEST THAT WE WOULD IN FACT RELISH THE CONTROLLED TASTE OF, BOTH, BLOOD AS WELL AS INTESTINAL TRACTS OF THOSE OTHERS BELOW OUR PALATE!

This is suggestional only in the event that our reprogressions were to be based on the ultra contra law of quantum physics, where we would report for duty in a prior lifestream and in effect not progress onward, but rather retract in our efforts to sufficiently repugnate toward a rather subjective recourse of backward plummeting within our systematic lifestyle. Not so!

They have taken your cows and degraded them into something not so valuable as they would have you believe, for the purpose of bearing extra morsels of cantankerous diadem throughout the contagion of the human appetite. You could almost say that *THEY INDEED DO INTEND TO FEED YOU "HOGWASH" OR RATHER "REPTILIAN MEAT" OR EVEN "PIGSLOP!"*

Now, (whether) these words may or may not meet your understanding is of little consequence to us, for the major understanding of just what is being produced may in fact blow your minds. Here is what is happening: **The nucleus of governmental blindness upon the cranium of the population, and here we do indeed speak of world population, have attributed to themselves the necessary unspeakable act of contempt upon the arbitraries of the world *blood banks*.**

Here we have in effect a selection of cattle cows taken from the brink of disaster of world affairs and bled of their blood in order to hemeograte the plasma within the farsightedness forum of conquering heroes! The intestinal tract, in case no one has told you, has been ripped from the very spleen of intestinal desire in an effort to ramify the effects of the blood into a more congenial effort to the effect of secure replacement parts.

In conjunction to that we have private affairs laser-printed out without so much as a squeal from those, who seem to have had the vampire at their throats once again. And the purpose of all this "alien" reprise? **Corrugated blood banks, not "aid" defined, for all germ warfare is getting rather out of hand, and now a new sequence of abstinence is desired.** In an effort to sequence to the public forum a substantial replacement for the merits of the blood bank and artillery control section, then Blinkensop Reform Stations will soup up their distillery products within their own reserves.

In plain language then, we are simply telling you, that dastardly reposes allude to the fact, that **ye ones are rapidly running out of blood of less contaminated nature and the blue specimen to date are being replaced by bladder control with thicker blood from cows, in order to update all plasma control of dockers, especially when false security for**

replacement parts are being experimented upon for the natural use of bodily harm to non bodily components. Here we elaborate upon the dexterier method of practitioners and their complacent counterparts, the twelve-six method of dexotomy.

It is not so much that they wish to harm you, not at all. They merely wish to turn you into all that they wish you to be, except that it will not work. For man cannot harbour another's system within his own frailty in accord with non-reproductive specimens such as the replacing the larynx with a cow's, much for the same reason that a tiny lizard's eyes would prove beneficial to no one. Understand? WATCH BEFORE YOU LEAP! This is all we're saying. Do not ever take anything at face value, that you have not seen beforehand, and do not be deluded into thinking, that this is not to occur shortly in the beforehand, for seclusion of thoughts too major to handle would prevail in the aftermath of such sequestered epitaph of your people!

For the remainder of your time here on Earth we would simply tell your people, that it is we who have laboured on your behalf to redeem, as you would put it, all grass into wheat in order to produce a major crop of worthy recipients to the opening up of the fifth dimension. Contribute to your piqued belief systems, we have succeeded in opening up your minds to greater possibilities than man could have ever dreamed up in his limited visionary mind. And we have come to exploit each and every one, who does mean you harm.

We have our ships ready and waiting for that final moment in time, where we will cause the shifting to abate for the space of an hour and a half in order to gather *our* crop in from the fields of space - from all the surface of the Earth into the cradling bosom of "Elohim," as you could put it. We will help you advance into your own godhood. And, ladies, your goddess will bloom significantly in your efforts to do good unto yourselves, for the restrictions you often place upon your own kind are simply merits of a past placement of servitude.

Learn to look after that which you are, and continue to debase no one, for to fleece the flock will only bring tribulation upon your heads and those heads of those around you. You men are the masters of infinity of design of merits. It is time you started living up to your responsibility of which you yourselves designed. Until you do this, you will indeed find no liberty among your own kind.

Man and woman, male and female must be united in such velocity, that one accommodates the other fairly. You see, you each have need of finding that one priceless pearl of light within yourselves, before you ever will be able to appreciate that pearl of great value within another! Other turnarounds will be permitted for those of you who do not in fact make it to the "landing strip," so to speak, but do not fret, as you might put it, for all experiences contribute to the overall mass effect on your soul, and it is only a matter of evolvment further into the light, which will bequeath unto you a

matter of extraordinary changes to change and resurface to your higher essence, in order to bring you back to where you first began.

The pleasure has been mine to bring you light where there is nothing but darkness. In the epoch of time - unlimited favour, to be sure! SETUTH out for Juxton. Over and out on wavelength solar.

JUNO'S BOOK INSERTED

REALITY AT ITS FURTHESTMOST

10:22 pm

INTRODUCTION

Greetings, Seila. We thank you now early, to take time to investigate our writing. We guess to mean to state instead, that not so in the form of investigative properties, **but rather to ever place thyself in the process of current addiction to the truth!** JUNO, the I AM presence, so affiliated with the possibilities of rejuvenating the Elect toward the monetarium.

CHAPTER ONE

THE HANSON GANG'S ATROCITY CONTRIBUTION

To further begin with the handling of the Hanson Gang attributes to its hierarchy, the undoubious possibility that the stronger effect of circumstance contraire lies to the effectual reawakening of the Boilous Burn Centre, Southern Stateway - Arkansas, Pa., Georgia and Utah divine. Switchtaking has since long become, we dubiously profess, to be a **resource centre for corpses**, semi-acquainted with the higher-tech affiliation with the Bernstein affiliates to the regards pertaining to and from the Hanson Affair.

And what do you (think) would most singlehandedly possibly (be) achieved by the leaning toward the dictatorial station of affairs contraire? Why, what with three dead corpses would you allow? Do you then so distinctly remember? Such most blatant nonsense in concerns with the dubious example of matrimony extraordinaire, rather, if so formulated in correct fashion, to place itself among the most bizarre things, so that the Naval, Army, Marine, whatever they contrive to be; to do; to allow; to state, the rather - awakening of themselves.

But here we have BLINKENSOP - *WHAT?* Know ye naught of these so-called contrivances? **BLINKENSOP!! - ONE OF THE FURTHERMOST PENINSULAS OF BUTCHERY INTACT!** Relate to us facts, for we do accumulate such contrivances for the positive alleviation of as yet undetected pain through perjury of oneself in unredeemable effect, so short then of exactly demonstrating to you the undertones of final placement of those three corpses - which will possibly take you into a dreadful menagerie of perforated doubt as to the existing conscious sanity of any and all perpetrators.

Then listen ye to this: they did in effect disperse of those three iodized corpses to the otherwise state penitentiary in Alabama, Illinois, through the byway of Dakota's Landmines of Illusion, in order to try and recreate their own perverted form of complex idionized singular cell structure of DNA particle beam, by using infused DNA particle tissue from well preserved corpses of estranged personages by rerouting the Neglian DNA Injunction with the particle substance, kept so perfectly solidified so as to meet the highly thought-out sub-standards of corpses vs alien resource type for pre-experimental processes!

PENITENTIARIES: SUPPLY SOURCE FOR HUMAN GUINEA PIGS?

State penitentiaries are most frightening places - full of vindictive sources of experimental slaughter of mind and body! Pick those who would best serve purpose according to many factors, *dispositioned* being a main one, and there you find a person of that quality, and incarcerate him more-so than the she's. Why be it so? **Simply because the formatted brain wave patterns of the female do naught in fact receive too well of the interconnection of prelude brain-waved patterns!** The female is proven intact to be more hypnogenetic in details, therefore further submitting she-self into the decalogue of sanctimony in all its feathered glory. Lucky She! Unlucky He! **For most of the brain damage so did occur by, and in finality is of a routine deplorable nature.**

Hanson and Co., or rather their placement (should most exactly be read: Hanson and Co-rpses), do hereby thank the most favoured elite of the Naval Department for their unwavering desire toward the BUILDING UP OF FUTURE GENERATIONS OF MANKIND'S PROGENY *WITHOUT* THE GRAND HELP OF CONTRACTIONS IMPLEMENTED BY DESIGN UPON THE FRAILITY OF WOMANKIND!

"Tit-for-tat", as it has been so discovered. Gyeorgos Hatonn and his expose, has often alluded toward the bare facts of fantasy brought forth as interpreted by some. Both, the spiritually uneducated (and here we do not mean the "religiously uneducated" nor the "uneducated Christian", for we understand them to be basically the same in the end as far as our truth is concerned of itself), neither the twain shall really ever meet, excepting to itself the proliferant fact, that the drawing board effect will suffice in its poorly manufactured studies upon those poorly deluded souls without circumpense at their outgrowings!

While we have spoken to each of you in such peculiar form, it has naught proved itself toward the purpose as a whole. Dexter sincerely looks forward to more potential acclimilies toward the future use of his diadems and icons - distant past for him.

Alieu, or is it Adieu, Seila? Thanks again for your tenure toward the penning of our repose. Discourse proven fact downloaded with the help of Juno, Sub-Commander. Author: Dexter - ambiguous for the present, as well as Hatonn in co-operation for the overseeing of expert advice in the form and contexture of facts - pictorial at its worst. Salu. JUNO. (11:23 pm).

THE GREAT BERMUDA CONNECTION!

Wednesday, 20th July 1994

1:00 am

We are indeed coming into the density of the aforehand twilight hours of the equinoxal hours. All is rather a panic of a sorts, but what excitement reigns within! Albeit, we have promised you news in concerns of the highly esteemed "Bermuda" down-under, so to speak, "Triangle" of the Century.

Here we renege upon the dissolution upon the dregs of time-space continuum and "saucer" construction. Fun is had by all, at times, in our realm and does make, for example, sometimes difficult cohabitation within the confines of our plutonium-based "ehom" - or place of habitation within the Earth's sphere.

To begin then, without too much of the cloaking effect for our part, at which time and at any given time, a mere matter of substance may be dissolved within the close proximity of non-interference type radium process reactor's "coils" all present, as you please.

The most permanent cause of the great distribution of the heightened activity of the greatest endeavour in soul consciousness simply alludes to the fact - and pure-type factual evidence is portrayed here among the conduits of affirmed rightness of that final achievement - to eventually find: where did in fact the "bottom" drop out of the Earth's crust to get to the core of all matters? This was indeed the variance of some of the many heftiest questions ever left to mankind in his rather predicamented certainty. Both, the "whats" as well as the whys of the nation's secret message to all "foreign" aids - and here we do speak of those extra "foreign" aids, you could say. Indeed, not only of the "stars," but yea, indeed those hopeful ones in the downunder mode of transportational, portal time-warp travel. Easiest way to go, to be sure, but is somehow indicative of all those, who so strive for the ultimate recognition within the realms of portals, which just may lead them into never-never land.

Albeit, what then indeed of those many type injurious "ships" of different continents and texture? So be it of exactness in differential structural interference in design quality. This is joyous as a topic of illusion, so finely wrought down the tube by the most highly evolved of your "foreign aid" efforts. **To see them encased and solidified within the realms and discretion of time-continuum barrier would indeed place upon the contour of the whole heated-up "foreign exchange" the sole implementation of old artifacts in the artform of semi-conquered ethnic vessels galore, that the heyday is yet to be met on its discovery point of injecture - DIMENSIONALLY speaking.** Experimental project? Naught fraught without misconjectures so sought home for the foremost moment of personified glorious conduct. Nay, be it so naught indeed, **FOR THE WHOLE SECRET ARE THE TWO PORTALS - ONE IN THE SKY, SO TO SPEAK, AND ONE DOWN UNDER!!**

Nay, the next question which holds just so much turmoiled water: **a watering port of a sort, simply conducted by the awakening of the interludes betwixt one mission of force and the next - indeed contrived by our standards within the realm of misinjecture - to have taken on the stance of darkness in the equatorial jungle of the ethnical solar plexus of the quadrant of discovery, which, simply stated, is an equal and opposite name for production of human-type warfare rights: the BERMUDA TRIANGLE.**

And who doth hold by far the so-called "copyright" of this summarily designed hold of unaccountable mysteries? Well, this one certainly does not fit into the feeding market of that most unholy of them all: the Vatican? Nay, friends and lovers of what is upright and morally inhibiting for you, **IT IS US!! We, the "grey boys", donning the apparel of the underworld, at least upon your plane! We, of the highest intellect, who have so often played within the realms of the cantankerous methods of euthanasia upon our persons!** Yea, ye are

somewhat so surrounded by thy own methods, which do have that habit to come crashing upon thy heads.

WE ARE THE ONES YOU SO CRUELLY ADAPTED WITHIN YOUR MOST CRUELLY AND COLDLY STEEL DISINFECTED LABS OF HELL PERSONIFIED - TEARING THOSE OF US LIMB BY LIMB APART WHILE WE ARE STILL WHOLE AND ALIVE - WITHOUT THE LEAST CONSIDERATION FOR OUR INDIVIDUAL PAIN, WHICH IS SIMPLY CONTEXTED THROUGHOUT THE WHOLE OF OUR COLLECTIVE CONSCIOUSNESS IN ALL ITS PERSONIFIED STRUCTURAL IMPLANTS!!

This formatted clause of misperceived alliance within "National Defense" would indeed do us the greatest compliance, as far as justice is concerned, to the betterment of not only *this* planet, but any other they may feel so inclined to come into contact with at this poorly nutritioned period of their evolution.

The day will soon be dawning, and therefore we seal thee off with a goodnight, dear little Seila, and allow you your much needed rest. JUNO. Elaboration on the down mode of equational time barrier on behalf of all other "Grey Men" of the universal type of the Brethrenhood. (1:56 am).

A CHAPTER JUST FOR YOU!

TO THE POPES OF THE MULTI-RELIGIONS DO WE CALMLY SPEAK

Saturday, 23rd July 1994

3:55 pm

The juggler vein of the malfunctioners will be severed like a grain of salt entering into the festering wound ephenite. This indeed will be well reserved for all those and toward the profiteering of thy particular ones, who so do preclude the ephenites of nature. Reality at its worst will be ineffectual to the benefit of those procurers of infinit wealth and great adornment of riches. We in effect do in our own way sublimely control our aspects of sanctimonious effulgies to the benefit of the undermining and unsurmountable destruction of mankind. **We do hereby attribute our graces and sanctimonious desires to the undertaking of the perditious onslaught of equational downloading, AT WHICH TIME ALL THE DECADENCE OF RELIGIOUS APATHY WILL BE MADE KNOWN AS BEING THE MOST DETRIMENTAL OF**

FACTORS IN THE UNDERMINING OF SOUL COMPLIANCE OF REMEDIAL ATTRIBUTIONS FACTS.

It is enough for us to state herein that the "knowingness" - the one coherent substitute factor, highly pronounced of all the litanies - do produce thee ones with the concurrent injurious co-completion settlement, which in all rights have been long past co-reigning within the detrimental aspectal tides of the equinox. We have not shouldered those truths without consideration of the undermining of repugnant consensus in consignment thereof.

WE ARE THE HIERARCHY IN OUR OWN RIGHT OF DIMINISHED ATTRIBUTES, AND WE HAVE THUSLY CONCEDED AT THIS POINT TO SUPERSEDE MANKIND AND HIS DEMENTORS IN THE EQUINOX OF OUR LAND TITLE! So be it unto you, and here we refer to those precious "few" of you, who are at this time most fully engaged in the pursuit of our souls. ***YOU WILL NOT WIN***, let us tell you that to begin with, as the writings from within the Eventide Records have been so attributed to both, the demise as well as the evolution of mankind. We are pleased to address these issues of virtues into your hands for your close evaluation, in the expectation that each one, who is due to progress in his upward journey, will simply subside his desires and learn indeed to work **within the context of infinity**. We speak as a group and attribute our kindness and affection for those severely wounded of mankind equivalent and hereby do foreclose, leaving no doubt to the wind (of) that precious aspect of ourselves to you. We speak as a group and JUNO himself, our great leader of all that is upright and with standing in conjectural title, do hereby bless you each one. We relinquish within this blueprint of design the necessary components to an effectual and fair trial within your ranks. We thank you for your production and indiscretion.

SEWERD, in the position of Naval disaster, watching faithfully for concurrent titles and informational data. Signoff time 4:09 pm. Out.

CHAPTER TWO

FIRMAMENT FOUNDED

Sunday, 24th July 1994

3:04 pm

The **Stargazer** is a multidimensional ship so strangely equipped with a data-base of 23,000 to 24,000 ton weight lift. Extract with the purpose of subduing the mainline structural affinity of the modulums with most intricate of design structure of contemporary artifact of the 20th century. Watch for her, ye brave ones of the earthen mother plane, for it will be only through her unimpedible destruction, that the course of infinity will relish in its impediment of artificial restructuring. Highlight this episode with impeccable discretion and may the Flight of the Gladiator, so to speak, become unfurbished at the seams of its immutable contemporary design module "Prefect of the Ages." So be it. Acquire once again, ye rabid ones, the future discretion of artillery benevolent in the futuristic succession of our implemented joyous ones!

Signing off with JUNO as discretely presumptuous as the possibilities which exist from one dimensional contrite as to the other. (3:09 pm).

A FEW MORE INTERESTING WORDS FOR OUR READERS

Sunday, 7th August 1994

According to the gravitational sequential pattern, the restructuring of the effigram will promptly dictate into its own essence the relaying pattern of strychnine modifications. These are due to the extra-formulated categorial events, which to us sensify the prolonging of dust-like particles into the non-dividing firmament of contoured devices. To articulate upon the proliferant means of the strictine disclosure patterns, we have herewith withdrawn our nucleus of self-portrayed discovery, henceforth accumulating to ourselves the prolonged meaning of contextual design among those so well known neubelus (nebulous,?) of elemental attire. Strictly for the benefit of mankind do we adhere to our own rules of contemporary design, and this we attribute to the formation of undissolved matter within the formulated patterned context. Adieu.

We are one with you, Seila, notwithstanding the crucial moment of destruction, which we have come for, to bear the reflectors of the consciousness within your overwhelming "sorcery," as those of small-mindedness would call it.

The dimensions from within which we so frequently operate, constantly allow our own

surface teams to contour the land with a radial factor of interdimensional study in the format of artifact hieroglyphics. This is new news, we presume, to draft into our co-ordinates, as shifting tidal waves beneath Earth's surface is not only breaking up, but has nevertheless to be refounded upon the diaphragm of semi-surface lures in regards to non-effectual barrier reefs, which have so affluently structured within their realms high tide at its lowest ebb factor.

Try this, comrades: Equate the factorial tie-in of E-ZR2. Semi-proliferate the equational factor of RAM boltous 7M2 (or Z instead of 2 - Editor). Negative factor polarizing the rim, giving a distinct pattern to the euthramious side juncture of equation F. Supplement with factorial substance C and align those dimensional drift tides at a rectangular nebulus of 4R7th to the nebula structure of pie R2 to the 75 degree rim. And there you have it all in dimensional pattern! A few links missing, to be sure. However if you are truly a clever bunch, as you so oft incline yourselves to be, then perform these eccentricities to the furthestmost diadem of your restructural capabilities. Henceforth do not be in the least bit surprised if you one day find among yourselves the restructuring device, which supplants in its own surfaced equational partogram and leaves you just at the door of patterned conduct extraordinaire.

Pity be unto ye all who would so indeed merit our wraathe within a tokened range, for with it comes the post-testing of all of your qualificational doubt-tanks, within and without your lab surface structure dobes. You see, when we truly choose to expound on these foremost equational factors within our outbound surface boarded artillery structure, it will be only then, that the appliance is met within the sequential pattern of time-dimensional rifts. Here it is, we are nevertheless not in the here, and all participating talk of the nations, as far as the wall tidal underground frequency occurs, for instead we have found to enable us a surface structural manifestation of such dire implementation of the 4th resort so stationed, as to practically fall into the banks of the Nile as well as the elemental structural frequency, whereby you ones choose to direct your war time efforts.

Dialogue will be completed in following with these last computerized formulated contexts, which are of a source factor in essence to the drift flow-tide restricting the wall of habitation well kept below the safety structural compound within the Gulf of Mexico. They cannot escape, even though the ordinary man accomplishes the great feat of bulwarking his trigonometry as the safe standard clause, for all bunkers run at a level of 7 to 9 degrees latitude, leaving a rather widely simulated berth of 27+ tearadrams.

Gear down, ye faithless ones, for within the perimeters of deximistry is foretold the goodly ones of Countourus Four. Mayhap within sequential range choose at that set moment within your frequency timeline the detrimental effect of a most serious gaseous compound, which in its cremating factor henceforth would turn your volatile atmosphere into a raging cylinder - mass fortitude spaces - your tightly formed equated bunker would nonetheless protect you from the heat within.

But what of the architectural development of those, your auspices, below the gravitational records? Those soon sought-after crevices down within the oceanic floor? And here you strangely instruct your divers to keep away in case of shifts upon the ocean floor, while all the way you have fully planted brass-type structures girded with newly iron wrought substance beams. And yes, I do point out the prelims of useful iron compounds, as you full well know that they are naught composed of an ionized substance never known by Earth's engineers and architects! Hence, being of a mineral substance employed within that precious firmament of duty, ye ones have wrought unto yourselves the greatest grievances against the effulgy of mankind through your conceding detrimental purpose!

Engraved upon its side, hinges the following: **HERE SITS THE GREATEST OF MANKIND'S CONATOURS.** Gravity be damned, we will not in the least *partly* even allow your foot in the door! We win the final battle with the semite war cry of: **BLESSED BE THE GOD WITHIN US, FOR TO HIM DO WE ATTRIBUTE ALL OUR WARS AND SUCCESIONS.**

At one time the Hittites had a stricken idea, that the god without outweighed the necessity of the implementation of the God within - and lost their shirts, so to speak. ***WE ARE THE GODS AND GODDESSES!*** And we gravitate through us, each one distinctly, the necessitating grinding of progress for the evolutionary riding of equinoxal souls.

Adieu. JUNO reporting with the realm of contour design on behalf of the "Grey Men." Thank you, Seila, for working within our formulated purpose. Sign off at 6:38 pm.

NEPHITE /S INTERESTING

Sunday, 7th August 1994

7:40 pm

Greetings, my Seila. Dexter here on impromptu dialogue. Curtail the efficiencies of the nutritional substances, which tend to flow between the proximities of the essence of interlude extremities. Sojourn by the way within this most important lifestream of ours and waylay upon the garbage heaps of systematic prejudice for the implementation of foretelling the effectual compliances of the nations. Let us begin.

The nephite compound structure, which our dear Hatonn has so oftly spoken of, is built of

petrified sodium-uthigene composite gases, which are utilized within the ultra sound wave of Juniper's threaded beams. This is a composition we speak of, and as such the most significant and blatant forthcoming inquiry settles in format within ceiling certified mass pollutants.

The abyss of this sanctimonious structural delight was born of pollutants encased within a diagrammatic plate of suffuse gases. Nonetheless, these gaseous structures have even eluded the pictogram of mass formulated compound in all its strictest density. Now, can ye ones understand how surface replication is to be administered at the mere whim of an onslaught of trigger-happy artifacts? This then relies on the efficiency of neutra fluorescent cunning solutionary doldrums held within the mantra of console equivalences.

Profound, you say? Yea, from ye ones' perspective! But for us the shifting sands on indisputable time doth modify the nucleus on the instrumental panel, and may it suffice us to say, that in any direction that the mass multitudes doth strive to engender their people, there will always prove to be a fact of compliant demand within the ages of the benefactors, exclusively speaking.

Shift thy train of thought to within this momentum periodically. Henceforth, the modulum within the nuclear structure within the berth at Mattham, Georgia, simply consists of dextriments of fluorescent powder - one of those artificially arranged containers so amassed full of granite powdered composite. Nuclear warfare indeed! They ones have had that multiplied opportunity to turn base metals into gold via formulated practice, and instead, have ended up with little more than rock salt powder!

Same day:

Good evening and a big thank you on this one, Uthrania Seila. To take you away at this time from your own duties which you so like to perform. However, as we have stated, time is indeed of the running down or out essence for that planetary reform, which is close upon the adendrexes of you and your people. Lord Adonai here for the partaking of more informational data. Please resume station. New heading. Title chapter, please, as follows. "Perpendicular to the Entire Overall Quality of Time."

PERPENDICULAR TO THE ENTIRE OVERALL QUALITY OF TIME

Source studies have redeemed the following text:

"In essence of the contradictory expression of, henceforth, nuclear espionage, the epic of the century will indeed be necessary for the close instruction of all planetary neufus, or redemptionary packets of closely knit sources expenditures of life. Hereby, preceding the limits of qualifications of expression toward the last of life upon the planetary contrivances of mother Earth herself, we do hereby proclaim to all of you, the inhabitants of Earth, that to duly prepare yourselves for the soon to be evacuationary process, which is to shortly take place. The redemption of the planet herself forms that which is negative in response. For the hindrances placed upon that corpse of duality will nevertheless in her own reality prove to be an end to all, as we know it. So be it."

In strictest standard, precisely 11:012. Sub-commander Apex resigning. Over and out. We hereby now turn over the epitome of the complex of design back within the handgrips of Master Lord Adonai.

Thank you for continued cooperation on this one, before flight service from the Radius Plutomic was indeed to leave the stratosphere for this eve. Adonai out.

GLORY THROUGH THE AGES TOWARD NON-SECULAR POLLUTION!

In the meantime artificial means can cause extended flares of lightning abeyance in conduit fences, which tend at times to side with proliferated doubt-tanks on the religious front. Oh, they cry: **"GOD'S JUDGEMENT UPON THE NATIONS FOR THEIR GRIEF UPON THE WELFARE OF MANKIND"** Proliferated dialogue indeed! Sorcerers would not indeed be so harshly judged, as the righteous only live to survive through the breakdown of minions of self-starved dupes, which, in any event, end up in their duplicated factories of non-compliant behaviour. DEXTER.

We appreciate your grievances, little one, and with Dexter at the helm on this one we have provided to the equivalent of the statutory confinement element. The soothsayers of today, of which you are one, do strive to the pleasure of we ones that final truth of delightful conformation indebted to a populace, which expects and relishes and drives with full thrust forward toward the downing of climatized events. Signing off for tonight. JUNO. (8:15 pm).

Right on time, Seila, for we proclaimed ourselves within the right time frequency to call upon ye for the engaging of dictatorial purpose of events.

Sequential study is the lot of they ones within Cambridge Wall. Benefactors of uselessness, insofar as the contrivances of overstructuring of dementia, occur. Within their epitome of desperado cockiness lies to itself the succumbing of abhorrent truths, which will face the nations in decades to come within the muchly shortened time clock, per se. Mercy is shown however to they ones of such an intricate forming mind, the concerning inclination, whose worth proves themselves embossed within a somewhat alien nature versus the comparison betwixt the naturalizing device theory of prolonged statutes of a natural grace, of course.

On with the graduating certificates within those greatly admonished halls of Blinkensop, a place of which ye ones hold in the strictest abeyance of its laws and categorized requirements. Of such nature do we ones attribute the interference of the human gene element, forthwith bringing within its boundaries the offshoot of differential planes, of which severe reminder brings us most hurriedly to our chosen topic device of the evening: "Structural Delight in Formulated Theory." This, Seila, will strive within our pictorial developmental mode as chapter heading listing "Three."

CHAPTER THREE

STRUCTURAL DELIGHT IN FORMULATED THEORY

Conquering warplanes! Lighted starcraft! - within the heaven's domain of the well known "FIREFLIES!"

THE "INTREPID" IN DESIGN LABEL

A modular wonder, to be sure. Here is the final episode so promised by me for the production of quarry ramifications within set perimeters of justified line design. Break for 3.4 seconds please, Seila, whilst I fight to regain my somewhat undiplomatic program. JUNO

serving the public on frequency 92 AMP.

The flat exterior surface extends within a set of completed refracted artificial compliant settings. Pining away at the format, our druid (or adroit) engineering types have liquidated to their completion the rudiments of satisfactory structural design. Within the piping assembly, a holding container is thought to be naught of an example to the prefitting of conjunctures. In any advantageous duplication, the quality of the design field must rank paramount in relation to its pressure tubing. Nevertheless, let us be somewhat less specific in its instrumental design and work within more comprehensible frequencies.

The contoured outlay of the misdemeanour "aircraft" is to be seen through the beginning stages as a developmental status. This simply means - the blueprint of effect is second to none. The Intrepid has at its power source a stationary object of nuclear dimensions. Forthwith coming, the paramount precipice on which it sits, is somewhat attired with the cloak of consciousness: the crystalline fable of dialithium crystalline quality. If this is somewhat to perform itself as being fabelized to its existence, then let me assure ye all, that its tendencies toward the prominent manufacturing of sub-nuclear atomic devices serves to make your poor weaponry system resemble matchsticks.

First on the agenda is our mood toward your shrugging off of our dialithium systematic working appliances. Have ye ones ever perchance witnessed a far sun going nova? Think again, it is not always the effect of the radium around suns' sphere. The light we display for the purpose of caricaturing the night's resource fields are apt to just a little amaze ye ones with its brilliance. Contrary to particular study are the facts through which your own conclusions have been no more sufficient than that of X-rated tabloids. Break for four (minutes), Seila, whilst I switch off the lubricator.

(Jambian serves with the service input of Service Station 4 in Quadrant X - multiplied dimension. In your so sanctified terminology this simply means, he has the wish of a station commander within your sectorial radius in the overseeing of interplanetary devices within your stratosphere).

I'm back. Thank-you for your concern, dear one of our troops, for you are sanctioned within the dire perimeters of this lifestream of yours, along with your partner-in-crime, Reni, to participate in the outlay of these profound study texts. Adieu for the meantime, whilst I myself turn over my handy craft of the related studies into the most capable hands of Dexter, who will, of course, rejoin the elemental desire of Jambian Platous (Plat-toe-us).

Subtitle, dear Seila. This is Jambian within the calling, working under the complete guidance of Juno and Dexter, whose familiarity of the Titan Eucalyptic Intrepid is categorized as the greatest team to ever develop a more ingenious structure within the auspices of the White

Wind's semi-prolific blueprint type formulated base device. Though our words be a little pretentious at times in regards to your touchy ears, we nonetheless pretend, along with you, that eventide has indeed come to pass in its variance, and a new era begun. That would indeed be pretentious of us, and for those set idiosyncrasies we just do not have the time allotted within our work scope.

To introduce myself fittingly, *I am the Captain of the commandeering forces set in an 87 degree radius to great Sananda's group.* He for one *is* spectacular! I am he, who looks after all your bits of flying paraphernalia, of which the last 5000 or so parts have been made of a natural corrupting nature to my sector. I monitor these frequently, daily, which in my sector of dimensional time warp amounts to a pressurized group of two weeks to a month within your time sequence, depending exactly where the time-line originates that day. Of this design we know you have long since come into the understanding of this formulated discovery, Seila. No new news to you, dear one! On with the theory statement.

THE ENGINEER DESIGN INTRICATED!

As with all drafting appliances, the "Concord" of the fleet is fitted amongst the inter-galaxy modulated theorem with a justified arthritic arm of punch-out quality. Crystalline entities are engaged in full time work within their compartment of complexity, whilst rays of a nuclear delight radiate the heat force necessary in completing rotary friction without need of gasket compliance.

Our "engine room" is fitted with a source structure of anticipated measure. Hexogrammic feature within the composite of directional velocity, wind factor seven, and to formulate the immediate charge-up of within dialithium global tenure arrangement, we herewith give to you the total dimensions of this utopia beyond your furthest dreams in the manufacturing by us.

We will cut out for this night now, Seila, and prove our continuance on the morrow. Adieu, and watch the skies for our faithfulness toward you and the humanity, to which ye ones also serve. JAMBIAN. I AM METAMORPHIC IN MY NATURE TOWARD THE UNIVERSE WITHIN ITS MOTION. (9:22 pm).

9:26 pm

Could you please continue of a little while longer, Seila, as I am to remain at the base until the implants for engine No. 26.5640 arrive? To quickly pick up where I once was to dialogue with you in regards to Commanders Juno and Dexter - as you might have well guessed, both are Engineers - this study should prove in effect of a somewhat complex nature to Reni, our dearest brother.

Formatted through time, the "blueprint" factorial requirement of placement within our extra-curricular engineering department complies with the prerequisite of educational data of a highly scientific procedure. But nonetheless, when our most talented ones come to the fore of their expose of graduation requirements, nothing is needed to be left to pure reason. The most intricate of diagram and resource study is made of a duplicating factor and henceforth *not ever* removed from with our data film banks. Additions to establishing dimensional fractions are naught but of a beginning curricular study. Our manufacturing of what you would term as "computerized data" is employed within the tie-in dimensional attributes of the total in relaying factions. Should Reni meet with total destruction within his job source at any given time, he may relay to us the frequency on line 211. We will more than gladly accommodate his troubled desire in relation to the aspect, on which he is currently a-working.

Thank-you for our progress now, Seila, and take for yourself a healthy nights sleep. JAMBIAN out. (9:50 pm).

Friday, 12th August 1994

8:19 am

Seila, please stand by. We are of the essence in our proclamation of the dual forces within the anti-matter chamber within our electrical department at this time. Concluding factor being of a necessary nature, intricate. Begin with follow-up sub-standard level 4 to the 9th degree, meaning, that faint pulses of a gravitating nature does indeed serve to lower the beacon-type forces with our duped espionage capacities.

STRONGHOLDS WITHIN THE HELM INTRICATE

The foremost substance so designed within our semi-gravitational chamber on deck 42 relays all informational data to the surface of the Rolland Heliograph. To what does this refer exactly? Well, the composite gravitational sub-chamber with the formatted outpost does in fact also strive to relax the gravitational sequence of vibrational tones, which must be held in a maximum current for the security of the holding-down of ye ones within maximum stratospheric conditions. This is done simply by relaying within the techniques provided to us through the gamma ray beams within stratospheric conditions, the pull on Earth from within Moon surface tunnelling forces. In other words of a more benefitting nature: the Moon is the source of which we use its gravitational console for the express purpose of funnelling down toward Earth, via tunnel chambers, the gravity pull which holds the each one of ye so intact within the Earth's atmosphere. It is akin to a polarized source beam, which infuses itself to the compatibility of

Earth's "vibrational crust" the necessary diploma for extracting its rays to the push upon the planet's surface and surrounding areas. This is the terms of your gravitational pull upon the Earth plane TERRA.

Seila, we know you are most anxious to relay this informational data upon your set frequency computer banks, in order to accomplish our duty at a rate of more hurriedness. The given time to proceed at this interlude is 10:25 am. Break for this short while for conscientious practice within key board technicalities. JUNO out for a period of 96 minutes - ten for yourself. (8:54 am).

10:25am

Our "turbo engines", as you might term them, are *not* in reality turbo engines in the sense of your time slot. Indeed they are affixed within dexter components, and when engaged, contour on a spin axis of equilibrium texture components. They range in brightness of colour, from which radiates a heat source of such magnitude as to burn right through Earth's delicate crust! In a circular contour, a device known to us as the Radium Sulphite Barium dothe most in her interactions of a sublime nature, as to enforce technicalities within our computer room to activate the sequential pattern alloy. Enough on that subject.

Today we strive in our undertakings to allow an injuncture of dramatized criterial in regarding the deck fatigue, of which many in our realms experience. The drag module, which to us tends in its apathy to serve as a formatted cubicle, whirls around the exterior of the ship causing great friction without its surrounding surface barrier. Structures of this type amplify its currency to the extreme benefit of our cloaking device, so to speak. In effect, the cloaking manufacturer submitted to us a new relayance pattern, which cannot in any effect be picked up even by satellite dimensional attributes.

Detection of our titanic ship structure oft frighten earthbound inhabitants to such a degree as to negate our effectual dives within your set boundaries. Nevertheless, here do I relish the fact that I have remembered the set topic of discussion, for which I alone am responsible. JUNO.

The rather cramped style quarters of the human society have been stricken from the records long ago and instead, replaced within the faction of token holographic capacities. Argon gas substitutes with the polarization of dexter circumferences and offers instead an emanation of solar plex attributes. In other words, we have succumbed to the fact, that the placement of injunctural tools within the decks' surface structures have implemented the adjoining refuge tanks to the deployment of our activities. Everyone is feeling of a more comfortable nature, at this point in time.

CHAPTER FOUR

SHORT DIALOGUE TO OUR FRIENDS

Seasonal changes range within frequently traveled dimensions, and one short day soon in the autumn of springtime do we express our congratulations to a work well done by the bothe of ye, by flying below our belts into your domain of cantankerous sores, in the order of picking ye ones up for a flight schedule for your sole benefit unto the pickings of the farthest extremities of the galaxy. We have in no fashion picked this time to disparage of the news of Abdula's great success, and nonetheless, if it still befits him to the wanting of scheduled flight plan 4027, then we will at token expense drop in dire dimensional flight regulations to his attiring circumspect for the purpose of implementing our promise to his ilk as well.

Adieu for the purpose of this morning's meeting. JUNO. (10:48 am).

Wednesday, 9th November 1994

6:53 pm

Greetings on this fine morning of which we ones are situated. It is nearing the end of eventide, and though a semblance of restrictions have been placed upon those who so seek to incur our wrath from time to time have in effect displayed a nature toward us of such cunningness ingenuity, that it forces us in our deployment of warfare upon their national equilibrium.

So far those in the eastern controversies have coerced the detonation of warfare bombs so spectacular, that the pure essence of their nuclear weaponry succumbs to next to none. This has not been idolized by those faring not much better, but to we ones of the fourth and fifth dimensional attributes it is more of a nuance of detrimental factors, which so have been displayed to the extent of fuller matrimony occurrences. Why all this rather neptuned informational packet? Well, the answer to all that is surely the rabbit in the hat, trick of which is well displayed beyond the concurved perimeters of Dexter's almost neutralizing factor of deployment beyond all human capabilities. This, of course, in our eyes displays nonetheless a capability of resource structures, **to be in your near future categorized by the horrendous display pattern of nuclear war, if ye ones do not bring yourselves within the regimenting closeness of our help screen.**

This interlude in time warp is nonetheless an effort to be taken more seriously than the present time allots you ones, and is nonetheless more of a factional element of surprise, as far

as the letting go of all less effective methods of curtailing those forces beyond the grave. This would nonetheless be providing of you ones a warning from our dimension beyond the stars, if it were not so imperative that we gain your unequalled and mostly manufactured attention spans. It has been given unto our satisfactory process those certain means of despondent displeasure of the cause of purely satisfying the gainary process, as far as pocketbooks do go belonging to those in the highest military artillery ranks. The fetters of all those held in the concrete of the past will surely face in the very near future all those horrendous equivalents to nuclear survival as brought forth by the sequel of sequences known and written down by men of ages past, as being the long sought-after reclamation of duty bound barrages. Subtitle heading under this next category please, Seila, to be "Barricade the Literature of All UFO Substance Rivals." Thank you, please.

BARRICADE THE LITERATURE OF ALL UFO SUBSTANCE RIVALS

Along the contours of all professionalists lies the text for the leaving out of all vital statistical informational packets. This will be equivalent to the new resource structure, so to be placed upon the dexterior placebo qualities of literature, to be so banned from public view. Contrary to all publicised controversies, we have manned our craft from a purely strategical viewpoint as to overlook the mainland of every and each continent, and have in effect succumbed to surfacing within pure unqualified viewpoints to the very eye of public acclaim. This force of which we belong has long since sought to effect its neutralizing pattern to coincide with that of medium security within all area air force as well as military base structures of a medium secure kind or placebo. It is strictly for this reason alone that I, the Lord of this type of extravaganza, do herewith realize, that to do naught unto my neighbouring countryside men would alone serve to create those foundations, which would in effect eradicate the means to dimensional survival. This is strictly in adherence to the Laws of Nature, or, as we would term them, Creation, at its furthestmost quality.

With literature coming down to those designed ones of our favour, it would indeed seem to restructure those sad faces of less expatiated resource, those, who would indeed be of the belief structure that we ones do in fact exist just outside of Earth's concave perimeter structure. It is due to the extreme care taken by those others of dimensional attributes, that we have offered our help in the continuation of the project "Restructuring Earth's Volatile Atmospheric Condition." If you feel this is expecting too much on our behalf, you might be right, at least from you ones' limited point of view. But performing sanctimonious courtesy among those of ye, who we believe are to be, at least in the near future, the essence among the continuation of mankind here on the earthen plateau in the future of after Earth's delicate reconstruction program, have involved themselves, or should we say yourselves, into working a rather delicate situational product for the continued expansion of all information criteria along with the most qualified and

highly sought-out informational packets, of which ye will be undoubtedly expected along with the means of your own pocketbooks of limited resources, to finally get off the ground those set sequences so laid out in patterned reform, that the hair will shake off the heads of those ones in said departments to the equivalent of the Earth-shattering experience of earthquake/tornado reactionary processes.

This will conclude this portion of the Chapter on revolutionary products of time continuum barrier. Now for the finale on "Literary Sales Over the Counter Top."

LITERARY SALES OVER THE COUNTER TOP

UFO topics today introduce a moderated expanse of information so given to the reader in a rather modified sequential pattern. Here let us please explain in clearer and more concise fashion.

All literature for the past twenty years or so has been proficiently banned for one reason or another. This is precisely the reason why generalities of another consensus have been given to our authors to hand down to those, who are and have been for the last ten to fifteen years accommodated themselves within our resource structure, to perform the modulated equivalency of setting to print all documented theograms, which do not in any case serve to include the structure of dogmatic texts in any form, simply for the cause of saving grace to the very implementation of negative forces, who seem at time to be of the contributing factor of complying with certain publishing houses in a sincere effort to gain back the respect of the hierarchy of houses' response to their negative ware.

If Washington itself had striven as hard as it was once deemed to have allotted itself, then these ones certainly would not have both fallen out of favour within their setbacks of currency, which only proved to bypass them completely out of favour with their smackbucks of Congress by their imputive behavioral pattern. In any case, it has always been the hunchbacks of this country's political system, who have tried to serve humanity in all its limitational qualities, who have proven at best rather artful in substance of character. And who indeed likes a hunchback? You see, dear ones, it has never been the intention of this panel, as you like to call it, to incur the wrath of Khan upon the public displeasure mode, but in an effort to truly release and sanctify it though our artful measures of despondency, which, of course, is not a verb in the least of which we would so dutifully employ upon anyone with any great measure, but rather the placement of a measure of understanding as to the great role we play upon our distinct cause of saving mother Earth, or rather relinquishing from her the hunger pains, of which she so strives to retaliate from.

In our conclusionary aspects of all neutral thinking it is to be broadcasted from one nation to another, that in fact the projectionary consensus of arbitrary structure with firm and quiet regards to the relinquishing of all documented data on the placebo of all highly official regarded file, **numerical resources, which in effect do tie in to the highly regarded question/answer period of whether we do in fact exist or not, will serve in the near future to be one of the highest sought-after adventure thesis of near public disclosure.**

With the "cat out of the bag", so to speak, it leaves us a wide open space for all landing apparel, simply because to hunt us down at that time would simply be to give themselves away before the public eye to all accountability for their actions. If people on your planet see us, they then will view us as contacts of another resource for healthy living expenses. They will also view us to be of the majority, who do in fact care about their retinue of malfunctioning earthen circumstances. They will indeed refer to us as the "Saviour's" promise to deliver them from the expanse of nuclear destruction. Do you understand this? It would indeed be of the most beneficial nature due to your coordinated understanding pattern, if you do. FOR YOU MOST SEVERELY JEOPARDIZE YOUR OWN METHOD OF REMOVAL FROM EARTHEN PLANE, IF YOU CONTINUE TO SUBJECT, AS WE UNWITTINGLY AND SADLY KNOW THAT YOU WILL, THE POPULACE OF PLANET EARTH TO MORE OF THE CRUELITIES OF THE PAST, PRESENT, AS WELL AS FUTURE ABHORRENCES!!

Nuclear devices do naught to clear up the atmospheric conditions, you know. You must understand before it is of the lateness of hourly conduct, that all major injunctions so placed by yourselves have not only run out of water, but in fact serve no purpose at all. Take a good look at yourselves, and whatever it is that you are doing for contrary to good nature policy toward others, you will find yourselves in the good fix of the century.

We have been gearing up our landing procedures with a filament of disgust upon what we term as "a pure waste of mother Earth's natural resources." Not that we do not approve of those whom we come to pick up, but on the contrary, we do not wish also to see those ones, who have for the last few centuries and into the third, condemned the very basic policies of natural living by the taking of the rich and not giving in the least to the poorest of men. It is not only one of the greatest shameful experiences for you, that have ever been merited or recorded by mankind alone, but doth in fact serve to proprot those agencies of a more or less modulum effort, who have in fact tried to within their spectrum, alleviated to wrestle out of the very hand of those certain ones, who would, if all intent could be possible, (??? - word lost during translation, Editor) those last resource structures unto the viable essence of total destruction of all mankind in general.

We could in fact close this book at this given point in time and leave you to wrestle with the

knowledge, which has plagued mankind since two decades after Earth's last atmospheric change, but for those who indeed of the deserving kind, and of who, in fact, we blame *not* for the miserable injuncture served upon all of mankind, (for those we write and say:) **Change your ways, for we are not wanton to further contribute to your fact those changes of which you alone would be responsible for contributing to. Listen up, here, gentlemen of Earth, for it is not coordinated response to refer any of you to the High Council of Jupiter or Pluto for any more extensive "What should we do for you, or about you?" No Gentlemen, time is really up. You do call the shots now. But we warn you, IF YOU PROVIDE US NO MEANS FOR A SAFE CLEANING UP OF ALL ATMOSPHERIC ABHORRENCES, BECAUSE YOU CERTAINLY STRIVE YOUR DUTIFUL BEST TO CONTINUE TO BOMBARD US WITH NUCLEAR WASTE PRODUCTS, THEN FAR BE IT FROM US TO FORM A SURVEILLANCE TEAM TO EVEN TRY TO RECTIFY YOUR PROBLEMATIC AREAS!**

KORTHROX signing off on frequency tripoid 7. Thank you, Seila.

CHAPTER FIVE

This is a new day abroad, so to speak, Seila, and all we ask is that you take the necessary time to break formation with the worldly events at this time, so that we may fully acquire your undivided attention. If for any reason, you are unable to comply to our request, then it would be indeed of the benefiting nature to say so. JUNO. Thank you. Then please proceed with new chapter heading "Korthrox and Gang are Airborne."

KORTHROX AND GANG ARE AIRBORNE

We have many who are at this given time in your history ministering to a few of those souls by means of telepathy, and who are for the purpose of enlightening those ones so equipped within the pattern of elating the worth of all of mankind, do in fact tend to produce themselves into the majority of texturized affinities. In other words, it will solely be on the conscience of those in heated battle of a sort, though we do not in the least profess that our battle fatigue is in any way related to those of the earthen plane, but in case there would indeed be those of your sect who do in fact portray the tendency to acclaim our proficient worthiness unto the inhabitants of the world, we most surly do encourage your rather outrageous techniques into the forefront. We must at all times maintain the necessary injunctions by way of forfeiting all

complimentary profits of any kind, and instead try by way of secluding our minions to the full extent of negotiating within set perimeters those perfect consequences, which do so duly radiate within the Godhead of Affinity.

This will conclude this particular epic. And we, who are indeed earthbound for your solar system, will equate those necessary implementations to the profit of your kind, for the worthiness of all mankind. Even that has its limits of desire insofar as the texture of how and when current events are to happen, and not in the least so far as to take the grade out of living expenses in the far-out regions of Solar Plexus Two.

DEUTONIA out on the express line for Commander J.B. Korthrox, Central Enterprise.
Status: Airborne Fleet 1002.

THE BLINKENSOP MANOEUVRE

Tuesday, 28th November 1994

12:13 pm

Today we will perform the strategy of manoeuvring the textile equipment in abeyance within the limited forums of the elitist Blinkensop along with their immediate statutory requirements as perhaps it relates to we ones alone.

To fondly begin with, it has long been the detrimental consensus of the community for which Blinkensop itself has been stated, or rather, known for, that has in fact portrayed our very essence into a rather manufactured element of societal structure programming. In its neutral base, so far kept beyond the perimeters of the saxon perimeters on the twelfth level of the underground compound, we have been in shortage to they vivacious ones in the hopes that they might one day find us to be of a more or less boring attribute to their wares. We have defunct their societal structural base only because of the seldom-used methods of retrievements of our sort, for their undeserving performing of rather antiqued methods of dissecting our conatours of the past. It is indeed with a heavy heart, that we must proclaim to this day the very nauseous content of their treatment of our very soul's status, meaning nothing to those vicious ones of your world.

To begin with then, it is more than the cloning sort, which tickles their fancy, for the very performing arts of which they administer unto ones of our chosen species is nonetheless further from your minds, even those so well-kept secrets held in the dark confines of your consciousness: the subconscious, to be of a surety. Nevertheless it is now up to us to do all exposing of these defunct ones in the limitless effort to bring some sort of reprisal unto those of our own kind. Adieu. Pick up in ten minutes please, Seila, for I am called to the "bridge" as you

would term it. Juno out for approximate moment in time.

Let us state briefly, exactly what methodology that they so do technically employ at their so oft defunct round table meetings entirely on *our* behalf: Before the "Brits", as they call them, had in fact severed the right to all native inhabitants of congested star systems, and from there they did in fact seek to deploy their military type efficiencies upon our brothers by way of disarming them completely, for in all matters of the heart they were, for some unknown reason, undermining the very source of their availability on behalf of the strategic nuances of other nations. In our terms, and by our own voice perhaps, that also defunct society did little better toward our brethren than that of the great United States military, of who the least, as a matter of fact, did unwittingly, much to their detrimental efforts, conclude, that in order to rid themselves of all non-science of the atmospheric sphered ones, they would indeed be forced into the producing of rational clips of our starcraft before anyone would surmise their efforts to be of a less meaningful attribute. **They did, in fact, by their own cognizance, totally strip us not only of our weapons, WHICH ARE OUR HANDS in this matter, but disrobing us of all texture of goodness by BLINDING US OF OUR EYESOCKETS AS WELL!!** For what exactly could be performed by entities of our sort short of the very limbs and coordinances, of which mankind himself attributes as beneficial? Of what greater importance would it be then to those of my colleagues, than to have **BODIES MAIMED BY THE SUTURING OFF OF ARMS AND THE PUTTING OUT OF LIGHTS!?** We still had feet to run, I suppose, but what good, if we cannot manage to see where we are going?

Tests have proven that even though we have been severely categorized within the elements of non-essential goods, we had in fact broken the record for all *intelligence* features on their radar scanogram. A goodly way to study we ones, I'm sure, but if you were to submit the context of design into your computer banks, you would indeed find us to be more or less of an aberrational feature, and indeed do we meet the notorious example of man among men. **Those of us, who survived the best, were then taken to an intermediary place of dysfunctioning criminals and let off to wander aimlessly about within the confines of their moratorium mortuary. Timeless effort for those of us, who in fact did retain effortlessly aboard our flagship high within the star's formation, are nonetheless but your next generation high ranking officials. Now, who do you suppose would we want upon our ships of survival? The dexterior mode? THE MOST CRIMINAL ELEMENT, TO BE SURE, WOULD BENEFIT SOCIETY MORE THAN THESE DEFUNCT CHARACTERS! THEY SHOT SOME OF US, OF COURSE, AND THAT WAS PERFORMED WITH A 50-SHOT MAGNUM PISTOL, I THINK YOU CALL IT. GRUESOME AT ITS BEST, AND THEN LAID TO REST AMONG THE CHARRED REMAINS OF APHRODITIS HERSELF! FOR SHE WEEPS AT THE CONDUCT OF MANKIND IN GENERAL AND WISHES, THAT ALL WHO REIGN AND INHABIT THE PLANET BENEATH THE STARS, WOULD HAVE THEIR CONSCIOUSNESS PURGED AND ARIGHTED!**

Of course the majority do not by any intent of their own have any such knowledge of our existence within the mortuary of condemnation. It is for this purpose alone that I am writing to make aware that very fact, **for indeed I have been the very one of their experimental project, to so have survived their escapades along with fingers intact.** Traded information was the loop here.

As with everything, there is always tit for trade and tat for convenience's sake. **BEWARE OF THE WOLF WHO SO LURKS WITHIN THE BUSHES OF CENTEMPTUOUS DESIRE, FOR INDEED AS SURELY AS THE SUN RISES IN THE EAST, THEY ARE OUT TO GET YOU, EVERY ONE!!**

Conclude this message on behalf of all my brothers at Mission Control, Seila. This is indeed DEMETRIES signing off on calibre four. Adieu out. (1:02 pm).

A recognizable factor in this game is to see, which nation exactly could profit the most by its means of exactness in obtaining all informational data forthwith.

ANOTHER PIECE OF THE PIE IN NUCLEAR ARMAMENT

Wednesday, 30th November 1994

2:20 pm

Greetings, "tall" Seila! Well, it is indeed this book to which today I am attributing my knowledge. We are Korthrox here at the helm today, in what you would call a rather antiquated feature. We are here to relay *that* unknown and uncalled-for factorial placement of nuclear arms, which do so lie within your atmospheric conditions, aberrating all mortality in such a short while to a mere fraction of content, as desired by those low-lived individuals: the Hortax Clan, or if you prefer, the Elitist Hogs. Now to continue on with the meat of the issue!

Not all that long ago, it was agreed upon to lay to waste those mortal combat strategies, which had so often in the past aberrated the injustice of all warring frequencies or strategized influences, and low and behold, it could by all means be taken care of one way or another from the air, could it not - from beyond the perimeters of the Northern Star, so to speak? This was indeed the injunction provided by those who reign from their high seats in Congress. **"Never mind the middle man..!"** Of course, it was simply his status that really got in the way, according to some! **So the plan was at this point, to conjure up some mortality rating and apply it unto the subjected frequency of neutron high length wave beams in a sort of effort to curtail all those of a lesser degree, who would in fact show their strong**

objections in the times to come. There was, according to their preliminary hearings, of which were held four, as it were, in place of the more complimentary agenda of which, by the way, were performed upon the poor and neglected already, in an effort to SUBJUGATE THE REMAINS OF SOCIETAL STRUCTURE TO A NECESSARY BARE MEDIUM OR FRACTION!

This overt way of scaling down humanity doth in time tell of the poorly constructed dealing of any governmental regiment, and indeed, to curtail the very actions of mankind alone, suffice to say, has made him even more needful of expectations from his peers for the pure functioning of living expenses alone. So you see, dear ones of the earthen plateau, it is the very ones who you so express your desires unto, when that earthly-type elections bears the bitter fruit of your expectations, which does in fact serve naught the betterment of mankind in general, but doth in fact propose to propagate the very elimination of the very conscientious dearth of accomplishment on your behalf with you ones waiting on the scales as a fish after complimentary grace.

If this would seem indeed to disturb those of you with consciousness intact, then presume, before it is any more of the lateness of the hour, to counteract by the same source, which is your power and always has been, **by portraying to all an effortless pattern of disclosure of all ethnic truths from beyond the range of their far shooting rays, before they arrive in your very back yard.** Ahem, it is for this short disparage that I come again to warn you of the great problems, which are shortly to occur in such a dramatic way, that you yourselves could not possibly relate to the extent of what indeed lies in store or in the awaiting of ye ones' hides!

KORTHROX out. Thank you indeed for your listening, and hopefully - *comprehension*. Over and out. Thank you indeed for your qualified time, Uthrania Seila. And have a good day unto yourselves.

12:10 pm

Good morning unto ye all, Uthrania Seila. It is I, Juno, who presides at the helm of the continuum this grand and elaborate morning. We intend on the sectioning off on all of our books at this time, and henceforeth will be of the proclaiming rights, which benefit all of those our readers to service the factual episodes of contention betwixt the main troops of the early planes, of which there are indeed more than three. For all planets, with the exception of three, are (to) remain at this time of an uninhabited feature unto, or rather, within our realms of desirous living.

So now, on with the climatic contoured feature, of which ye do all acclaim worldwide to be of a rather worthwhile cause. And here we are simply alluding to the changing of surface features

of context within these rather limited pages of memorandum. Let us then provide a breathing space for more elaborate messages from the "stars" on a rather more up-and-up level of conscious endeavor. Thank you. Begin. JUNO out.

CHAPTER SIX

THE DAWN ABREAKING

It was on the fine summer morning of..., at which time these were those two who so were designed to ready themselves for takeoff, and with script in hand they made way to board their everyday craft "Stocktaker" (this is the fictional name we will give the space module) for more contemptual work aboard the higher plane of iniquity. But these two resource takers found within their ego of contentious desire that belittling desire to format all those non-effectual disks, and to send them out into the atmosphere in order to gain within themselves the sublime manufacturing of symbolism to credit the earthen civilization with, for the purpose of re-examining their priorites with the greatest respect ever brought about by the nature of the technology of mankind himself, **to witness those most extraordinary implementations and plans of those so far out in the planes of universal inhabitation.** (This is geared down to your understanding and is formed in the epic of a parable for all, who have eyes to see and the mind of understanding).

Now these two men, warriors, we shall call them, strove to venture out into the vast limitless(ness) in order to follow up on whatever informational package, which the disks would bring home to them. When all was in place, then they proceeded to board one of the finest starcraft the world has ever known, and laid in a course for the Numeranium System.

Now as the story goes, the people of the Numeranium System were conceived of a number of flesh and blood think-tanks, who at all cost supplanted within their own technological expanses those safeguards, which towit would always download into their craniums of less than contentious desire, at that point anyway, those ideals of the humans, which were outward-bound on their crusade through the stars, until the domain of their expanse of planetary guards.

In simple language then, we will conclude exactly what was the occurrance, when these two species met. First we have the Earth's warring fragments of consciousness, warring out the activities of those meteor bound consensus of the excalibre design. This simply meaning that towit, on their way unto the highest galaxy content within the continuum, they, with their ideals

and intentions intact, **thought within themselves to take by force all those impeding civilizations, who in fact would not wish to join them in their excavations into the wilderness of the galaxy.** And on the other hand we have the Britons, which do in fact elaborate quite intensively on the fact, that the polar regions versus the Southern Polar Pact would in due time, as of the short past, formulate itself into the intention, that every surviving and living creature upon such planets, who desire inhabitation, would in due time be left of the extinct pattern of changes.

It matters not, however, for the second faction decided that mind power was indeed the limitless factor, which, impeccable in formulated theory, would serve best to gain them clear passage and credentials within the full texture of the vastly unlimited universal structure.

So! What exactly did happen, when the two forces met for the first time? **Mind over matter, that's what! You see, it is always the greater good, which in the end must limit itself unto the planning devices of the negative forces for the providing of valuable teaching lessons!** That is all. Meditate upon this, and squirm in your seat, as we do, for the full impact will indeed hit upon your consciousnesses as to the exact and plymouth extent of this occurring, as soon as mankind has reached a mode in his technological advances, and then proceeds to plan out his strategic mission to infiltrate his gastly nuance into the stars!

Well, this will not be allowed to occur, and through this short story we hope you will take reasoning time to understand just exactly why we, of the northern and southern hemispheric locations, could not allow this for the third time around!

Now you have an insight as to what would happen, and you must agree it is breathshattering. BUT FOLLY HAS NEVER WON OUT, and we of the platitude will, in order to best serve those precious inhabitants of the mother Earth plateau, keep all docking in check.

This is Konteu in the offing for platitudes of storybreaking in fictional theory, signing off on all known frequencies. In case anyone has broken into this story, it must be of the remaining power for this intended book alone. Salu to all for a good day breaking. All luck intended, Juno will be back for the following forcaste within dimensional surfacing in dealing on a linguistic base for all enchanting enhancement of memory control. It's just a little extra for the formatting procedure. That is enough for today, little one. Be of the prowess, indeed, and the reasoning power to implement those forces of awareness unto the token reason of atmospheric displayal accord. JUNO to sign off. Data out. (12:45 pm).

THURSDAY, 22ND DECEMBER 1994

12:22pm

Greetings, little starflame. This is Juno breaking in for momentary talks with regards to the state of the earthen plateau. This topic, we realize, is one of the gravest issues to date within your mediocre paper lines. Well, in an effort to set all the records straight, we will proceed with a rather neutral dialogue. To begin with then, we shall spend a paramount amount of time deciphering, what is exactly the cause, and exactly what you should be doing about it, both, in the singular terminology of your people and universally as a whole.

Chapter title please, little one, to carry on with subtitle heading complete. Name this one of the chapter heading, please, "To Stand Current Within The Framework Of All Holocaustic Affairs." Subtitle will be given to you down the road, so to speak. Continue now.

CHAPTER SEVEN

TO STAND CURRENT WITHIN THE FRAMEWORK OF ALL HOLOCAUSTIC AFFAIRS

Programming in what ye ones have learned so far, you will find that the gravity of the situation facing Earth is like that of a cataclysm on the brink of disaster, just waiting for to see whether or not the new birthing process will contain an appeal inasfar as the new complementary fetus is of concern. And here, when we speak of fetus, we are simply referring to those who are proceeding into an enlightened state of awakening within the majority of their understanding in conscious ability.

In order to make myself clear let me further state, that it is solely of the effort of apartheid, itself a very strategic event to be sure, that we can continue to relinquish those warring effects away from your subtle body of conscious endeavouring toward the manifesting of even related preludes to the one you are formally participating within. You see, dear ones, this reality of yours is described only by the context of your overruling or overriding, though, which the majority of you never cease to project out over the ethers of the atmospheric tides. If you were all to refrain for even a moment in time to expel those negative consciousnesses, you would immediately find that to your surprise all contrary applicationary trauma would disappear from the face of the Earth "in a twinkling of an eye," so to speak.

In the birthing process then it is important to reflect upon those concrete desires of the whole of humanity, and oftimes as you do this, you would move the shift even further into the realm of advance motion. In other words, the heat of the Photon Belt would continue to

accelerate into its magnificence, and with it turn the people, who reside upon the face of the Earth, into a new level of awareness as well as mother Earth itself. For to apply current affluent thoughts into the string of manifesting heat waves, shall we call them for lack of a better attire, then it would suffice to say, that the prolonging of the Earth's misery, as well as those of her inhabitants, could only serve the greater good of the majority. However, as you are well aware, there just are not those numbers who are needed to bring this into its fullest manifestationary properties, and that is precisely where we do come into play on your behalf.

Okay then, it is all settled, we think, until suddenly a conglomerating influx of negative thought waves are projected in their stringent attire unto our soul's collective consciousnesses. That is where the breakdown in communication occurs. It fails to set up the magnetic field, but in effect does cause a plague of a sorts, for without the neutral stimuli, which we have so far succeeded in sending to the Earth's surface on your behalf, we have in effect created those warp coils of a non-compliance to the negative factor on your behalf. In other words then, what we are saying is, that we produce a yin-yang effect upon the consciousnesses of all humanity, for with changing cellular structure we must centralize the condition of wave ranges and put to balance those, who are less affected or developed by the force that is within them, than to even profess to disclose those rheumatic features of a less effective humanitarian influx of negative conscious ability.

This you may find a little difficult to understand within its linguistic development, but it is for a genuine purpose that we allow ourselves the extraordinary opportunity for processing this informational data into more stringent terms than ordinarily applies. In other words, dear ones, there are in fact those personages out within your communities, who fare better if complicated material poses a challenge to their working minds. That is not to say less stringent material is not challenging, we are only saying at this point, that **there are indeed those who will not pick up a book if the material contained therein is too simplified. And you must agree, it is of the utmost importance that we reach *all* facets of your society at this time. Yes?**

BIRTHING PROCESS TO BE ACCELERATED!

On behalf of all humanitarians, for we are indeed participants within that categorical expanse, we must continue to strive for perfection in setting the drift tide of time immortal to accompany in fact those regimes of non-destructive prowess. There are many of you working with us at this time, not just in the helping with dictatorial dialogue and getting them out into the hands of the masses, but rather even further help are we retaining from your unselfish conscious endeavors.

For instance there are those of you even in what you would call "High up Places," who are

working around the clock, so to speak, in your collective efforts to neutralize the continuance bombardment of conscious negative thoughts, which are hitting the atmospheric content of ethers intact from all around. You are the ones, who are the scientists, lawyers, judges, architects, bricklayers and so forth, who have been secretly striving for the greater good of the all. Now, do not in the least mistake what I am saying, for I speak not of those, who contribute unto their own pocketbooks the blood of the nations, whether they be within the jurisdiction of the highly paid hierarchy or not, but in effect my total reference here is to outline a methodology, which has been played out for centuries. It is only that this is perhaps the first and foremost time you have really heard about it.

Do you not in fact think that we concocted the appliance of whiplash upon the backs of those unscrupulous beings, who for the life of them have one intention only, and that is to starve out the people with their ludicrous laws and imprint upon them the mandatory implementation of a world without strife once they are all dead? Wake up comrade! We too have balanced out the procreation of such nuances by placing our own people within the ranking hierarchy! They have always been there, but in much lesser force. You see, it is the collective consciousness of their minds that work the wonders, and those very same minds are the minds who can see and transpose into material reality those injustices of the current age.

There are also those others, who work exceedingly within the collective belt of conscious activity, and for *your* efforts we do thank you! Continue to do so, for you are the seed race to which all higher accommodations are forthcoming!

Break now, Seila, for more we have to produce. Thank you for your time. Juno reporting conspicuously. (1:04 pm).

Now, time for a new sub-heading: "Time Will Produce A Greater Effect Than Before." Let us now proceed with Jambian, a good co-worker of the force of hygienics and astronomical background in Earth shifting compliances. Jambian is a contributor to much more than this in his oft-times workings with scrambled wave currents, which constantly flux around the Earth's atmospheric as well as the stratospheric planes. His is a commander of space station high above your planetary boundaries and does catch the many particles of nonsense, which whirl through the atmospheric tide. These apparages are oft in the form of metallic compliances, which do in fact tend to provide a shift in the infrastructure of molecular currents. For you see, light is always of a curved attribute and consigns within itself that polarity of distinctive qualities, which only the singular wheel currents can produce. On with the topic then and the sub title heading, Seila, please.

TIME WILL PRODUCE A GREATER EFFECT THAN BEFORE!

Hello once again, Seila. For it is Jambian this time, who has come to monitor the current restructuring of all overlying nuances of atmospheric and stratospheric control within the systems of influxing drive lines into the core of the Earth's atmospheric train. The tender here is one which all must succeed in attributing to, for the cause of the planetary surface structure has within it an unlimited quality, which we could possibly refer to as the "injunction of completeness." This core simply serves to complete upon arrival of these excessive wave or electrical currents, which are interloping within the shift of the Earth's crust that complimentary measure of taking along with it that nitrous aspect of itself and flourishing within its context or contours that brief persuasion of arbitrary design.

For our readers, who may have a hard time understand(ing) what I have just relayed to the scientist of tomorrow, let me brief you in its gravity: I have just mentioned, that the kind of energy structures, which we send down in the form of major or excessive energy beams, gravitate toward the very core of the Earth's surface, for that is the first place that the Photon Belt is registered, much as seismic waves are registered upon what you call your Richter Scale. This energy will serve to offset a balance between the neutron effect and the tidal concerns, of which your scientists as well as your helmholzogists have coincided to in the past, to strip off all activity of a negative influence, as well as paramount the expiring date of those seismic instruments, which currently are only able to read twenty miles or so into the Earth's layer.

With the help of microscopic influences, which are detailed above and beyond your surface atmosphere, they will incline at a rate of possibly 20 to zero those appendages, which to many of you do not in this realm yet exist. These specific scientists know they are working under our direction, and to them it is given a wide variety of choices, which do not intend to in the least perform a defunct union upon the consensus of mankind with the poverty regime of world structure.

Preliminary effort rebounds the negative aspect of all time-long journeyings into the Earth's centre. But abound, ye brave sailors of the equatorial tides, for you have been seen as the saviour measures of mankind! Time takes its toll, for now you have to perform a magnitude of services within your own gravitational field, of which you have just scarcely begun. Use your own tricording devices to effect the most good you can, and come out of your warlike helicopters for a good look at what really lies beyond the perimeters of your methodology.

Farewell for now. JAMBIAN over and out on transmittal frequency. Thank you, starflame.
(1:34 pm).

EARTH SCIENTISTS AGAIN

3:12 pm

Shielding the efforts of your nuclear scientists are stringent reforms, so precisely placed upon their composite restructuring of all known artifact, that in order to accomplish their life's dream, they must be in constant contact with we of the higher realms. In order to uplift the secular composition of placing mankind below the realms of the unknown, they must succumb to the artificial rites of non-compliance with those of their higher commands. It has always been the practice of we ones to engage in their services those formulated modulums of such intricate appliances with rules and laws set forth in such a procedure, that failure was just never an applicable rule of standard.

It is to this success of theirs that we can attribute the majority of mankind's makings within the indoctrination, as you call it, into the standard ability to place within their circumferential structural modern those categories, which allude to the finality of success intricate. For these purposes alone do we intend to adhere to the final episode of neutron expanse, for should they ever allow themselves to format a retractment of all nonsensical papers, they will rejuvenate their abstract employment circumstances into the labour force of non-merited income. Do you read me? If not, then read this excerpt! NOT A ONE OF YOU, WHO COME DOWN FROM ABOVE, WILL SUCCEED IN THE GRAVITATIONAL EXPERIMENT OF ABERRATION FROM TIME IMMORTAL UNTO THE PLACEMENT OF TIME, WHICH EXCEEDS THE EXPANSE OF ALL UNIVERSALLY KNOWN ABERRATIONAL ABSTRACT CONSENSUS!

If time immortal or time infinite relates the justice of the system, then it only stands to reason, don't you think, that all expanses of time stood still for only a prime episode of seasonal equation? Think hard, my congenial little episodes of disparaging influences, for it is only needful once at a time to remind ye ones of the interfering presence of those who have gone before you. So there we have it, the only process of neutralizing the gravitational pull in an effort to reduce the time element is structured as well as gravitated through the ongoing process of the elated Photon Belt reality. And though many of you do not believe this to exist, may I remind you that in ages past this certain prediction has been forecaste from the ends of the Earth to the basis of universal cognizance throughout one end of the galaxy to the other.

Be not of heated rival, little ones, for indubitably you have formatted to the other extent those little nuances, which, to defer from the strictest sense of reality, have merited unto your kind very little in conglomerated expense patterns.

That will indeed conclude our arbitrary session for today. Good Evening. MELIX performing against the odds of civilized theorgrams. Exit now please, Uthrania Seila. Adieu. (3:28 pm)

COSMETIC ACTIVITY COORDINATES DESIRE

Thursday, 29th December 1994

9:07 pm

The cosmic refugees tie in with a rather different aspect of the universal repertoire of all the main functioning abilities of the extraordinaire.

This is Lord Germain at the specific coordinated time element on this one, little star. Let us now at your convenience proceed with the epilogue intended. Our discussionary matter as of this eve will stem around those neutrous desires of man himself, that, which he would indeed set himself about to personify as his best facetious aptitude of reform.

Today in your world's history there is laid out within itself a diadem of congruous epitaphs, which by mere fact indeed serve only to refurbish those quiet intentions of man himself. Infused within his doubt as to whether or not there will indeed be a tomorrow, he enters into a spectrum of modifying those qualities, which would serve to bring him about into a further stature of record servitude to those of his mainstream brothers. Those modulums, who are the earthdwelling content upon the Earth have, we suffice to say, upon their most pronounced behalf, proceeded to formulate accounts of exactly where and why the theory of the cosmos in modification of itself has indeed found itself to dwell upon the latter circumference of the nebulous trixoid or turnpike. This in reference to those cross-currents of field activity held within the cosmos have for a long time henceforth held, that **if only the plutonium of the Earth's atmospheric realm could possibly be formulated into mass, then could not the entire format of Earth's crust be dealt with as well as the gaseous content, which lies within the compounds of the plutonium content be forced to expose itself to form a part of the nebulous of the core centre as well?**

These now are indeed needful questions, and not by a long shot, as you put it, would I interfere with the diagnostic theorems of their enticing beauty. So you see, dear ones, it is now indeed, though I might add, the exact time for me to disclose certain formulated copies of just exactly where your formula falls a little short of the dictational process so outlaid by those of your teachers. Please proceed.

Exactly where plutonium as a gaseous content was delivered within the context of your scientific field was through one of your world famous scientists, Tesla. If you remember, he quite precisely alluded to the quantities put forth as being of a contexturized protoplasmic content, which then had to be shifted into the process of gaseous content, which far exceeds the normal boundaries of the most affluent scientist to date. It was recorded then, at least thus

far, that upon doing so a repertoire of affinity as far as the combining of decomposite materials within the gaseous combinations occurred, were indeed the strategic combinations of interfacing those nebulous gases into a foundation of mass equals R2 computed formulated theory. Try Rf to the second and seventh power respectively. What do your procedures tell you? Is it then indeed possible to reformulate a gaseous content by expulsion of the modular waves out into the concise area of the Digatume Theory, so put forth by your own Dr. Spencer? Try again then, if you will, to understand that in doing so with this little experiment, that all possibilities lie within your spectre to reach for the cosmic broadcasting of refuge being drained in the proceeding way, thus enabling ye ones to embark on a sort of strategic layout of obtaining those cohesives through a relegating power of applying 4 to the nucleus base of 10, thus amplifying the molecular structure, without destroying as much as one atom by the changing of its design!

We will proceed in a follow-up at a later date, dear ones. And this one, as you may know, is indeed for that of the scientific field. So with all pardon and due respect to the each one of you, I bid you adieu and good night. Signing out, and thank you, Seila Uthrania. Lord St. GERMAIN at your service.

CHAPTER MISPLACED FOR SPECTACULAR RESULTS

THE ETHERIC BODY IMPLICIT

Greetings to you and yours, Uthrania Seila. This is Juno with Jambian tonight, facing an interlude of satisfactory process within our domain to yours. Our topic of the evening is a rather implicit one, to say the least, and at your expense as well as ours we are more than glad to bring to you more of the same, insofar as applicable data is concerned. If ye be ready then, we would be pleased to begin. Salu.

The etheric body, of which so many of ye ones are extremely aware, serves to expound upon itself in the manner of intricate sub-atomic currents, which from time to time implode within themselves explicate tidal extremities of neutron based cohesions. In other words, little ones, the cosmic body of the entire universal structure radiates within itself a homogenous radiation of sorts of the caricature of both combining the external vortexes of the seven main chakra areas into the gygenical realms of coordinated exposure to the gyroglyphic coordinating pulsating of cosmic activity. It is within the circumferential pattern, which so often eludes the understanding of all save the Creation itself, that **we have those formatted desires of ongoing**

restructuring of ourselves, or bodies from one body type to that of another, in an effort to complete that spectre of rounds unto the time of positively cohabiting back into the grain the entire and whole of the creative personality itself. It is within a structured timepiece or timeclock itself, that we experience those most intricate of modified sources, which in all their parts enable us as messengers of light to perform the good unto all of the different species of mankind itself, whether they be of fourth dimensional attributes, lower, or the higher of itself. **FOR ALL, AS WE HAVE SAID BEFORE, IS ONE! Understand this, for this is simply a calibrated *LAW OF THE UNIVERSE OF ONE!***

There you have it then from the source structure of the voice of our interluder and master teacher, Lord Master Germain. And now, we will proceed in our own way to elaborate on behalf of the more simple in nature, to *their* reason of understanding, for all are of the worthy nature to be understood, and to have this information understood in these, your last days.

In order that the etheric body exposes itself to the currency or rays of the upcoming Photon Belt, it is necessary for each one of ye to understand the great significance placed upon those time continuum sequences, which are to be an upcoming portion of your future *in the very short future*. It has been explained then through the many authors, who have used those gracious "enlightened ones" of particular for the channeling implementation, to further enhance the complete understanding of mankind himself with the intention of expelling all and any limitations, of which mankind have so conveniently placed upon himself. Let us proceed then to expound on a few or bare minimum of truths, which you face in these the closing days of what you now know as mother Earth, or for the remainder of you, Terra.

Expoundtion then is our cause. The aptitude of rediscovering your values, as from whom you were created and to whom you have maintained a likeness to, has within your genetic structure those codes, which, given a fair chance, will relate to you your complete heritage of exponential essences of attributes. In other words, dear ones, it is impossible at this given time within your historical based aphasia, of which you are apt to term as the death correlated theory, that according to all consensus of design you need to die first or rather, to pass from this plane firstly without further consideration of the light, of which you hold within yourselves.

You must understand that this is a very precluded and grave situation for you, to continue to think in terms of death versus hostility toward those of the enlightened factor. **There is always within you that element of doubt as to the realization of your god-self maintaining the structure of completeness, never mind tying in with the whole. For at this time it would seem that many of you are being faced with a desire for completeness as it should be. But then again on the other hand, this is simply a prelude to the art of finding your own greatness among those other discoveries of the stars.**

Is it so difficult then to come to the realization, that if indeed ye are each One with the Whole

of the Created Source, and that if indeed you have manufactured within your essence that realization that *you are gods* of a sort, to come into the full competency of understanding, that **the truth of going from Avatar unto the routine structure of the manifesting into the Whole of All Things, being the Creative Purpose, that just maybe you too indeed may light upon that journey of predominant expiry of conquest, inasmuch as those of higher realms or standing have thus far accomplished.**

***UNDERSTAND THE ONENESS, FOR IT IS INDEED YOUR HERITAGE!* And at least, you should be given to understand *that*, if nothing else at this time!**

You see, when the expiry of the Photon Belt has passed, you will find yourself either driven out by necessity of expiring into a given situation of mind and/or reasoning, or indeed you will find yourselves rejuvenated back into somewhat of a less glorious prefix of continuity. This is to be seen as a rapid change in the transpiration of all duplicating forces. In other words, it is not I, whom you would encounter at the juncture of your resonating complex authority (personality/reasoning), of which you hold within yourself, but that indeed of your own accomplice or effort to look within yourself through eyes of those procedures of your own self-worth versus self doubt. **For if you doubt yourself at this time, then you may find, that to honour another would be a great misgiving or error, for if you were to doubt yourself, how could you possibly then entice another into your coordinates in order to transpire that which you yourself have not as yet even come to terms with?**

This is Epic Number Four in the congenial set of universal standards, as set forth for the better understanding given to mankind in general. Read through these and indeed familiarize yourselves with the concepts of all data.

JAMBIAN out, finishing up for Juno who is now out on command duty. Adieu, and thank you for your gratified time essence. Signing off then at Quadrant Mega Plex of the fourth dimensional plane. (10:19 pm).

CHAPTER EIGHT

SUNDAY, 26TH MARCH 1995

7:21 pm

Typically speaking then, we shall be more than pleased to submit unto you, our readers, the

accounts of further strategic deployment of all artificial acumen of our firm establishment of elitist brothers, who art in fact still of the effort of retaining their clientele on the dark side of fictitious harmony, this being the remaining caricature of pleasure toward those of non-compliant efforts on our behalf and on behalf of all citizens of the planet Earth.

This will prove in fact to be the major placebo in strategic events, which will serve to curtain those familiarities according to the rationale of metamorphic sub-currents of structure in compliance with all physical attire, due in part to *our* releasing of the plutonian spectrum of non-evasive diplomatic affairs.

Please proceed then, Seila, with the new chapter title of "Espionage in the Fair Plains of Elitist Territory With Little Regards to the Well Being of Planet Earth and its Inhabitants." We choose to shorten this to curtail this episode with a rather shortened title version of "The Elitist Symphony and Its Relationship With Earth." Please enter.

THE ELITIST SYMPHONY AND ITS RELATIONSHIP WITH EARTH

To begin with then, it is of major importance for ye all to understand our methods of *getting you all out of there*. On the forefront is the Dexter methodology of strategically placing within your own perimeters *that* writing of reference, in order to re-inform those sculptured readers, that on the sidelines in your dimension await all those with ulterior but most beneficial motives for the continuation of survival of you and your planet.

This will never be curtailed simply because the survivalists of the few deem this to be subjected only as a belt cause of alarm within, what they consider to be, *their* territory alone. In effect, it will be sounded with great alarm of our arrival before the homing-in project "Sound Alarm, Earth" sounds off for its final time!

Now, this next section is indeed the proceeds of the frailty of mankind in general, for as we have said countless times before, we have been for some time in the process of alarming or rather warning mankind of his impending danger, and here we do not intend to use the word "he" or "his" as referring to either masculine or feminine, but simply structured so as to allude to the fraternization of the species, which are also our brothers.

Next sub-heading, Seila, will indeed set off to generation an ethos of interest in accordance to that set standard so employed by our UFO consolates. "Subtraction of a Generic Species of Sub-standard Humans is simply NOT THE CASE!"

SUBTRACTION OF A GENERIC SPECIES OF SUB-STANDARD HUMANS IS SIMPLY *NOT THE CASE!*

Arriving at a rather implicable but penetrating dilemma, our pagan friends will have unto themselves that idolatrous enigma of merely declaring their relationship with the thousands of offset rigamarole than have their predecessors from time immortal. In simple terminology then, we have simply stated that, being, what you would call an "extraterrestrial," is no longer registered as an equilibrium style type report within your governmental systems board.

In other words, do not think for one iota of a momentary pause, that we have only just now appeared out of the blue for your momentary inspection to the prelude to Earth's criteria. **THAT IS SIMPLY NOT SO!** It has in fact taken us eons to establish a firm relationship with former and previous ones of your governmental regime. Let it not now vanish behind a halo of further futuristic iniquity, for to lead the peoples down the path of gardenic destruction would indeed be for the manufacturing of world collapse.

WE ARE HERE FOR YOU, THE PEOPLE!! LISTEN NOW TO OUR GUARDIANS OF YOUR WELFARE AND WE WILL BE PLEASED AND BEHOOVEN TO SHARE WITH YOU OUR FINEST DREAMS FOR THE PLIGHT OF MANKIND ALONE! TRUST US! LEAVE US WITH NO MISCONCEPTION ON YOUR PART OF THE PLAN. Salu for now, Seila, please proceed with Korthrox in realigning the prospective value of our concern for the evacuation process of those all hallmarked with "pro choice," as you might call it, for the entering of all descriptions of those, who might be ready and waiting for our kind of trumpet to sound off.

Later that evening

On with the material at hand, Seila, and with no further delays please on our behalf. Korthrox signing in on behalf of Juno and the elitist brethrenhood controversy.

CHAPTER NINE IS SIGN-OFF TIME

RECOVERY IS GENERALLY SPEAKING

It has often met with our great displeasure, that a fraction of the population on planet Earth has subjected themselves and infused themselves with the notions, that we are astringent and hold within our source, our "flying saucers," the limitless and notorious data to simply come down like great swooping birds and peck away at your reserve. So to frighten you into believing, that we would proceed to harm you in such a vampirish way, they have induced each and every one of ye to believe, that we, in our nightmarish way, have actually succeeded in going beyond the impoverished state of their minds, when **in actuality it is they themselves, who have so slain their own people with their antiquated forms of ship attire.**

It is true, that there are those of our species, who do summon the desire to study your inhabitants, but by force NEVER! We use disks, which are ejected into your atmosphere and are so high in vibrational static charges that only one with an eye for tomorrow might rescue them, if only they could locate and catch them. With this data then we have studied countless of human beings, and of those few only a mix have we previously rescued from their sad surroundings, and that only by their own contention. **Nothing could indeed be further from the truth than the unconditioned fact, that we are the "arbitrators of destruction" and are thereby sending you, the inhabitants, for the zillionth time in your history, the unending facts of our utilizing euphoria into your realm, as you pass through the fourth into the fifth dimensional belt!**

WE ON THE OTHER HAND DO WELCOME YOU, ONE AND ALL, TO JOIN WITH US AS THE FINAL MELTDOWN OF MOTHER EARTH IS ALLOWED TO CAUTERIZE HERSELF OF THE FILTH BROUGHT UPON HER NAKED SKIN, SO TO SPEAK, SINCE THE CANONIZING OF WHOREDOM BEGAN! So it is to us then that you must turn, allowing our people, your brothers and sisters, the honour of extraditing the each and every one of you from mishapen displeasure, which is sure to occur upon your planet's surface within the next two decades or twenty years!

For a time date we're never sure of and though in fact we surmise a waiting period of three to five years exponentially speaking, we always allow ourselves the necessary dogma in order not to actually tie up the following curriculum you have inundated toward yourselves. The year

2000 for instance is a strategic point of reference, and we could gladly say for the benefit of mankind, if they follow our precise directions, that this is so, but by experience we have hurried the course of direction of the planets in the sky, therefore exponentiating a drama of 2 to 1 value points on precise reference. We only mean to say here that satire is not the point, **but being ready no matter what the cause of radiation may bring about upon the sheltered regions of the Earth's crust, YOU MUST PREPARE FOR INSTANT AND SWIFT EVACUATION AND LEAVE NOTHING TO FATE, FOR FATE WON'T MEET YOU HALFWAY, DO YOU UNDERSTAND?**

This can be a glorious time for all of mankind, but to those who do not understand, we will continue to pull them up by their consciousness into the understanding of exactly why they were indeed left behind at such a crucial time in all of evacuational history. That is a sad day to come, and one we prefer at this time to dwell on little.

In an effort then to better let you understand the predicament and ploy your government officials have you encased within, then let us say this: THEY WILL BRING OUT THE OVERLOOKED BLUEPRINTS OF THE PAST, PRESENT, AND WHAT THEY HAVE EVEN GAINED IN YOUR FUTURE TIME, WHICH IS IN THE "NOW" AND SEQUESE THESE PLANS INTO THE FORMULATION OF THE MANUFACTURING OF GOODS FOR THE SOLE PURPOSE OF USURPING THE CONSTITUTIONAL RIGHT OF THE PEOPLE OF PLANET EARTH, TO SHAPE THEIR CULTURES WITH THE BEST AND THE HIGHEST FORM OF TRAVEL FLOATING DEVICES, AS WELL AS EQUIP THEM WITH ALL ASPECTS OF ROBOTICS AND TECHNIFORMS DUE TO THE WELL PLANNED OUT CO-ORDINATES OF RESTRUCTURING AND REPROGRAMMING YOUR FIELD PROJECTORS INTO OBLIVION.

In other words, dear ones, the ones belonging to the "few" have interjected by that time in the near future a diversion of such magnitude, that even those who are in training for all evacuational processes will not be able for a time to withstand all their "new" devices and technology, which has been so hidden away from the eyes of all those, who would have in centuries past profited from them.

EXPECT A GREAT REDUCTION IN LOCALIZED TAX REFORMS AND PROCEED WITH MUCH CAUTION, FOR THEY WILL INFUSE IN THE EACH AND EVERY ONE OF YE THE HYPNOTIC INFLUENCE, WHICH GOES ALONG WITH POVERTY TO RICHES.

WATCH JUST WHERE YOUR WEALTH LIES, FOR AS SODOM AND GOMORRAH WERE EMBELLISHED IN RICHES AND CRIME, SO DID THEY NOT EVEN NOTICE THAT WHICH WAS UPON THEM BEFORE THE END, AND WHO DID *THEN* ESCAPE? YOU UNDERSTAND?

BELOVED ONES OF OURS, HIDE YOUR HEAD NOT IN THE SAND AS THE OSTRICH

OF THE WORLD DOES, BUT INSTEAD LOVE TRUTH AND ITS LIMITLESS MEANING FOR YOUR SOUL'S JOURNEY, FOR THE FAR REACHING SPACES OF THE GALAXY ARE IN WAITING FOR YOUR SOJOURN - YOUR ARRIVAL - WHILST THE EARTHEN PLATEAU IS IN THE CLEANSING PROCESS OF HER OWN ATTIRE.

It will indeed be a momentous day, when we will all finally meet and a banquet is furnished to your delight, when aboard our specially ready-made craft for you our brother's and sister's recovery. We are especially thankful to all, who have laboured and are heavy laden with hope and desire amidst a terrible but wonderful time in the Archepegeous vicinity of Armedian conquest of evil vs beautiful in nature.

Adieu, and good night, sweet ones of our kind. Salu, and we send you love and greetings early! Korthrox, Commander in Chief of the Archilles Sector for prompt returns aboard the Stargazer of Sophram's Group for instant deployment in downloading the data. Good night, Seila. KORTHROX out. (8:37 pm).
